### Che A B C of the X Ray

By WM. H. MEADOWCROFT.

One volume, 12mo, cloth and gold, 75 cents; paper, 50 cents.

The first primary work on the subject. A book for the people. The author of "A B C of Electricity" (1 vol. cloth, 50c.) showed clearly in that work his ability to explain a technical subject for the layman who knows nothing of scientific terms. He has written this work about the X Ray in his usual clear and simple style, and a wide circulation of this highly useful book is as-ured. The text is beautifully embellished with fine engravings, and nothing is omitted that will give the public a clear knowledge of this remarkable discovery of Prof. Röntgen. public would do well to secure both of these important works by this author. Sent postpaid by the publishers on receipt of

American Technical Book Co.,

## BUSINESS MEN

The value of the Scientific American as an advertising medium annot be overestimated. Its circulation is many times greater than that of any similar journal row published. It goes into all the States and Territories, and is read in all the principal libraries and reading rooms of the world. A business man wants something more than to see his advertisement in a printed newspaper. He wants circulation. This he has when he ad vertises in the SCIENTIFIC AMERICAN. And do not let the advertising agent influence you to substitute some other paper for the SCIENTIFIC AMERICAN when se-lecting a list of publications in which you decide it is for your interest to advertise. This is frequently done for the reason that the agent gets a larger commission from the papers having a small circulation than is allowed on the SCIENTIFIC AMERICAN.

MUNN & CO., Publishers. 361 Broadway, New York.

THE SUBMERGED PIPE LINE ACROSS the Wilamette River at Portland. Oregon.—By F. and A. S. Riffle. Description of a line of 28-inch cast iron submerved pipes forming portion of the main line constructed during 1833 and 1894, to supply the city of Portland with pure water from Bull Run, a mountain stream thirry mise distant. With 13 lilustrations. Contained in SCIENTIFIC AMERICAN SUPPLEMENT, Nos. 1019 and 1020. Price 10 cents each. To be had at this office and from all newsdealers.

#### Do You Know-What?

That the SCIENTIFIC AMERICAN has been published by MUNN & CO. fifty years? that it is the best, the most popular, and has the largest circulation of any per devoted to science, engineering, med inventions and the latest discoveries in all parts of the

Such is the fact and the paper is mailed every week to all parts of the United States, Canada and Mexico, one year, fer \$3.00.

The useful information and recipes contained in the column of notes and queries is of inestimable value to engineers, students, inventors and, in fact, to all classes of people; and the information, which is not attainable elsewhere, is worth more to the reader than many times the cost of subscription to the paper,

The large number of engravings which illustrate every issue involves a large expense, is a useful as well as an attractive feature of the paper. Every discovery, nev invention or improvement of importance is illustrated in the Scientific American. It teaches young persons to think and suggests invention. Teachers and employers who have the interest of young people at heart should recommend their careful reading of the paper.
