Why Were Typewriters Invented?

To produce Typewritten work Faster, Easier, and Better than manuscript written with a pen.

The Record of the No. 2 Hammond!

- SPEED-206 words a minute.
TOUCH-Light, elastic, with key depression one-half that of other machines.
WORK-Equal to a handsomely printed page because alignment is perfect, impression is uniform, and all characters graceful and clear cut.

THE HAMMOND TYPEWRITER CO., 401 East 62d Street, New York.

Typewriter Patent
This company owns Letters Patent No. 558,428, issued April 14, 1896, covering broadly all machines in which the cylinder turns up to expose the line of print, or in which a duplex or cross ribbon feed is used. The patent also covers many other features of modern typewriter construction. Infringers will be vigorously prosecuted.

TO BUSINESS MEN
The value of the SCIENTIFIC AMERICAN as an advertising medium cannot be overestimated. Its circulation is many times greater than that of any similar journal now published. It goes into all the States and Territories, and is read in all the principal libraries and reading rooms of the world. A business man wants something more than to see his advertisement in a printed newspaper. He wants circulation. This he has when he advertises in the SCIENTIFIC AMERICAN. And do not let the advertising agent influence you to substitute some other paper for the SCIENTIFIC AMERICAN when selecting a list of publications in which you decide it is for your interest to advertise. This is frequently done for the reason that the agent gets a larger commission from the papers having a small circulation than is allowed on the SCIENTIFIC AMERICAN.

To Architects and House Owners

The use of Wheeler Patent Wood Filler on all natural interior woodwork insures a permanent fine finish, and leaves the wood pores perfectly transparent so that the full life of the wood is developed.

In painting the exterior or interior of a house, Breinig's Lithogen Silicate Paint should be used. It stands where lead and oil fail, and outwears any other paint.

Architects and owners in their own interests, should see their specifications carried out in full, and examine bills for the articles specified before accepting work as satisfactory.

GOODS AND IDEAS ARE AMERICAN! We send out no "drummers," we sell only for cash, and depend upon direct mail trade with consumers. Began this plan in '77. Here is the pattern we call "Our Masterpiece." If ink and paper could show polished steel and shining pearl as they are, every reader would be unhappy until he owned the knife shown in this cut. It is the best knife that can be made. Blades are highest grade of razor steel, file tested, warranted strong enough for anything, fine enough for a quill pen, weighs 2 ounces, 3 blades. Price, with ebony handle, \$1.25; Ivory, \$1.50; choicest pearl, \$2; postpaid. Less 25% in dozen lots. We have 400 patterns. Send for free 80-page Ills. List, and "How to Use a Razor." Our hollow ground, warranted Razor, 90c.; Strop, 50c.; lather brush, 25c.; all three, postpaid, \$1.50. Write us. MAHER & ROSE CO., 40 A Street, Toledo, O.
