

Business and Personal.

The charge for insertion under this head is One Dollar a line for each insertion; about eight words to a line. Advertisements must be received at publication office as early as Thursday morning to appear in the following week's issue.

Marine Iron Works. Chicago. Catalogue free. For logging engines. J. S. Mundy, Newark, N. J. "U. S." Metal Polish. Indianapolis. Samples free. Yankee Notions. Waterbury Button Co., Waterbury, Ct. Handle & Spoke Mch. Ober Lathe Co., Chagrin Falls, O. Order pattern letters & figures from the largest variety. H. W. Knight & Son, Seneca Falls, N. Y., drawer 1115. Improved Bicycle Machinery of every description. The Garvin Machine Co., Spring and Varick Sts., N. Y. Concrete Houses - cheaper than brick, superior to stone. "Ransome," 757 Monadnock Block, Chicago. The celebrated "Hornby-Akroyd" Patent Safety Oil Engine is built by the De La Vergne Refrigerating Machine Company. Foot of East 138th Street, New York. The best book for electricians and beginners in electricity is "Experimental Science," by Geo. M. Hopkins. By mail, \$4. Munn & Co., publishers, 361 Broadway, N. Y. Machinery manufacturers, attention! Concrete and mortar mixing mills. Exclusive rights for sale. "Ransome," 757 Monadnock Block, Chicago. Send for new and complete catalogue of Scientific and other Books for sale by Munn & Co., 361 Broadway, New York. Free on application.

Notes & Queries

HINTS TO CORRESPONDENTS.

Names and Address must accompany all letters or no attention will be paid thereto. This is for our information and not for publication. References to former articles or answers should give date of paper and page or number of question. Inquiries not answered in reasonable time should be repeated: correspondents will bear in mind that some answers require not a little research, and though we endeavor to reply to all either by letter or in this department, each must take his turn. Buyers wishing to purchase any article not advertised in our columns will be furnished with addresses of houses manufacturing or carrying the same. Special Written Information on matters of personal rather than general interest cannot be expected without remuneration. Scientific American Supplements referred to may be had at the office. Price 10 cents each. Books referred to promptly supplied on receipt of price. Minerals sent for examination should be distinctly marked or labeled.

(7168) E. T. asks: Why do you have to put in a magic lantern slide upside down to make it show right on the canvas? A. Because the rays cross in the lantern.

(7169) F. L. C. says: Please give me, through Notes and Queries, a recipe for a hard cement for bicycle tires. A. For bicycle tire cement, mix together two parts pitch and one part of gutta percha. Melt over a water bath and use hot.

(7170) E. Y. M. asks: 1. What is the best way of cutting down a 500 volt current for charging storage batteries where a meter is used? A. The best way of charging cells from a 500 volt circuit is to use the current in a motor dynamo built to give the current required, perhaps 10 amperes at 25 volts per cell. 2. Will a rheostat made of German silver wire consume any of the current? A. The rheostat affects current by its resistance, according to Ohm's law - current = volts divided by ohms. 3. How much and what size German silver wire should be used to reduce current to proper voltage for charging the storage cells? A. It is not economical nor feasible to reduce a 500 volt current for charging cells with a wire resistance of any kind. 4. Would iron wire do as well? A. Iron has about one-half the resistance of German silver, and, therefore, about twice as much, size for size, would be required for any resistance. 5. How many watts will be consumed in charging a 150 ampere hour cell? A. Two and one-half volts are required to charge a storage cell; hence 2.5 x 150 = 375 watt hours. 6. To what voltage should the current be reduced? A. 2.5 x the number of cells in series.

(7171) L. C. T. says: Please send me a recipe for removing freckles from the skin. One that is not injurious, if such a thing is possible. A. Under the empirical title of "Albadermine," a process of removing tan and the milder variety of freckles, a foreign surgeon has devised the following:

Solution A.

- Potass. iodid. dr. ii.
Iodine pur. gr. vi.
Glycerine. dr. iii.
Infus. rose. oz. iv.

Dissolve the iodide of potassium in a small quantity of the infusion and a drachm of the glycerine; with this fluid moisten the iodine in a glass of water and rub it down, gradually adding more liquid until complete solution has been obtained; then stir in the remainder of the ingredients, and bottle the mixture.

Solution B.

- Soda hypsulph. thiosulphate. oz. iss.
Aqua rose. ext. pt. i.
Dissolve and filter.

With a small camel's hair pencil or piece of fine sponge apply a little of "Albadermine A" to the tanned or freckled surface, until a slight but tolerably uniform brownish yellow skin has been produced. At the expiration of fifteen or twenty minutes moisten a piece of cambric, lint or soft rag with "B," and lay it upon the affected part, removing, squeezing away the liquid, soaking it afresh, and again applying until the iodine stain has disappeared. Repeat the entire process thrice daily, but diminish the frequency of the application if tenderness be produced. In the course of three to four days to as many weeks the freckles will either have disappeared entirely or their intensity will be greatly diminished. "Summer freckles" yield very speedily to this treatment.

Advertisements.

ORDINARY RATES.

Inside Page, each insertion - 75 cents a line
Back Page, each insertion - \$1.00 a line
For some classes of Advertisements, Special and Higher rates are required.

The above are charges per agate line - about eight words per line. This notice shows the width of the line, and is set in agate type. Engravings may be had at advertisement rates at the same rate per agate line, by measurement, as the letter press. Advertisements must be received at Publication Office as early as Thursday morning to appear in the following week's issue.
