to may be had at the office. Price 10 cents each. **Books** referred to promptly supplied on receipt of

Minerals sent for examination should be distinctly marked or labeled.

(7215) E. R. asks: 1. Could you inform me if the eight light dynamo described in SUPPLEMENT No. 600 can be used as motor? A. Yes. 2. How many volts shall I use? A. 50. 3. Have you published any paper in which you describe any motor of say 1 or 2 horse power? All your description I have followed, and I have a fine Holtz machine, a dynamo, an induction coil and a small motor. A. The Edison dynamo described in SUPPLEMENT No. 844 could be enlarged to meet your wants, and the SCIENTIFIC AMERICAN dynamo described in SUPPLEMENT No. 865 could be reduced

(7216) E. A. B. writes: 1. I am about to build the dynamo described in SUPPLEMENT No. 600 with half dimensions. What number wire should be used on the armature, and how much for drum winding? A. No. 24. Use 16 coils, 24 turns in each coil, in 2 layers of 12 turns each. 2. How many wires should be placed in multiple on the fields, and what number should they be? What would be the amount of wire on the fields? A. Put 2 coils on each leg of field magnets, each coil having 250 turns of No. 22. 3. What would be the voltage and current of this dynamo? A. 50 volts and 1/2 ampere at 2,500 revolutions per minute.

#### ORDINARY RATES.

Back Page, each insertion, - - \$1.00 a line For some classes of Advertisements, Special and Higher rates are required.

Higher rates are required. The above are charges per agate line-about eight words per line. This notice shows the width of the ine, and is set in agate type. Engravings may head adver-tisements at the same rate per agate line, by measure-ment, as the letter press Advertisements must be received at Publication Office as early as Thursday morning to appear in the following week's issue.

his readers in simple terms that brought it readily within the comprehension of the reader. In the work before us the author manifests the same directness and simplicity of style and direction. The very term psychology is apt to Inside Page, each insertion, - 75 cents a line carry with it ideas of abstruse metaphysical reasoning which deter any but the habitual student of the science from opening a new work on this subject. The present volume, however, will prove to be interesting and readily intelligible reading, even to those who have had little previous acquaintance with psychology. The new psychology consists in the application of physiological tests to psychological phenomena. Thus there is a measura ble period of time between the moment that any object is presented to any of our senses and the moment of sensation. The new psychology, by means of delicate me chanical or chemical apparatus, enables us to measure this interval, which varies greatly in different individuals. So does the "time of reaction," or the conscious action in response to a signal. Part I of the volume deals with "methods," the next three are devoted to time, energy, and space, and Part V is a review of the past and pres ent of the science. The work is freely illustrated with diagrams and half tone engravings of the various apparatus used by the author in the Yale laboratory, much of which is of his own design.

### TO INVENTORS.

An experience of nearly fifty years, and the preparation of more than one hundred thousand applications for patents at home and abroad, enable us to understand the laws and practice on both continents, and to possess unequaled facilities for procuring patents everywhere. A synopsis of the patent laws of the United States and all foreign countries may be had on application, and persons contemplating the securing of patents, either at home or abroad, are invited to write to this office for prices, which are low, in accordance with the times and our extensive facilities for conducting the business. Address MUNN & CO., office SCIENTIFIC AMERICAN, 361 Broadway, New York.

Coils (Induction and High Fre-quency), Fluoroscopes, Motor-Generators, etc. MINIATURE INCANDESCENT LAMPS, Candelabra, Series, Decorative, Battery EDISON DECORATIVE & MINIATURE LAMP DEPT. C, 650 Elston Ave., Chicago, V. S. A. FEED

chology of feeling and emotion. It has been the aim of the author to keep the work within reasonable limits and to this end he has refrained from digression and all historical exposition. The first part of the book is occupied with studies of the more general manifestations of feeling ; pleasure and pain, and then the nature of emotion. The second part is devoted to the special emotions The doctrine which the author adopts without restriction connects all states of feeling with biological conditions and considers them as the direct and immediate expression of the vegetative life. Feelings and emotions are not a superficial manifestation; they have their root in the needs and instincts. The index (invaluable in a com prehensive work of this kind) is fairly voluminous

THE NEW PSYCHOLOGY. By E. W. Scripture, Ph.D. (Leipzig), director of the Yale Psychological Laboratory. With 174 illustrations. London: Walter Scott, Limited, Paternoster Square. New York: Charles Scrib-ner's Sons, 153-157 Fifth Avenue. ner's Sons, 153–157 Pp. 500. Price \$1.25.

One of the great charms of the works of the late Professor Huxley was the simplicity and clearness of his style - his happy faculty of putting a scientific fact before

ELECTRO MOTOR, SIMPLE, HOW TO make. By G. M. HOPKINS, SIMPLE, HOW TO make. By G. M. Hopkins. Description of a small elec-tro motor devised and constructed with a view to assist-ing amateurs to make a motor which might be driven which would have sufficient power to operate a foot lathe or any machine requiring not over one man pow-er. With 11 figures. Contained in SCIENTIFIC AMER-ICAN SCIPPLEMENT, No. 641. Price II cents. To be had at this office and from all newsdealers.
