Stage Illusions and Scientific Diversions Including Trick Photography.

ALBERT A. HOPKINS.

WITH AN INTRODUCTION BY HENRY RIDGELY EVANS.

Price, by mail, \$2.50.

568 Pages, 420 Illustrations.

THIS new work on Magic, Stage Illu-sions and Trick Photography appeals to the prefessional and the amateur alike, and will prove a welcome addition to any library and will be read with interest by young and old. The illusions are well illustrated by engravings which fully explain the nature of the tricks. Great attention is paid to the expesés of large and important illusions. Some of the mest important tricks
of Rebert Houdin, Bautier de Kelta, Kellar and Herrmann are

explained. Conjuring tricks are not neglected, and Fire Eaters, Swerd Swallowers, Ventriloquists, etc., all come in for a share of attention. The section devoted to "Photographic Diversions" is very complete, illustrating the most important forms of trick photographs which the amateur can make. There is also a valuable Bibliography of Books on Natural Magic. The book is a

large ectave and is handsomely bound.

To An illustrated circular giving specimens of the engravings, together with a full table of contents, will be mailed free to any address.

> MUNN & CO., PUBLISHERS. 361 BROADWAY, NEW YORK CITY.

A Complete Electrical Library

BY PROF. T. O'CONOR SLOANE.

5 Volumes for \$5.00.

A VALUABLE AND INDISPENSABLE ADDITION TO ANY LIBRARY.

of the science of Electricity, and desire to become electrical engineers, are prevented by circumstances from attending the higher institutions of learning. These will hal with

An Electrical Education at a Nominal Cost

by securing the five following books by Prof. T. O'CONOR SLOANE, comprising a COMPLETE ELECTRICAL LIBRARY, in which the various branches of electrical work may be thoroughly studied. The following is a synopsis of some of the contents of the five volumes:

Electricity Simplified. This work is the simplest ever published on the subject. Electricity is in many respects unexplained by the scientist; to the ordinary man it is all a mystery. This book makes the subject as plain as possible. Shows how two plates of different metals immersed in acid can send a message around the globe; how a bundle of copper wire rotated by a steam engine can be the agent in lighting our homes and streets, etc. By illustrations of original design and scope, the subject is made exceedingly simple. 158 pages, illustrated. Price \$1.00. and scope, the subject is made exceeding ple. 158 pages, illustrated. Price \$1.00.

Arithmetic of Electricity. A practical treatise on electrical calculations of all kinds reduced to simple rules and illustrated by practical problems with solutions, followed by an exbaustive series of tables. One of the most useful works published on electricity. 138 pages, illustrated. Price \$1.00.

Electric Toy Making, PYNAMO and Electric Motor Construction. A work for amateurs and young folks. Shows how to make at home Electrical Toys, Motors, Bells, Magnets, Batteries, Dynamos, and electrical instruments in general. 140 pages, illustrated. Price \$1.00.

How to Become a Successful Electrician. Indicates how the student electrical engineer without the great expend-

THE STANDARD ELECTRICAL DICTIONARY. An indispensable work to all interalike for the student and professional. A practical handbook of reference containing definitions of about 5,000 distinct words, terms and phrases. Definitions are terse and concise and include every term used in electrical science. An entirely new edition brought up to date and greatly enlarged. Should be in the possession of all who desire to keep abreast with the progress of this branch of science. Complete, concise and convenient. 682 pages, 383 illustrations. Price \$3.00.

valuable books can be had separately at the published prices.

·**** SPECIAL OFFER to readers of the SCIENTIFIC AMERICAN and their friends. We are able to furnish the above five volumes, handsomely bound, and inclosed in a neat folding box as shown in the illustration, at the Special Reduced Price of Five Bollars for the Complete Set. To save \$2.00 by ordering the complete set. Sent by mail or express, prepaid, to any address in North America. To foreign countries, by mail, post-free, in separate parcels, at the same price.

A \$7.00 ELECTRICAL LIBRARY FOR \$5.00.

Send for special circular of the complete contents of all of these books. Also for our complete 116 page book catalogue sent free to any address,

MUNN & CO., Publishers, 361 Broadway, New York.

A printed copy of the specification and drawing of any patent in the foregoing list, or any patent in print issued since 1863, will be furnished from this office for 10 cents. In ordering please state the name and number of the patent desired, and remit to Munn & Co., 361 Broadway, New York. Special rates will be given where a large number of copies are desired at one time.

Canadian parents may now be obtained by the inventors for any of the inventions named in the foregoing list, provided they are simple, at a cost of \$40 each. If complicated the cost will be a little more. For ful instructions address Munn & Co., 361 Broadway, New York. Other foreign patents may also be obtained.

IVES in Seven Styles EVERY EVERYWHERE

In $4\frac{1}{4}$ x $4\frac{1}{4}$ or 4 x 5 or 5 x 7 sizes, from \$5.00 to \$30.00. 18 to 36 Glass Plates, or 50 to 100 Cut Films can be carried in a VIVE at one broad daylight, without any extra outlay for holders. All sizes so simple and reliable that any novice is sure of good results. A full equipment of Vive Metal Combination Plate and Cut Film holders are included in the price of each Camera, and have no mechanical device to get out of order.

All Vives are fitted with beautiful, clear cut, sharp universal focus, quickest snap shot Lenses—none better. Unequaled three time pneumatic finger release shutters. Brilliant, square, centered finders.

Taken with the \$5.00 VIVE.

will carry and expose

18 Glass Plates

50 Cat Films, 41/4 x 41/4 or any smaller size desired without reloading. These can all be These can all be exposed in the Camera without pulling a slide or working any mechanical holder device. It takes the largest pictures and carries the most of them inthe smallest Camera construction. Size 47% x 5x 7% outstruction. Size

VIVES are the only perfect, compact, and universal

THE NEW No. 4 VIVE, 4×5 , \$10.00 CAMERA.

The ONLY 4x5 CAMERA with which you can act your pleasure in exposing either 18 Glass Plates or 50 Cut Films that do not curl, or part of each.

Full requirement of Combination Metal HOLD-ERS FREE. Vive Patent Combined LENS CAP and Diaphragms. Vive Patent Adjust-able Focusing Magazine (for taking large cabinet size photographs). Two Large Brilliant, Square, Centered Finders, for taking either horizontal or oblong pictures. It is the cheapest and smallest, and will take the largest number of pictures at one loading.

It is absolutely universal in its application, taking any and all kinds of pictures, instantaneous and time, or any outdoor or interior views.

any outdoor or interior views.

With the new Vive Backed Plates and Films, the use and weight of holders can be dispensed with at will. They cost no more than plain ones, as listed by all plate and film makers. Vives alone secure you this great improvement and unique advantage.

Every instrument is fully guaranteed to do all we claim, and to take as good pictures as samples mailed.
