For bridge erecting engines. J. S. Mundy, Newark, N. J. For Sale—Patent No. 589,908, on Corn Row Marker. Address O. Billingsley, East Cape Girardeau, Ill. Improved Bicycle Machinery of every description. The Garvin Machine Co., Spring and Varick Sts., N. Y. Concrete Houses—cheaper than brick, superior to stone. "Ransome," 757 Monadnock Block, Chicago.

If you have a quick-selling novelty, you ought to put it on the market. We will make it for you. Place & Terry, 247 Centre Street, New York.

Machinery manufacturers, attention! Concrete and mortar mixing mills. Exclusive rights for sale. "Ransome," 757 Monadnock Block, Chicago.

The celebrated "Hornsby-Akroyd" Patent Safety Oil Engine is built by the De La Verne Refrigerating Machine Company. Foot of East 138th Street, New York.

The best book for electricians and beginners in electricity is "Experimental Science," by Geo. M. Hopkins. By mail, 44. Munn & Co., publishers, 361 Broadway, N. Y.

Send for new and complete catalogue of Scientific and other Books for sale by Munn & Co., 361 Broadway, New York. Free on application.

Notes & Queries

HINTS TO CORRESPONDENTS. Names and Address must accompany all letters or no attention will be paid thereto. This is for our information and not for publication. References to former articles or answers should give date of paper and page or number of question. Inquiries not answered in reasonable time should be repeated; correspondents will bear in mind that some answers require not a little research, and, though we endeavor to reply to all either by letter or in this department, each must take his turn. Buyers wishing to purchase any article not advertised in our columns will be furnished with addresses of houses manufacturing or carrying the same. Special Written Information on matters of persons rather than general interest cannot be expected without remuneration. Scientific American Supplements referred to may be had at the office. Price 10 cents each. Books referred to promptly supplied on receipt of price. Minerals sent for examination should be distinctly marked or labeled.

(7227) J. R. asks: How many layers of No. 30 double-covered magnet wire shall I use to wind ring armature for dynamo core 4 1/2 in. in diameter, 4 in. long, with 2 1/4 in. hole, composed of 23 washers, with writing paper between, all turned true and bored out? It will take about 300 turns of wire for the first layer and a few more for the next ones. What size wire shall I use for field winding, the magnet waists being 5 1/2 in. long by 1 1/2 in. thick, composed of sheet iron bolted together and faced up smooth? I would like to run the machine in shunt or series, if it would be better. A. For the armature use 200 turns. The number in each coil will depend on the number of commutator bars. For the field use about 1,000 turns No. 26 wire, if shunt wound. We have assumed the voltage to be 110 and the speed to be 1,600 turns per minute.

(7228) P. M. N. says: Can you inform me if there is a process other than the chalk plate by which pen and ink drawings may be reproduced for newspaper work? If so, is it more complicated and expensive? I wish to find a way to make my newspaper cuts in the simplest, cheapest, and most expeditious manner, and desire to install the process in the office. Kindly let me know if there is any way of doing this, and oblige. A. We do not know of any process other than the chalk plate for producing cheap newspaper cuts. The process of photo-engraving is largely used by the New York daily papers. The effect is better than that of the chalk plate. It will be necessary to purchase some books on the subject, as Anderson's "Photo-Engraving," \$5; Schraubstadter's "Photo-Engraving and Copy of Photo-Engraving," \$3.25; Farquhar's "Grammar of Photo-Engraving," \$2; Jenkins' "Photo-Engraving," \$2, which we mail at the prices mentioned. SUPPLEMENT No. 720, mailed on receipt of 10 cents, contains formulas for working the chalk process.

(7229) F. B. H. writes: I am an old reader of your valuable paper, and I want to ask a few questions in regard to the eight light dynamo described in SUPPLEMENT, vol. xxiv, No. 600. My question is this: Can I double the drawings in every respect and get an operative machine? I mean one, if well constructed, that would answer as well as the eight light machine. If any changes are needful, please state what they are. Be sure to state size of wire for armature and field magnets, the winding being the same as in the eight light machine. Should I double the length and diameter of armature? To be short, if I were to double or multiply by 2 all the measurements given, would my machine be out of proportion? A. The sizes given in the drawings of the eight light dynamo can be doubled. This makes the machine 4 times as large. If it is wound with the same sizes and number of turns of wire as the original, it will have the same current in amperes, but 4 times the voltage. If the field is made larger, the armature should be increased in the same degree. Now, if you also use wires twice as thick, but have the same number of turns, the carrying capacity in amperes will be increased 4 times, and the total output of the machine will be 16 times as great. In place of No. 20 wires use No. 14 on armature. In place of No. 18 wire use No. 12 on field.

TO INVENTORS. An experience of nearly fifty years, and the preparation of more than one hundred thousand applications for patents at home and abroad, enable us to understand the laws and practice on both continents, and to possess unequalled facilities for procuring patents everywhere. A synopsis of the patent laws of the United States and all foreign countries may be had on application, and persons contemplating the securing of patents, either at home or abroad, are invited to write to this office for prices, which are low, in accordance with the times and our extensive facilities for conducting the business. Address MUNN & CO., office SCIENTIFIC AMERICAN, 361 Broadway, New York.

INDEX OF INVENTIONS

For which Letters Patent of the United States were Granted OCTOBER 26, 1897, AND EACH BEARING THAT DATE.

[See note at end of list about copies of these patents.]

Table listing inventions with names and patent numbers. Includes: Aerial machine, J. D. Graybill; Air brake, Westinghouse & Caldwell; Air compressor, F. M. Graham; Air engine, compressed, L. T. Gibbs; Alarm, See Fire alarm; Alarm device, automatic electric, P. V. Vander...

SPECIAL HISTORY CLUB For NOVEMBER

The purpose of the Club has been highly commended on all sides. One letter, which stands for many others, comes from the Hon. WM. T. HARRIS, LL.D., U. S. Commissioner of Education, Dr. Harris, after warmly praising the library itself, says:

LARGE CLEAR TYPE.

OUR CLUB has proved so popular and the Club price so convenient terms so attractive and satisfactory that the demand has exhausted our original edition of the

LIBRARY OF UNIVERSAL HISTORY.

We are gratified to announce that the publishers have consented to supply another edition (limited in number) which will be distributed to those who apply during November. The sets will be allotted in order of application, but in any event the Club will close November 30th and the price will be advanced.

BY SPECIAL ARRANGEMENT APPLICATIONS SHOULD BE SENT IN AT ONCE in order to participate in the distribution at the present very low price.

WHAT THIS GREAT WORK REALLY IS. The three great epochs, Ancient History, Medieval History and Modern History, naturally claim the principal portion of the Library, but Recent History also receives the attention its importance and interest demand, and the record of events is brought right down to the present year. The History of Civilization and The Philosophy of History are more fully treated than in any other work ever published in this country. The Illustrations, from the works of such great artists as Meissner, De Neuville, and Doré, are numerous and brilliant, marking the turning points of history, and The Historical Maps (there are nearly 100 of them) are more abundant and accurate than in any other work, native or foreign. In every one of those vital features which constitute a comprehensive, accurate, instructive and valuable history of the world the Library is incomparable. It is the Largest, Latest, Best.

TOPICS OF THE LIBRARY presents the only authentic history of "The Armenian Massacres," "The Alaskan Boundary Dispute," "The Transvaal Affair," "The Cuban Revolution," "The Revolt in Crete," together with the late history of every important nation, all illustrated and explained with a large number of new portraits, maps and diagrams.

SEE HOW LATE IT IS. Alaska is the subject of special treatment, which includes the history of the gold discoveries in the Klondike and other regions, with a new double-page map in four colors, from the latest U. S. Government and Canadian surveys and reports, showing the different routes to the gold fields, with photographic reproductions of scenes on the Yukon River.

WORDS OF PRAISE FROM THOSE WHO HAVE RECEIVED THE WORK.

Pres. E. Benjamin Andrews, of Brown University, says: "The educational value of the 'Library of Universal History' is sure to be very great." Ex-Pres. Cleveland writes: "This history will fill an important place among publications intended to give wider familiarity with historical literature." Dr. S. G. A. Brown, Shippensburg, Pa., writes: "My set arrived to-day. I am more than pleased with it. It should be in every home and public library in the land."

OUR CLUB controls for the benefit of its members exclusively, the desirable first edition of this splendid Library, and by arranging for the entire edition is enabled to supply the sets (while they last) in three styles of binding at a saving of about 50 per cent of the regular subscription price, according to the style selected, besides affording easy terms of payment. Those who enjoy the historical and biographical articles in the great magazines will thoroughly appreciate the superb Library of Universal History, and no teacher, student, member of a historical club or occasional reader, also text-books, should not investigate our club offer. The demand has been so great for these sets on the extremely favorable terms offered that the entire first edition has been exhausted, and a special limited edition arranged for, which will be distributed to those who apply during November. It is therefore advisable to write at once for full particulars regarding the work and the club plan and price. The club will also send you free an interesting set of specimen pages and illustrations, including full-page portraits of Herodotus, Franklin, and President McKinley and his Cabinet, smaller portraits of six great statesmen, also text-books, and a large folding map of Cuba, a new double-page map of Alaska, photographic scenes on the Yukon River, and a chart of the Klondike River and its tributaries. Address all communications to

McCLURE'S MAGAZINE HISTORY CLUB, 141 E. 25th Street, New York

WOOD or METAL WORKERS without steam power can save time and money by using our Foot and Hand Power Machinery SEND FOR CATALOGUES—A—Wood-working Machinery.—B—Lathes, etc. SENeca FALLS MFG. COMPANY, 685 Water St., Seneca Falls, N. Y.

THE COPYING PAD.—HOW TO MAKE and how to use; with an engraving. Practical directions how to prepare the gelatine pad, and also the aniline ink by which the copies are made, how to apply the written letter to the pad, how to take off copies of the letter. Contained in SCIENTIFIC AMERICAN SUPPLEMENT, No. 438. Price 10 cents. For sale at this office and by all newsdealers in all parts of the country.

Hollister, Stirrup, spring, Stone or ore crusher, Stool, coin controlled folding, Stove, oil heating, Stove safety plate, Stoves or furnaces, oil vaporizing attachment, Street sweeper, Sugar, extracting, Suspenders, Switch, See Automatic switch, Railway switch, Switchboard, multiple, Switch face plate, Table, Table arm, Linn & Lytle, Telegraph transmitter for ocean cables, Lynch.

WILLIAMS' SHAVING SOAPS. WILLIAMS' SOAPS are for sale everywhere, but if your dealer does not supply you, we mail them—to any address—postpaid on receipt of price. THE J. B. WILLIAMS CO. Glastonbury, Conn., U.S.A. LONDON, 64 Gt. Russell St. SYDNEY, 161 Clarence St.

"WOLVERINE" GAS AND GASOLINE ENGINES. Stationary and Marine. The "Wolverine" is the only reversible Marine Gas Engine on the market. It is the lightest engine for its power. Requires no licensed engineer. Absolutely safe. Manufactured by WOLVERINE MOTOR WORKS, 12 Huron Street, GRAND RAPIDS, MICH.

ALCO VAPOR LAUNCH. Motor controlled from bow. Valve movement, 12 to 1. 16 to 60 ft. Launches. Twin Screws a specialty. 1, 2, 3, 5, 7, 12, 14 and 20 H. P. No licensed engineer or pilot required. Speed and safety guaranteed. No dangerous Naptha or Gasoline used. No disagreeable vibration. Send 10 cents in stamps for 1897 Catalogue. Marine Vapor Engine Co., ft. Jersey Av., Jersey City, N. J.

ROTARY PUMPS AND ENGINES: Their Origin and Development.—An important series of papers giving a historical resume of the rotary pump and engine from 1588 and illustrated with clear drawings showing the construction of various forms of pumps and engines. 33 illustrations. Contained in SUPPLEMENTS 1109, 1110, 1111. Price 10 cents each. For sale by Munn & Co. and all newsdealers.

R. POOLE & SON CO. ENGINEERS AND MACHINISTS. BALTIMORE, MD. MANUFACTURERS AND DESIGNERS OF ALL KINDS OF HEAVY MACHINERY. REQUIRING FIRST CLASS WORKMANSHIP AND MATERIALS. FLY WHEELS, FRICTION CLUTCHES, PULLEYS, MACHINE MOLDED SHAFTING AND PLANED TURBINE WATER-WHEELS. CIRCULARS ON APPLICATION.

BALL BEARING AXLES AND RUBBER Tires.—A paper read before the Carriage Builders' National Convention, Philadelphia, October, 1894 showing the advantage to be derived from the use of ball bearings and pneumatic tires in road vehicles. Contained in SCIENTIFIC AMERICAN SUPPLEMENT, No. 1092. Price 10 cents. To be had at this office and from all newsdealers.

50 YEARS' EXPERIENCE. TRADE MARKS, DESIGNS, COPYRIGHTS &c. PATENTS. An yone sending a sketch and description may quickly ascertain our opinion free whether an invention is probably patentable. Communications strictly confidential. Handbook on Patents sent free. Oldest agency for securing patents. Patents taken through Munn & Co. receive special notice, without charge, in the Scientific American. A handsomely illustrated weekly. Largest circulation of any scientific journal. Terms, \$3 a year; four months, \$1. Sold by all newsdealers. MUNN & Co., 361 Broadway, New York. Branch Office, 625 F St., Washington, D. C.

MECHANICAL DRAWING and Surveying taught by mail. Terms very reasonable. Catalogue free. Black Corresp. School, Paterson, N. J.

Uncle Sam's Examinations. Will soon be held in every State for Clerks and Carriers in the Post Office Service, in which 3000 appointments were made last year! We have prepared hundreds of civil service examinations who received early appointments to Government Service. Fifth Year! Particulars as to salaries, dates, places of examinations, etc., free. National Correspondence Institute (Incorporated), 60, Second Nat'l Bank Building, Washington, D. C.

"INSTRUMENTS OF PRECISION." Architects', Engineers', Surveyors', and Draughtsmen's Supplies. Sole Agents for Riefler's Patent Drawing Instruments, and A. OTIS PANTOGRAPH and PLANIMETERS, etc. Large assortment of Mathematical Instruments and Materials for Schools and Colleges. Send for catalogue, Vol. III, 1152 Chestnut St., Phila., Pa. Branch Houses: ST. LOUIS and BALTIMORE.

The Picture Way

is the best way to a child's mind. A pretty or strange picture stays, where a verbal description slips away. In day school and Sunday school, a Stereopticon is the teacher's most efficient ally.
