To secure this protection, certain formalities have to be complied with, and the patentee must establish his right by filing duly certified copies of his period of modernization similar to that which has brought Japan into such prominence, and already we in the starting of new factories, such as spinning mills. The competition of British, German and Japanese manufacturers upon the Chinese market is very keen, and American exporters will do well to secure protection for inventions which otherwise might be con-

----TWO INTERESTING DISCOVERIES IN ITALY.

Two discoveries have just been made in Italy, one in Rome and one in Florence, which are of the utmost importance. Signor Marucci, the archæologist, has discovered an imposing wall painting in the Palace of 'Tiberius on the Palatine Hill. It is considered that this picture will prove an important addition to Christian history. The painting evidently represents the prepara tion for the crucifixion. Around the cross are soldiers bearing ladders and under each soldier is written his name. Among them will be found Pontius Pilate. The figures are $5\frac{9}{10}$ inches high. The inscription consists of fifteen lines, of which five have been deciphered. It contains the name "Christus." The Pope was immediately informed of the discovery, and Signor Marucci will shortly publish a monograph on his discovery. When all of the mediæval and modern buildings have been cleared off from the Palatine, it is probable that other important discoveries will be made.

A fresco by Ghirlandajoin the Orgnissanti Church, at Florence, has been discovered in the ancient Vespucci Chapel, which contains a portrait of Amerigo Vespucci. Students of art history have for a long time believed that the fresco was lost when the chapel was whitewashed in 1616, though it was perfectly well known that it had existed at one time. It is mentioned by Vasari, who says, "Domenico (Ghirlandajo) has portrayed the likeness of Amerigo Vespucci, who sailed to the Indies." A contemporaneous portrait of this important personage in the history of the discovery of the new world promises to be another one of the artistic sensations of Florence like that of Botticelli's "Pallas" two years ago.

THE SAFE DEPOSIT BUSINESS IN ANCIENT ROME.

We are inclined to consider that safe deposit vaults are entirely an invention of the nineteenth century, gion of the public granaries, an official advertisement was found for leasing a "horrea," or public granary, under the empire of Hadrian. The advertisement is given in Prof. Lanciani's interesting work, "Pagan and Christian Rome," as follows:

"To be let from to-day, and hereafter annually (beginning on December 13): These warehouses, belonging to the Emperor Hadrian, together with their granaries, wine cellars, strong boxes and repositories.

"The care and protection of the official watchmen is included in the lease.

"Regulations: I. Any one who rents rooms, vaults or strong boxes in this establishment is expected to pay the rent and vacate the place before December 13.

"II. Whoever disobeys regulation No. I, and omits to arrange with the horrearius (or keeper-in-chief) for for another year, the rent to be determined by the ave-The South African Republic (Transvaal) on October rage price paid by others for the same room, vault or

> "III. Subletting is not allowed. The administration will withdraw the watch and the guarantee from

> "IV. Merchandise or valuables stored in these warehouses are held by the administration as security for payment of rental.

> "V. The tenant will not be reimbursed by the administration for improvements, additions and other such work which he has undertaken on his own account.

> "VI. The tenant must give an assignment of his goods to the keeper-in-chief, who shall not be held responsible for the safe keeping of merchandise or valuables which have not been duly declared. The tenant must claim a receipt for the said assignment and for the payment of his rental."

> Many of the temples were also used for the keeping of money, jewels, plate, etc. Of course, the temples were constantly watched, and on this account were safe from thieves. Official weights and measures were also
