Difficult **Problem** Solved.

THE LUBRICATION OF GAS ENGINES.

The Burwell Automatic Oiler solves the problem so completely that it leaves nothing further to desire The oil is sprayed around the piston at every stroke. There is no waste or loss; the lubricant goes where it does the most good.

Speed regulated by throttle, same as steam engine.

Not affected by atmospheric conditions.

This engine specially adapted to launches.

We build engines and launches on the same standard of excellence as the Cleveland bicycle.
