

Rubber World, and coming in contact with rubber manufacturers has been able to get an invaluable collection of data. Every step in the manufacture of rubber from the time it leaves the tree is given in detail. All the by-products of rubber manufacture, compounds, etc., are given. It is a thoroughly satisfactory contribution to the technical literature of a much neglected subject.

"Public Improvements" is published semi-monthly at 21 Park Row, New York city. The subscription price is \$3 per annum.

TO INVENTORS.

An experience of fifty years, and the preparation of more than one hundred thousand applications for patents, home and abroad, enable us to understand the laws and practice on both continents, and to possess unequalled facilities for procuring patents everywhere. A synopsis of the patent laws of the United States and all foreign countries may be had on application, and persons contemplating making of patents, either at home or abroad, are invited to write to this office for prices, which are low, in accordance with the times and our extensive facilities for conducting the business. Address MUNN & CO., office SCIENTIFIC AMERICAN, 631 Broadway, New York.

Foreign Trade Marks FOR American Merchants.

It is not generally understood amongst merchants that in many foreign countries the first registrant of a Trade Mark becomes the legal owner of said Mark, even though he may not be the bona fide proprietor. Many American goods are copied by foreign competitors, who put inferior goods on the market and sell them under the American Trade Marks. If these imitators have secured registration for said Trade Mark, they become, in many foreign countries, the legal owners of the Mark, and it will not be possible for the real owners afterwards to procure protection for their Trade Marks. Great hardship often arises in this manner. The only way to prevent such a course is for the American merchant to register his Trade Marks in the countries with which he has commercial relations.

For full information concerning Foreign Trade Mark Registration, address
