## IF INTERESTED WRITE TO-DAY

President Eliot, of Harvard University, while addressing the graduating class, in part said:

"There is a subtle power lying latent in each one of you, which few have developed, but which, when developed, might make a man irresistible. It is called personal magnetism. I advise you to master it."

That the power referred to above lies latent in every person, and can be easily and quickly developed, are facts acknowledged by every student of the subject.

Hardly a day passes but what one reads of some astounding feat or wonderful cure performed by persons of well-developed magnetic power.

The New York Institute of Science has recently issued probably the most interesting, most valuable, and most important work on occult sciences ever before published. It is up-to-date in every particular. Its 100 pages are replete with facts, arguments and opinions of the world's greatest scientists and teachers. It is profusely illustrated, and should be read by every person at all interested in Mesmerism, Personal Magnetism and Mind Cultivation.

### IT'S FREE

for the asking. Write to-day. Address

## ROUND THE WORLD.

THE route 'round the world is across the American Continent, via New York and Niagara Falls, through the center of the richest country on the globe.

You will be convinced of this if you will examine the new "Round the World" folder just issued by the New York Central Lines.

A copy will be sent free, postpaid, on receipt of three cents in stamps, by **George H. Daniels,** General Passenger Agent, Grand Central Station, New York.

## READY SHORTLY. Gas Engine Construction

By **HENRY V. A. PARSELL, Jr.,** Mem. A. I. Elec. Eng., and **ARTHUR J. WEED, M. E.** **PROFUSELY ILLUSTRATED.** Price, \$2.50, postpaid.

This book treats of the subject more from the standpoint of practice than that of theory. The principles of operation of Gas Engines are clearly and simply described, and then the actual construction of a half-horse power engine is taken up.

First come directions for making the patterns; this is followed by all the details of the mechanical operations of finishing up and fitting the castings. It is profusely illustrated with beautiful engravings of the actual work in progress, showing the modes of chucking, turning, boring and finishing the parts in the lathe, and also plainly showing the lining up and erection of the engine.

**Dimensioned working drawings** give clearly the sizes and forms of the various details. The entire engine, with the exception of the flywheels, is designed to be made on a simple eight-inch lathe, with slide rests.

The book closes with a chapter on American practice in Gas Engine design and gives simple rules so that anyone can figure out the dimensions of similar engines of other powers.

Every illustration in this book is new and original, having been made expressly for this work. Large 8vo. About 300 pages. Send for Circular of Contents.

**MUNN & CO., Publishers,** **SCIENTIFIC AMERICAN OFFICE,** 361 Broadway, NEW YORK.
