is indispensable for the proper execution of particular kinds of work. Our 8-inch Precision Lathe is fitted for this and Gear Cutting. No extra belts are required as the friction gear at end of feed rod takes the place of a belt and cone feed and allows the feed to slip in case of work jambing. Variation of feeds allowed by use of change gears of lathe.

## Gas Engine

## Construction

HENRY V. A. PARSELL, Jr., Mem. A. I. Elec. Eng. and ARTHUR J. WEED, M. E. PROFUSELY ILLUSTRATED.

Price, \$2.50, postpaid.

Price, \$2.50, postpaid.

This book treats of the subject more from the standpoint of practice than that of theory. The principles of operation of Gas Engines are clearly and simply described, and then the actual construction of a half-horse power engine is taken up.

First come directions for making the patterns; this is followed by all the details of the mechanical operatio. So of finishing up and fitting the castings. It is profusely illustrated with beautiful engravings of the actual work in progress, showing the modes of chucking, turning, boring and finishing the parts in the lathe, and also plainly showing the lining up and erection of the engine. Dimensioned working drawings give clearly the sizes and forms of the various details. The entire engine, with the exception of the flywheels, is designed to be made on a simple eight-inch lathe, with slide rests.

The book closes with a chapter on American practice in Gas Engine design and gives simple rules so that anyone can figure out the dimentions of similar engines of other powers.

Every illustration in this book is new and original, having been made expressly for this work. Large Syo. About 300 pages.

In all walks of life these faculties measure the difference between success and failure. They are to be traced to one mental characteristic-PERSONAL MAGNETISM. It is this well-nigh undefinable something that makes a man irresistible, that enables him to compass all difficulties, to surmount all obstacles. It is this mental energy that causes him to surpass his fellow-men in the pursuit of fame, fortune, happiness. With the consciousness of the power of Personal Magnetism attained comes ability to make friends, inspire confidence, win affections. You can embrace opportunities, gain social position, achieve business success. You can become a great power for good in the community in which you live. "THE WONDERS OF PERSONAL MAG-NETISM AND HYPNOTISM" is the title of a scientific treatise which tells you precisely how to acquire this marvelous influence. It is a comprehensive work by the eminent authority. Dr. I.a Motte Sage, A.M., Ph.D., L.L.D., graphically written, profusely illustrated, admirably executed. It reveals wonderful secrets and contains startling surprises. It is free to you for the asking. This offer is absolute, genuine and without conditions.
