

adjusted laterally back above the fixed shelving, thus utilizing the space above the fixed shelving and permitting the movable shelving-section to be conveniently brought within reach.

TOOL-HOLDER.—GEORGE R. SHERWOOD, Kearney, Neb. A suitable framing, clamping devices acting in conjunction with a base-block and a crown-block, the outer surfaces of which are convex and the inner surfaces flat, permit the adjustment of the tool to any angle and enable it to be clamped between the block surfaces in any desired position.

GRAIN-CLEANER.—GEORGE L. BEADELL, Chicago, Ill. The cleaner comprises a box having a hopper at its upper end and containing a swinging binged rougher extending in an inclined position and discharging the coarse material through an opening in the casing to the outside.

Designs.

GAS-COCK.—ANDREW J. WIEGAND, Baltimore, Md. The design patent granted to Mr. Wiegand is for a self-lighting gas burner of novel design, having a main passage for the gas to the burner-tip, a perforated holder for platinum-sponge adjacent to the burner-tip, and a valve which controls the passage of gas to the main burner-tip or to the platinum-sponge so the gas may be ignited at the main tip from the platinum sponge and the passage of gas to the platinum-sponge will be cut off after the gas has been ignited at the burner-tip.

VIOLIN-BODY.—ELIZA A. R. KITCHEN, Monroe, Ohio. The violin has a body partly heart-shaped, partly star-shaped, and an anchor-shaped head.

NOTE.—Copies of any of these patents will be furnished by Munn & Co. for ten cents each. Please state the name of the patentee, title of the invention, and date of this paper.

NEW BOOKS ETC

PENROSE'S PICTORIAL ANNUAL. THE PROCESS YEAR BOOK FOR 1899. Edited by William Gamble. London: Penrose & Company. 1899. 8vo. Pp. 108.

Process reproductions have almost entirely displaced all other methods of reproducing pictures, and while much has been lost, much has also been gained. At present there does not seem to be any limitation to process work, and the results as outlined in this Annual are wonderful. Some of the half-tones are very remarkable, and the color work is scarcely less so.

AMERICAN ANNUAL OF PHOTOGRAPHY AND PHOTOGRAPHIC TIMES ALMANAC FOR 1900. New York: The Scoville & Adams Company. 1899. 8vo. Pp. 370. Illustrated. Paper 75 cents.

The present volume is ably edited by Mr. Walter E. Woodbury and is the fourteenth of the series. It is filled with valuable articles and it is profusely illustrated. It strikes us as being the best annual we have seen and no photographer can afford to be without it.

METAL AND PLATE WORK. Its Patterns and Their Geometry; also Notes on Metals and Rules of Mensuration for the Use of Tin, Iron and Zinc Plate Workers. Coppersmiths, etc. By Charles Millis, M.I.M.E. London and New York: Spon & Chamberlain. 1899. 12mo. Pp. 456. Price \$3.50.

This is an excellent book upon an eminently practical subject. Probably no trade requires such a comprehensive knowledge of geometry as metal plate work, and this book is calculated to give exactly the information which is needed by practical men. The methodical part of it is not neglected, but it is merged in the practical. It is an admirable book and is a complete treatise upon the subject.

STAR NAMES AND THEIR MEANINGS. By Richard Hinckley Allen. New York: G. E. Stechert. 1899. 8vo. Pp. 563. Price \$5.

This list of star names is published in the endeavor to fill an acknowledged vacancy in our astronomical literature. It is not intended for the professional astronomer, who, as a rule, cares little about the old designations of the objects of his study, yet great scholars have thought this nomenclature not unworthy of their attention. The author has accomplished a most difficult task with rare discrimination and success. The work is most scholarly and reflects the highest possible credit upon the learning of its author. Very few men could have written this book, which is most beautifully printed by the DeVinne Press. It will certainly tend to foster a more intelligent interest in the nomenclature of practical astronomy, and the author should be well pleased with the result of his arduous labors.

MATHEMATICS. New York: Doubleday & McClure Company. 1899. 12mo. Pp. 340. Price \$1 net.

This book is essentially practical, and is intended for young men and others who wish to obtain such a knowledge of mathematics as should be of service to them in their business as mechanics or engineers, and to obtain it by study at home. The bulk of the material was issued in The Chicago Record, and proved to be of the utmost interest and value. After a careful examination of the book, we are inclined to believe that the problems proposed are much more practical than in the stereotyped text-books of mathematics.

Business and Personal.

The charge for insertion under this head is One Dollar a line for each insertion; about eight words to a line. Advertisements must be received at publication office as early as Thursday morning to appear in the following week's issue.

Marine Iron Works. Chicago. Catalogue free. For hoisting engines. J. S. Mundy, Newark, N. J. "U. S." Metal Polish. Indianapolis. Samples free. Yankee Notions. Waterbury Button Co., Waterbury, Ct. Handle & Spoke Mch. Ober Mfg. Co., 10 Bell St., Chagrin Falls, O. Ferracute Machine Co., Bridgeton, N. J., U. S. A. Full line of Presses, Dies, and other Sheet Metal Machinery. Special and Automatic Machines built to drawings on contract. The Garvin Machine Co., 141 Varick St., N. Y. The celebrated "Hornsby-Akroyd" Patent Safety Oil Engine is built by the De La Verne Refrigerating Machine Company. Foot of East 138th Street, New York.

Notes & Queries

HINTS TO CORRESPONDENTS.

Names and Address must accompany all letters or no attention will be paid thereto. This is for our information and not for publication. References to former articles or answers should give date of paper and page or number of question. Inquiries not answered in reasonable time should be repeated: correspondents will bear in mind that some answers require not a little research, and though we endeavor to reply to all either by letter or in this department, each must take his turn. Buyers wishing to purchase any article not advertised in our columns will be furnished with addresses of houses manufacturing or carrying the same. Special Written Information on matters of personal rather than general interest cannot be expected without remuneration. Scientific American Supplements referred to may be had at the office. Price 10 cents each. Books referred to promptly supplied on receipt of price. Minerals sent for examination should be distinctly marked or labeled.

(7815) A. J. W. asks: Can you give me the formula for government whitewash? A. The following coating for rough brick walls is used by the United States government for painting lighthouses, and it effectually prevents moisture from striking through. Take of fresh Rosendale cement, 3 parts, and of clean fine sand, 1 part; mix with fresh water thoroughly. This gives a gray or granite color, dark or light, according to the color of the cement. If brick color is desired, add enough Venetian red to the mixture to produce the color. If a very light color is desired, lime may be used with the cement and sand. Care must be taken to have all the ingredients well mixed together. In applying the wash, the wall must be wet with clean fresh water; then follow immediately with the cement wash. This prevents the bricks from absorbing the water from the wash too rapidly, and gives time for the cement to set. The wash must be well stirred during the application. The mixture is to be made as thick as can be applied conveniently with a whitewash brush. It is admirably suited for brickwork, fences, etc., but it cannot be used to advantage over paint or whitewash.

(7816) J. K. asks: 1. How much wire and what size would be sufficient to wind the voltmeter described in SUPPLEMENT, No. 1215, to register no higher than 75 volts? A. The same winding may be used for reading to 75 volts as to 110 volts. The scale will be shorter for 75 volts. 2. How many gallons of nickel solution will the plating dynamo described in "Experimental Science" plate? A. The machine is not to be rated by gallons. It will plate small articles, whether in much or little liquid. 3. What is a receipt for nickel solution or how is it made? A. For solutions to be used in plating see Van Hornes Electro-Plating. Price \$1, by mail.

(7817) M. P. asks: What size wire should be wound on a dynamo, the armature of which is 2 inches in diameter and 4 inches long? The F. M. is 6 1/2 inches high and 4 inches wide? A. No definite answer can be given to a question of this sort. To answer it one should have measurements so that a correct and complete drawing of the machine could be made from them, not simply one or two dimensions. The best we can say is, use any number between 24 and 30. You will get something.

INDEX OF INVENTIONS For which Letters Patent of the United States were Issued for the Week Ending JANUARY 16, 1900.

AND EACH BEARING THAT DATE.

[See note at end of list about copies of these patents.]

- Acetylene generator, G. S. Bowers..... 641,431
Adding machine, J. E. Blacker..... 641,363
Agitator, E. C. Wheeler..... 641,419
Amalgamator, electric, H. Barrick..... 641,360

Advertisements.

ORDINARY RATES.

Inside Page, each insertion, - 75 cents a line
Back Page, each insertion, - \$1.00 a line
For some classes of advertisements, Special and Higher rates are required.
Be above are charges per agate line—about eight words per line. This notice shows the width of the line, and is set in agate type. Engravings may head advertisements at the same rate per agate line, by measurement, as the letter press. Advertisements must be received at Publication Office as early as Thursday morning to appear in the following week's issue.

Star Screw... cutting Lathes Automatic Cross feed 9 and 11-inch Swing. New and Original Features. Send for Catalogue B. Seneca Falls Mfg. Company, 695 Water St., Seneca Falls, N. Y.

ENGINE & FOOT MACHINE SHOP OUTFITS LATHES TOOLS AND SUPPLIES SEBASTIAN LATHE CO. PHILADELPHIA, PA.

Persistence Wins.

We do not advise you to change your business to succeed. Increase your knowledge rather than become "a rolling stone," and rise quickly to a high salaried position. We have sent thousands of young men and women to prosperity through EDUCATION BY MAIL. In Electrical, Mechanical, Steam, Mining and Civil Engineering; Metallurgy, Art, Architecture, Practical Newspaper Work, English Branches, Stenography, Machine Design and Mechanical Drawing. Low price; easy terms. Sent free to those who enroll now, a complete drawing outfit worth \$11.10, or other premiums. Mention subjects interested in when writing to The United Correspondence Schools, 154-56 58 Fifth Avenue, New York, for Catalogue No. 33.

Pipefitters!

Your kit is not complete unless it includes the famous STILLSON WRENCH which is particularly adapted for turning out the best work without crushing the pipe in the least. All parts are drop-forged. Once tried, it is always used. It has many imitations but no equals. See explanatory cuts. Price list on application to WALWORTH MANUFACTURING CO., 128 to 136 FEDERAL ST., BOSTON, MASS.

NEW BINOCULAR.

(The Triöder.) Small as an opera glass. More powerful than the largest field glass. Send for Circulars. QUEEN & CO. Optical and Scientific Instrument Works, 1010 Chestnut Street, NEW YORK: 59 Fifth Ave., PHILADELPHIA, PA.

BARNES' UPRIGHT DRILLS

Complete line, ranging from Light Friction Disk Drill to 42" Back Geared Self-Feed. Send for New Catalogue. W. F. & JOHN BARNES CO. 1999 Rugby Street, ROCKFORD, ILL.

NICKEL Electro-Plating Apparatus and Material. THE Hanson & VanWinkle Co., Newark, N. J. 136 Liberty St., N. Y. 30 & 32 S. Canal St. Chicago.

PLATING & DYNAMOS.

We manufacture a full line of Plating Dynamos. The accompanying cut represents our smallest size Type K O, which has an output of 18 amperes at 4 volts. It will plate 15 sq. ft. of nickel per hour. Our larger sizes—multipolar machines—are built with the same thoroughness and attention to detail that characterize the construction of our motors and dynamos. Send for Bulletin No. 104 S. THE HOLTZER-CABOT ELECTRIC CO., Boston, (Brookline), Mass.

"Universal" Kneading and Mixing Machines

Over 6200 in use. Over 300 varieties in 155 different industries. Patented in all countries. WERNER & PFLEIDERER Saginaw, Mich. Builders of all kinds of Chemical Machinery, also at Cannstatt, London, Vienna, Berlin, Paris and Moscow. 88 Highest International Awards

Manufacturers' Models

of every description made to order with promptness, precision and economy. Models of Typewriters, Typewriting Machines, Cash Registers, Cyclometers, Revolution Counters, etc., in fact, any kind of model made from designs. Also special tools and machinery for any and every purpose. Correspondence invited from those intending to equip a plant. Illustrated circular free.

The Pratt & Whitney Co., Hartford, Conn.

You spend thousands on coal bills—but how much to save the steam? Want to know more about it?—Ask for our booklet "H" on the HEINTZ STEAM TRAP. WILLIAM S. HAINES CO., 136 South Fourth St., Philadelphia, Pa.
