We make a specialty of gilt-edged Mining Stocks in such properties only as we have thoroughly investigated with our own experts, and can recommend to our customers as being

### LEGITIMATE ENTERPRISES

conducted on business principles; namely: working mines, developed properties and dividend payers. We have yet to make our first mistake, and our customers are receiving dividends of from 1 to 3 per cent. monthly on such mining stocks as we have thus far handled as fiscal agents, in addition to large profits in the selling value of the principal invested.

## \$800 PROFIT ON EACH \$100

invested is the record of 14 new mines opened last year, the lowest showing \$100 profit and the highest \$2,400, the average of the 14 being over \$300 net profit on \$100 invested in their stocks. No investment offers greater opportunities for unusual profits than mining legitimately conducted as a business on a business basis and not as a stock speculation.

The 15th and 25th of each month regularly are

## THE TWO DIVIDEND DAYS,

for the several selected mining investments we handle as exclusive Fiscal Agents and orders must reach us prior to these dates to secure the current monthly dividends.

Send for our new booklets of dividend payers and full particulars of high interest-bearing, absolutely safe investments.
