

Business and Personal.

Marine Iron Works. Chicago. Catalogue free. For logging engines. J. S. Mundy, Newark, N. J. "U. S." Metal Polish. Indianapolis. Samples free. Yankee Notions. Waterbury Button Co., Waterbury, Ct. Handle & Spoke Mchry. Ober Mfg. Co., 10 Bell St., Chagrin Falls, O. Book "Dies and Die-making," \$1. postpaid. J. L. Lucas, Bridgeport, Ct. Send for index sheet. Gear Cutting of every description accurately done. The Garvin Machine Co., Spring and Varick Sts., N. Y. Free Samples of Secotine. It sticks everything, even iron. Geo. Quail, 366 Broadway N. Y. Agent for U. S. The celebrated "Hornsby-Akroyd" Patent Safety Oil Engine is built by the De La Vergne Refrigerating Machine Company. Foot of East 138th Street, New York. The best book for electricians and beginners in electricity is "Experimental Science," by Geo. M. Hopkins. By mail, \$4. Munn & Co., publishers, 361 Broadway, N. Y. Send for new and complete catalogue of Scientific and other Books for sale by Munn & Co., 361 Broadway, New York. Free on application.

Notes & Queries

HINTS TO CORRESPONDENTS.

Names and Address must accompany all letters or no attention will be paid thereto. This is for our information and not for publication. References to former articles or answers should give date of paper and page or number of question. Inquiries not answered in reasonable time should be repeated; correspondents will bear in mind that some answers require not a little research, and, though we endeavor to reply to all either by letter or in this department, each must take his turn. Buyers wishing to purchase any article not advertised in our columns will be furnished with addresses of houses manufacturing or carrying the same. Special Written Information on matters of personal rather than general interest cannot be expected without remuneration. Scientific American Supplements referred to may be had at the office. Price 10 cents each. Books referred to promptly supplied on receipt of price. Minerals sent for examination should be distinctly marked or labeled.

(7996) R. S. A. asks: Which will run the "simple electric motor" the most number of (clock) hours - a battery of 16 volts and 4 amperes, or a battery of the same voltage and 40 amperes? Also, how does an ampere-hour correspond with the clock-hour? A. The battery with 40 amperes of current will last ten times as long as one of 4 amperes, if the current is drawn out of each at the rate of 4 amperes per hour. An hour is the same for clock or battery. An ampere-hour is a current of 1 ampere of electricity flowing for one hour. The idea is just the same as when we speak of water flowing through a 1-inch pipe for an hour; a fixed quantity will flow through in one hour. The quantity of water which can flow through a pipe is controlled both by the size and the length of the pipe; so the amperes are controlled by both the size and length of the wire which carries the current.

(7997) C. C. writes: Could you state about what would be the total cost of the "Simple Steam Engine" shown on page 314 of your issue of November 17? How much over has it? I am interested in this little machine and would be pleased if you could furnish me with the information. A. This simple engine to which you refer has only a fraction of a horse power, but of course one of almost any power could be made on the same plan. The materials for the small one including boiler would cost three or four dollars. The cost of materials for a larger one would depend of course upon the size.

(7998) H. C. C. writes: In the article on "The Electric Chime," I do not quite catch the portion relating to the cam and lever. And will you describe a little more fully how made, what made of, and how connected to the wire. A. The cam is made of two plates of brass, one sawed out to form the double groove and soldered to the other. The lever simply makes a connection between the two springs when the cam pushes it between them.

(7999) W. & Co. ask: Would the mandrel-drawn steel tubing mentioned in a recent article in your paper be suitable, without boring, for steam cylinders up to a diameter of, say, two inches? A. The cold-drawn steel tubing is true and suitable for small steam cylinders.

(8000) G. G. P. asks: Has there ever been a relay or repeater for the telephone invented by any one? If so, will you please give a general description of it, so that the principle upon which it works may be understood by your readers. A. Yes, there have been several invented. The idea is to connect the receiver of one line to the transmitting microphone of another, so that the message as it is received shall be immediately transmitted along the second line. Miller, "American Telephone Practice," price \$3 by mail, has a chapter on this topic, giving the various methods by which it has been attempted to accomplish this very desirable object. Of the relay Miller says: "It has not shown its ability to transmit speech between two distant points any better than or quite as well as could be done by direct transmission without the use of the relay at all." That is the condition of the problem to-day.

(8001) J. C. H. asks: What fluid is used in Edison-Lalande battery? A. The fluid is caustic soda or caustic potash, 30 or 40 parts in 100 of water.

(8002) E. H. asks how to make a dry battery to run a small motor? A. The plates of a dry cell are zinc and carbon as in all Leclanche cells. The dry cell is a Leclanche cell with some porous material in which the liquid is held absorbed so that it will not run out. The liquid may be only a solution of sal ammoniac. The absorbent may be plaster of Paris, mixed with something to make it more porous. In some cells this is oxide of zinc. Most of the dry cells are made by secret formulas. The cell itself is made of zinc. The carbon usually oc-

cupes at least half of the space in the cell. One formula is said to be: oxide of zinc, 1 part; sal ammoniac, 1 part; plaster, 3 parts; chloride of zinc, 1 part; water, 2 parts; all by weight.

(8003) L. F. asks: What is the candle power of ordinary coal oil lamps having wicks 3/4, 1, 1 1/4 and 1 3/4 inches wide, and a student lamp, having a wick 3/4 inches in circumference? A. The candle power of these wicks varies greatly in different burners. The only way to proceed is to measure each lamp when it is in its best condition. The results will be from 5 to 50 or perhaps more candles. Nearly every text book of physics describes the method of measuring candle power. Avery's "School Physics," price \$1.40 by mail, is a good guide in the experiment.

(8004) P. S. asks: I would like to make a dynamo out of the "Simple Electric Motor" described in Experimental Science (page 497). How many volts and amperes can I expect from it? How many incandescent lamps, and what candle power? When would as a dynamo, can I use it as a motor? Have you a SCIENTIFIC AMERICAN SUPPLEMENT describing a dynamo and motor that will light some incandescent lamps and is very simple and easy to make, as I have not very many tools? A. 1. The simple electric motor is a dynamo if it be driven by an engine. Every dynamo is a motor when electric current is sent through it, and every direct current motor is a dynamo when driven by power. It will give nearly the same current as is used to drive it, and will light a few small incandescent lamps. 2. The simple electric motor is the easiest to build without a machine shop. The dynamo described in SUPPLEMENT, No. 600, is able to light eight 16 candle power lamps of 50 volts.

(8005) P. D. B. asks: Will you please publish a recipe for making batteries to be used upon a gasoline motor bicycle? A. A good dry battery is best adapted to igniting the vapor in a gasoline engine. These can be purchased much cheaper than they can be made. Their construction can be learned from Carhart's Primary Batteries, price \$1.50 by mail. A storage cell is described in SCIENTIFIC AMERICAN SUPPLEMENT, No. 792, and the Electric Ignition of Gas Engines is the subject of a valuable article in SUPPLEMENT 1281.

(8006) H. G. V. L. asks: 1. Which is the best for X-ray screens—barium platino-cyanide or tungstate of calcium? A. Barium platino-cyanide is better for fluorescent screens than calcium tungstate; by some it is pronounced to be 75 per cent better. Its chief point of superiority is that it does not retain its glow so long after the rays have ceased to strike it as calcium tungstate does. 2. Where can barium platino-cyanide be had, and what quantity would be needed to make a screen say 8 by 10 inches? A. Either of these substances can be had from dealers in X-ray apparatus. See our advertising columns. The dealer will tell you what quantity to use per square inch. 3. Have an actinometer with scale from 0° to 80°. Do not know how to get the specific gravity, say sulphuric acid 1.82, or sulphuric acid and water, for electrolytic breakers or batteries? A. Put your actinometer in sulphuric acid of known density, or in a mixture of the proper proportions, and observe the reading. Afterward it will only be necessary to bring the fluid to the density which will support the actinometer at the same mark.

(8007) McK. asks: Why are our prevailing winds westerly? The earth's revolution would naturally cause the winds to blow in the opposite direction. A. The prevailing winds of your part of the world are westerly because you live in the zone of the anti-trade winds, which prevail from 30° to 60° north and south latitude. Winds are not caused by the earth's rotation on its axis. They are modified in their direction by that rotation. They are caused by the heat of the sun. The subject is too extensive for treatment in a note. The reader is referred to Walden's "Elementary Meteorology," price \$1.75 by mail; and for a complete presentation of the subject to Ferrell's "Treatise on the Winds," price \$4 by mail.

TO INVENTORS.

An experience of over fifty years, and the preparation of more than one hundred thousand applications for patents at home and abroad, enable us to understand the laws and practice on both continents, and to possess unequalled facilities for procuring patents everywhere. A synopsis of the patent laws of the United States and all foreign countries may be had on application, and persons contemplating the securing of patents, either at home or abroad, are invited to write to this office for prices, which are low, in accordance with the times and our extensive facilities for conducting the business. Address MUNN & CO., office SCIENTIFIC AMERICAN, 361 Broadway, New York.

INDEX OF INVENTIONS

For which Letters Patent of the United States were Issued for the Week Ending

DECEMBER 4, 1900,

AND EACH BEARING THAT DATE.

[See note at end of list about copies of these patents.]

Table listing inventions with names and patent numbers. Includes items like 'Acid and making same, galloxyanin sulfonic', 'Air compressor, H. Lietheberger', 'Alarm, See Burglar alarm, Low water alarm', 'Alloys, making aluminum, L. Mach', 'Alloys of aluminum and magnesium, manufacture of, L. Mach', 'Alumina, making, C. M. Hall', 'Anchor mechanism for boats, M. P. Hoy', 'Animal holder, J. P. Payton', 'Anti-incrustation compound, J. H. McMaken', 'Arm rest, F. Ritter', 'Armature space block, H. Geisenhoner', 'Axle box, B. S. E. Takken', 'Bag, See Fruit gathering bag, Mail bag', 'Battery, See D. R. Crippen', 'Bean picker, G. E. Crippen', 'Bearing thrust, J. H. Fleming'.

Table listing inventions with names and patent numbers. Includes items like 'Bed bottom, J. Hoey', 'Bed bottom attachment, J. Hoey', 'Bed, C. C. Smith', 'Bever, C. G. Carpenter', 'Bicycle brake, A. H. Nield', 'Bicycle stand, W. H. Hart, Jr.', 'Billiard and pool table, convertible, F. X. Ganter', 'Boat launching device, life, W. J. Kennedy', 'Boat, life, M. P. Hoy', 'Boat, life, M. P. Hoy', 'Boiler, See Sectional boiler, Steam boiler', 'Boiler crown bar, steam, E. Clay', 'Boiler gas regulator, steam, W. H. Downing', 'Boilermaker's spacer, C. J. Wangler', 'Boot or shoe, M. Hallinan', 'Bottle filling device, J. Straube', 'Bottle, non-refillable, J. A. Foster', 'Bottle, non-refillable, Kendrick & Wiley', 'Bottle stopper, D. T. Phillips', 'Box, See Feed box, Paper box', 'Box making machine, W. S. Doig', 'Boxing gloves, appling, T. Morgan', 'Bracket, See Lamp bracket', 'Brake, See Bicycle brake', 'Branding iron, W. B. Dudley', 'Branding or tattooing apparatus, Wright & Mitchell', 'Brush, J. B. Sturges', 'Brush, shaving, Samson & Levi', 'Buckle and cockeye, D. E. Stoneburner', 'Building construction, J. C. Pelton', 'Bunk and bung bushing, G. Staiger', 'Bunion or corn shield, J. J. Georges', 'Burglar alarm, W. H. C. Jewell', 'Burner, See Gas burner, Hydrocarbon burner, Vapor burner', 'Burner, W. R. Jeavons', 'Button and button fastener, A. Alliger', 'Button and necktie holder, collar, Whetsel & Bradley', 'Cabinet, Kitcher, L. Arnold', 'Calendar, F. B. Moeller', 'Call box return signal device, J. S. & H. M. Robinson', 'Camera, photographic, Wright & Gooding', 'Can, D. D. B. Smith', 'Can numberer, M. G. S. Steeper', 'Candles, dipping frame for coating, P. Panoulas', 'Car, baggage, J. R. Wood', 'Car buffing device, railway, J. A. Hinson', 'Car coupling, C. E. Paulson', 'Car door operating mechanism, G. I. King', 'Car door, J. G. Gommell', 'Car, etc., dumping, L. L. Vansant', 'Car fender, D. C. Wallace', 'Car journal box bearing, J. M. Hopkins', 'Car life guard, tram, W. T. Watson', 'Car loading machine, railway, J. L. Brannon et al.', 'Car wheels, manufacturing, F. A. Wheeler', 'Carpenter's tool, E. M. Hembree', 'Cart, T. Hill', 'Carton or box, H. G. Roth', 'Case, See Clear moistening case', 'Caster, ball, H. F. Fisher', 'Cattle guard, G. L. Summers', 'Celluloid, solvent material for treating surfaces of, A. N. Pettit', 'Chain, drive, E. F. Morse', 'Chainlink machine, C. Stanbon', 'Checkered paper, B. H. Leighton', 'Cheese cutter, H. G. Roth', 'Cheese sampling tube, H. G. Roth', 'Chlorin, making, P. Naef', 'Chlorin making apparatus, P. Naef', 'Chuck, J. Blamire', 'Chuck mechanism for automatic cutting machine, W. Brown, Jr.', 'Chuck, counterbalanced, L. J. Anderson', 'Cigar, J. W. Coughtry', 'Cigar moistening case, J. T. Davey', 'Cigar molds, ordering book or card for, E. F. Du Brui', 'Cigarette making machine, G. A. Jasmaziz', 'Circuit breaker, automatic magnetic, W. M. Scott', 'Circuit protector, A. Stromberg', 'Clamp, T. F. Harris', 'Clamp, W. W. Baker & Croft', 'Claw forming die, Walker & Croft', 'Cleaning and painting or treating surfaces submerged in water, means for, D. Mason', 'Clip, See Trolley wire clip', 'Clock chime, H. H. Mayland', 'Clock repeating mechanism, Bailey & Parkinson', 'Clock, electric, C. H. H. H. H.', 'Coatings, apparatus for applying, C. K. Britton', 'Cock, ball, F. Jewett', 'Coin holder, T. O. Miller', 'Collar, horse, Fry & Barnes', 'Combustion, apparatus for producing, L. D. Deane', 'Confinement mantle, A. Jaks', 'Conveyer, J. W. Barney', 'Copying press, roller, Tobey & Don', 'Corn conveyer, W. C. Horine', 'Coselet cover, R. L. Young', 'Coselet cover, R. L. Young', 'Coupling, See Air brake coupling, Car coupling, Thrill coupling', 'Coupling device, W. B. Cannon', 'Covered nail, G. W. Tucker', 'Crane, H. B. Todd', 'Cream separator, centrifugal, J. J. Berrigan', 'Culinary utensil, S. D. & M. G. Phelan', 'Cuspidor, C. C. Finlayson', 'Cut-off, automatic rain water, J. Haering', 'Cut-out, ceiling, W. A. Churech', 'Cutter, rotary, E. F. H. H. H.', 'Cutter, See Cheese cutter, Mold cutter', 'Cylinder reboring apparatus, J. A. Wahlgren', 'Delivery mechanism, S. Wheeler', 'Dental chairs, supporting and elevating mechanism for, B. M. Wilkerson', 'Dental dam, N. Kusan', 'Dental elevator, X. Dode', 'Dental handpiece, H. B. Mitchell', 'Derrick, portable, W. Baptist', 'Die, See Clay forming die', 'Dish washing machine, C. G. Read', 'Displaying apparatus, photograph, M. Barr', 'Door, door, H. B. Kolb', 'Door fastener, B. C. Mitchell', 'Door, warehouse, W. A. Cross', 'Dough mixer, J. McLaughlin', 'Draft equalizer, G. A. Beltz', 'Drinking instrument, S. Cox', 'Drill press, C. J. Weinman', 'Dry battery, E. Meyer', 'Dyeing apparatus, F. L. Zeman', 'Dyeing coal tar colors, Guzikow & Homolka', 'Dyeing machine, H. W. Churech', 'Educational device, T. L. Martin', 'Egg holder, T. N. T. Thomson', 'Electric current indicator, H. M. Warren', 'Electric heater, J. E. Brown', 'Electric meter, T. A. Edison', 'Electric motors, means for starting or stopping, J. J. Wood', 'Electric or electromagnet waves of high frequency, controlling mechanism by means of, Wilson & Evans', 'Electric traction apparatus, H. Dolter', 'Electric apparatus for controlling signal or other circuits, H. A. Parrish', 'Elevator, J. Bush', 'Elevator safety gate, Hitz & Blaker', 'Engine, See Explosion engine, Gas engine, Revolving cylinder engine', 'Engine cab, traction, G. F. Conner', 'Engine regulator, traction, G. F. Conner', 'Engines, electric igniter for explosive, M. S. Napier', 'Engraving machine, C. H. Field', 'Envelope and envelop fastener, W. O. Brown, Jr.', 'Envelope, partitioned duplex, F. A. Walter', 'Explosion engine, F. L. B. H.', 'Explosion engine, H. W. Struss', 'Explosives, making, A. C. Girard', 'Eyelet bole machine, C. L. Nutter', 'Fayel gate, P. Barden', 'Faucet, beer, J. B. Borden', 'Faucet, measuring, G. Sparrow', 'Feed box, R. B. Jarvis', 'Fender, See Car fender', 'Fibrous material and product thereof, manufacturing solid substances from, W. Gellinek', 'Filter, W. B. Brown', 'Filter, pocket, M. Hamilton', 'Fire alarm telegraph apparatus, W. H. Kirnan', 'Fireproof folder, E. J. Duryea', 'Fireproof construction, W. White', 'Fireproof floor construction, C. F. Buente', 'Flat iron heater and holder, A. von Chibor', 'Flat iron holder and heater with gas generating attachment, A. von Chibor', 'Fluid motor, I. H. Spencer', 'Folding table, H. L. Haskell', 'Freezers, cream and finger guard for, H. H. Turner', 'Fruit gathering bag, G. W. Borden', 'Fruit pitting machine, O. M. Wolf', 'Furnace, See Galvanizing furnace, Hot air furnace, Smoke preventing furnace', 'Furnace, F. J. Foveaux', 'Furnace for preventing smoke and economizing fuel, E. F. Foveaux', 'Gage, See No. 683, Tack gage', 'Galvanizing furnace, M. B. Lynch', 'Game apparatus, A. M. Duttweiler', 'Game, billiard, Lawrence & Philbrick', 'Game board, A. C. Fuld', 'Game board, J. N. Whitman', 'Game coin controlled race, J. Dunton', 'Garment hanger, A. Boucher', 'Garment hanger, L. A. Farham', 'Gas apparatus, acetylene, W. H. McGoldrick', 'Gas burner, acetylene, J. W. Bray', 'Gas engine, A. D. Garretson', 'Gas generator, acetylene, W. F. Anson', 'Gas generator, acetylene, C. M. Bridges', 'Gas generator, acetylene, W. Hinge', 'Gas generator, acetylene, W. Remington', 'Gas generator, acetylene, A. F. Shriver', 'Gas generator, acetylene, J. Walton', 'Gas generator, acetylene, A. Wermann-Hauser', 'Gas making apparatus, R. M. Dixon', 'Gas producer, E. J. Duff', 'Gas regulator, C. Jacobson', 'Gas retort discharging machinery, G. A. Bronder', 'Gasket and gasket securing mechanism, R. M. Dix', 'Gate, See Elevator safety gate, Farm gate', 'Gate, J. B. Haines', 'Gate, G. Shine', 'Gate, W. S. Witten', 'Gear, reversing, Tuck & Wassmann', 'Glass cutting machine, C. Dugan', 'Glassware articles, machine for finishing, A. H. Heisey', 'Gold extracting machine, G. Webster', 'Gold pan, D. B. Newkirk', 'Governor attachment, high-speed, Loeper & Hausdorfer', 'Governor for explosive engines, speed, J. & B. Millot', 'Governor for explosive engines, speed, E. F. Stewart', 'Governor, static, B. V. Nordberg', 'Grate, H. Wilson', 'Grate bar, M. G. S. Steeper', 'Gravel separator, A. Beargeon', 'Grinder for sickles of mowers, reapers, etc., E. A. Johnston', 'Guns, ammunition conveyer or rammer for, G. A. Schoeller', 'Hair fastener, H. B. Taylor', 'Hammer, pneumatic, D. S. Waugh', 'Handle bar, J. T. McGuire', 'Harrow, H. J. Case', 'Harrow, disk, S. S. Sims', 'Hat fastener, M. Clausen', 'Hat sweat, V. H. Foreman & Westerman', 'Hay rake, C. O. Mason', 'Header or harvester finger guard bar, G. T. Willis', 'Hearing tube, R. A. Price', 'Hot water heater, Water heater', 'Hide working cylinder, N. Leidgen', 'Hinge, C. G. Deering', 'Hoist or lift, B. Tucker', 'Horseshoe, nailless, J. F. Rupert', 'Hose attachment for stopping flow, G. E. McClelland', 'Hose spanner and tongs, D. Hentz', 'Hose washer, H. Kress', 'Hot air furnace, J. H. Montgomery', 'Hot water heater, G. Strong', 'Hub and axle, elastic, F. Schmitz', 'Hub and spigot pipe and joint, R. Boeklen', 'Hub, vehicle, F. F. Stowe', 'Hydraulic motor, G. Gommell', 'Hydrocarbon burner, W. R. Jeavons', 'Hydrocarbon, liquid, Taylor & Ray', 'Ice cream packing and shipping can, multiplex, S. Goldsmith', 'Iron, See Branding iron, Sad iron', 'Ironing board, E. H. Holder', 'Ironing table, Wren & Grant', 'Jar, See Metal jar', 'Jar capping machine, E. S. Young', 'Jar closure, F. M. Weir', 'Joint, See Rail joint, Railway rail joint', 'Knife, See Putty knife', 'Knife switch, Wright', 'Lacing books, gang machine for setting, L. A. McGrath', 'Ladder, step, W. L. Glidden', 'Ladder, step, C. Rivers', 'Lame brake, W. J. Frost', 'Lamp cover, H. S. Foreman & Westerman', 'Lamp, electric arc, Gilbert & Lundin', 'Lamp, electric arc, Johnson & Wunderlich', 'Lamp, electric arc, O. N. Wiswell', 'Lamp, electric arc, J. J. Wood', 'Lamp, petroleum, M. Gervais', 'Lamps, incandescent, body for electric glow, A. Just', 'Lampblack making apparatus, P. F. Reardon', 'Land clearing implement, T. E. Kirk', 'Landing machine, H. H. Denovan', 'Lash attachment, automatic, J. B. Clyne', 'Lawn sprinkler, H. S. Foreman & Westerman', 'Level, spirit, J. H. Van Luvan', 'Leveling, plumbing, and angle measuring instrument, J. S. Bogardus', 'Life preserver, H. C. Lavery', 'Liquid separator, centrifugal, J. J. Berrigan', 'Liquid separators, device for assembling or disassembling the parts of centrifugal, J. J. Berrigan', 'Lock, See Mail bag lock, Sash lock, Seal lock', 'Loom, R. Crompton', 'Loom, C. N. Newcomb', 'Loom picker, Forques & Lavioie', 'Loom shuttle check, Tubby & Broomhead', 'Low water alarm, J. E. McKay', 'Lumber, making artificial, J. A. Wheeler', 'Lye from the exterior of lye containing cans, machine for cleaning, F. Warning', 'Machinery disconnecting apparatus, A. Mau', 'Magnetic separator, F. Theilengerdes', 'Mail bag lock, W. R. Gordon', 'Mail bag or pouch, J. B. May', 'Mail crane hook, N. McQueen', 'Mantle support, J. Loeb', 'Map, clear, H. S. Foreman & Westerman', 'Marine motor, A. T. Otto', 'Match composition, S. A. Rosenthal', 'Measurements, instrument for determining, C. F. Schmelz', 'Meats, preserving, F. W. Bright (reissue)', 'Metal jar, A. Neumann', 'Metal jar, seamless, A. R. Piper', 'Metal sheets, straightening, J. F. Budke', 'Meter, See Electric meter', 'Mill, See Windmill', 'Mining shafts or tunnels, awning for, B. B. Wheeler', 'Mixer, See Dough mixer', 'Mixing machine, C. G. Schmidt', 'Mold cutter, W. H. Ford', 'Molds for rings, etc., apparatus for making, W. H. Ford', 'Monotypewriter, M. Rogers', 'Motor, See Fluid motor, Hydraulic motor, Marine motor, Rotary motor, Spring motor, Wind motor', 'Mowing machine, J. I. Newburg', 'Musical instrument tone finder, stringed, C. E. Kopp', 'Mural, J. C. Todd', 'Nail, See Covered nail', 'Napkin ring and holder, combined, Brown & Calhoun', 'Necktie fastener, C. Reynolds', 'Necktie rest, T. E. Wolf', 'Noodle or dumpling cutting device, Denney & Silvers', 'Nose gage, A. M. Frankel', 'Nut or pipe wrench, W. S. Armstrong', 'Nut, sectional, W. C. Wrensch', 'Nut tapping machine, A. H. Riggs', 'Nuts, bleaching, D. D. C. C.', 'Oven shelf, E. C. Macartney', 'Pail, milk, A. G. Brugger', 'Pails, etc., apparatus for making, R. C. Hill', 'Painting metal surfaces, R. Kopp', 'Pan, See Evaporating pan, Gold pan', 'Paper box, T. L. Neumann', 'Paper box, C. G. Shipley, Jr.', 'Paper box, G. E. Simon', 'Pen inking device, draughtsman's, H. W. H. Powell', 'Photograph, E. Myers', 'Piano player automatic, E. M. Skinner', 'Piano playing action, pneumatic, J. W. Crooks', 'Picker, See Bean picker', 'Picture trimming guide, P. E. Stevens', 'Pin, See Safety pin', 'Pipe or bar dipping apparatus, H. B. Lynch', 'Planter, automatic, C. L. Burt', 'Planter, corr. L. L. Buck', 'Plow, W. H. Langhill', 'Plow, W. R. Oyer', 'Plow, N. Sanders', 'Plumber's tag or clamp stay, H. H. & G. V. Hibberd'.

Table listing inventions with names and patent numbers. Includes items like 'Furnace, F. J. Foveaux', 'Furnace for preventing smoke and economizing fuel, E. F. Foveaux', 'Gage, See No. 683, Tack gage', 'Galvanizing furnace, M. B. Lynch', 'Game apparatus, A. M. Duttweiler', 'Game, billiard, Lawrence & Philbrick', 'Game board, A. C. Fuld', 'Game board, J. N. Whitman', 'Game coin controlled race, J. Dunton', 'Garment hanger, A. Boucher', 'Garment hanger, L. A. Farham', 'Gas apparatus, acetylene, W. H. McGoldrick', 'Gas burner, acetylene, J. W. Bray', 'Gas engine, A. D. Garretson', 'Gas generator, acetylene, W. F. Anson', 'Gas generator, acetylene, C. M. Bridges', 'Gas generator, acetylene, W. Hinge', 'Gas generator, acetylene, W. Remington', 'Gas generator, acetylene, A. F. Shriver', 'Gas generator, acetylene, J. Walton', 'Gas generator, acetylene, A. Wermann-Hauser', 'Gas making apparatus, R. M. Dixon', 'Gas producer, E. J. Duff', 'Gas regulator, C. Jacobson', 'Gas retort discharging machinery, G. A. Bronder', 'Gasket and gasket securing mechanism, R. M. Dix', 'Gate, See Elevator safety gate, Farm gate', 'Gate, J. B.
