PATENT RIGHTS FOR SALE.

I have invented, patented and own a device to supersede all previous collars for machinery shafting on account of its superior safety, simplicity and security. The collar has no set screw which often projects and causes accidents, no countersunk screw to weaken the collar. The "Fleming" Collar is simple in construction—made in four pieces to clamp around the shaft and can be put on or taken off without removing other parts of the machinery. It thus saves ten times its cost in time and labor. It can be manufactured as cheaply as any collar now on the market. It is a blending of safety, simplicity and security, and only needs to be introduced to become universally used. It cannot slip at all and has a grip on the shafting the full surface of its circumference. I want to sell the patent rights. Apply to **W. H. DAVIS, P. O. Box 305, Montreal, Can.**
