\$1 YEARLY FOR REPAIRS.

It has been found that it costs a trifle less than \$1 per year to keep our **Motoring Engines** in repair. That speaks well for their superior make and durability, doesn't it? There is no more economical or serviceable engine made for mines, quarries, docks, etc. Much cheaper than steam. Both friction and wear reduced to a minimum.

If Your Eye Could See

the filth that passes through ordinary water faucets you would be alarmed and disgusted. These germs are the cause of most diseases. Pure water would prevent them and perfectly pure water can be produced only by using the widely celebrated

Berkefeld Filter,

which is constructed on the most scientific and hygienic principle. Easy to clean and care for. Rapid filtration. One gallon of pure water in 4 minutes.

The "Khotal"
Blue Flame Oil Stove

(FOR HOME OR CAMP OR YACHT)

generates gas from common kerosene. It will boil a quart of water in two minutes and cook a dinner quickly. It can be regulated to any desired degree of heat. It has no wick and no asbestos substitute. It is strong, durable and ornamental, being made of brass of superior finish and excellent workmanship. A child can operate it.

The "Khotal" costs little to buy and little to run. The combustion is perfect; no smoke, no smell, no soot deposit on pots and pans.

Picture shows smallest size, 8 ins. high, weight 5 1/2 lbs. Price \$3.75. Made in sizes large enough to cook a course dinner.

The Perfection of Pipe Threading

is admitted to be reached when our **No. 9 1/2 PIPE THREADING MACHINE** is used. As a hand machine it is the only one known that will cut and thread an 8 inch pipe with ease and satisfaction. One valuable feature is that it has no arbitrary lead screw for determining style or pitch of thread to be cut. Send for catalogue.

Savings Banks 3% vs. Industry 12%

IF YOU Have some money in a savings bank or have investments that are paying you but three or four per cent., **WRITE TO US** and we will show you our plan for the investment of your money where it will probably net you 12 per cent. per annum.

The United States Steel Company

Has been established for two years, and we have one plant which alone cost us \$250,000, but it is too small to fill the orders for **JUPITER STEEL CASTINGS**.

The capital stock of The United States Steel Company is three million dollars, divided into six hundred thousand shares, with a par value of \$5.00 each. Every share is full paid and non-assessable. Three hundred and forty thousand shares of this stock have been issued, and for eighteen months a dividend of 12 per cent. per annum has been paid on the outstanding stock.

The United States Steel Company has the sole right to manufacture **JUPITER STEEL CASTINGS**, which are castings of the quality of forgings, and the **NEAL DUPLEX BRAKE**, which is now in use on the system of the Boston Elevated Railroad and other roads. See description, April 6, of this paper.

To provide further capital for the enlargement of their plant, so that they can supply the demand for Jupiter Steel Castings and to build the Neal Duplex Brakes, the Board of Directors have authorized the sale of ten thousand shares of the treasury stock at par (\$5.00) per share.

We will be pleased to send to those who are interested in an investment a full prospectus of this company, together with a record of what has been accomplished in the past two years.
