

The Search for Work

The man who can do something better than anyone else doesn't search for work. Employers search for him. We teach the theory of engineering and the trades to men already at work. Thousands of our students have secured a

Salary-Raising Education

in Mechanical, Electrical, Steam, Civil or Mining Engineering, Chemistry, Architecture, Plumbing, English, etc. When writing state subject in which interested.

International Correspondence Schools, Box 942, Scranton, Pa.

ELECTRICAL ENGINEERING TAUGHT BY MAIL.

Write for our Free Illustrated Book. "CAN I BECOME AN ELECTRICAL ENGINEER?"

We teach Electrical Engineering, Electric Lighting, Electric Railways, Mechanical Engineering, Steam Engineering, Mechanical Drawing, at your home by mail. Institute endorsed by Thos. A. Edison and others.

ELECTRICAL ENGINEER INSTITUTE, Dept. A, 240-242 W. 28th St., New York.

FROM ALL POINTS OF VIEW

The tire buyer should look well before choosing. A good pair of tires adds to the life of your wheel—saves it many a jolt and jar.

Service is what G & J Tires give first, last and all the time. They are comfortable, satisfactory and easy to repair.

Just the kind for country roads and big loads. Send for catalogue.

G & J TIRE COMPANY, Indianapolis, Ind.

RUBBER STAMP MAKING.—THIS article describes a simple method of making rubber stamps with inexpensive apparatus. A thoroughly practical article written by an amateur who has had experience in rubber stamp making. One illustration. Contained in SUPPLEMENT 1110. Price 10 cents. For sale by Munn & Co. and all newsdealers.

AUTOMOBILE STEAM BOILERS

These boilers are made of fire box steel which has a tensile strength of 55,000 pounds. A double butt strap seam is used. The bottom end of shell is flanged to take flat head. This flange also takes care of difference in expansion between shell and copper tubes. Each boiler is tested to 600 pounds C. W. P. Can also furnish boilers with seamless cold drawn shell.

FRANK MILNE, EVERETT, MASS.

WELL DRILLING Machines

Over 70 sizes and styles, for drilling either deep or shallow wells in any kind of soil or rock. Mounted on wheels or on skids. With engines or horse powers. Strong, simple and durable. Any mechanic can operate them easily. Send for catalogue.

WILLIAMS BROS., Ithaca, N. Y.

Economical Gas Engine Igniters

CURIOUS CONDITIONS CHANGED BY QUIET. When fated by the cares and worries of this life, when filled with a spirit of unrest, the best thing imaginable for the afflicted to do is to lie himself to new scenes—to the primeval wilds, in that part of New England known as the fishing regions, there to enjoy a period of absolute quiet. The enjoyment, the complete retirement in which one finds himself, is the best health restorer you can find. The manipulation of hooks, nets and lines, the sight of a big wary fish, anxious for a tussle, and the excitement attending the landing of one of these fine fellows, will drive away the blues and every moment of the spring vacation is one of intense enjoyment. The regions, or sections, which offer allurements to the early fisherman are several, but the most prominent and conspicuous are the Moosehead and Rangeley regions, though many sportsmen prefer the Alleghani region or the territory in Washington County, Maine, while others single out Lake Winnepesaukee or Memphremagog, or Sunapee or Champlain, or, perhaps, some one of the streams or lakes of the Adirondacks is the choice for the spring sport. The Boston & Maine Railroad reaches every section in which spring fishing is a predominant feature, and the pamphlet, "Fishing and Hunting," gotten out by its General Passenger Department, whose offices are in Boston, Mass., is chockful of interesting information which every sportsman should read, and a two-cent stamp sent to the above address will procure it for you.

EUROPEAN PATENTS FOR SALE. I own the European rights—France, Germany and Belgium—of a useful and cheap kitchen stencil that will sell at sight. It is a Pot and Pan Scraper, so constructed that it can be handled at either end, for scraping out pots, pans, cupboards, spoons, etc., whether of square or round shape. Its edges are useful for the scraping of flat surfaces. Made in one solid piece of indestructible steel. Those interested please write to CHAS. A. SUTTON, Pitkin, Colorado.
