(8584) G. C. T. asks how to solder a piece of carbon and a piece of brass together. I think the carbon has to be lined in some way.

(8585) J. F. C. asks: 1. What advantages has the double pole receiver over the single pole (as they are called) electrically? Why would not one coil, the same resistance of the two, placed on one pole of a permanent horseshoe magnet (traversed by an alternating current) affect the magnet flux as much as the two coils of half the resistance, one placed on each pole?

(8586) M. W. and C. P. write: We would like to know, through the columns of your valuable paper, how a boiler of 15 horse power, that is only in use about three months during a year, should be left. Should it be filled with water or empty, and should the smokestack be protected.

(8587) M. W. and C. P. write: We would like to know, through the columns of your valuable paper, how a boiler of 15 horse power, that is only in use about three months during a year, should be left. Should it be filled with water or empty, and should the smokestack be protected.
