Canadian patents may now be obtained by the inventors for any of the inventions named in the foregoing list. For terms and further particulars address Munn & Co., 361 Broadway, New York.

### NEW BOOKS, ETC.

CLOUDS AND WEATHER SIGNS. By Com-1902. 16mo. Pp. 31.

We are glad to see that Commander D. Wilson-Barker's admirable papers on clouds, contributed to the pages of "Knowledge," have been republished in book form and that they are thus given a more permanent value. Commander Wilson-Barker has illustrated his book with admirable pictures of various cloud forms and has presented the subject in a most attractive manner.

ty of Pennsylvania. Second Series. Part III., Part V. Large quarto.

It would be difficult to devise a more persuasive setting forth of a university course of study than is shown in the biennial review of the School of Architecture at the University of Pennsylvania. The unusual combination of type and paper, the rubricated margins, the inset illustrations, the specially designed title page and cover, together with the size of the page itself, unite in giving the review a unique position in the category of university announcements.

Confessedly planned upon new lines for the purpose of presenting a comprehensive account of the character and environments of architectural training at Pennsylvania. the review sets forth in detail the requirements of the course from the entrance examination to the completion of the fifth or "graduate" year. To this end, typical problems have been selected whose demands are printed in full together with one or two of the best solutions offered in each case by the students.

The scope of the work in design ranges from the simpler composition problems of the second year—among which we notice "An Entrance to a Small Public Library," a "Mausoleum for a Country Estate," a "Restaurant for a Fashionable Watering Place"-to the severer tasks imposed in the fourth and graduate years. Of the former, "A Nautical Amphitheater," "A Presidential Mansion," "A Municipal Hospital for the Insane," sufficiently indicate the in-terests considered. The work of the graduate year is more mature, and indicates extended tests of the student's powers of composition as well as his discrimination in handling the practical details of competition work of the highest class. Mr. Thornton Oakley's "Study for a University Group," and Mr. Julian Abele's "Metropolitan Cathedral," are typical examples of this and reflect the highest credit on both instructor and pupil.

# THE WEALTH OF NATIONS

PATENT GIVES you an exclusive right to your H invention for a term of seventeen years. You can sell, lease, mortgage it, assign portions of it, and grant licenses to manufacture under it. Our Patent system is responsible for much of our industrial progress and our success in competing in the markets of the world. The value of a successful Patent is in no degree commensurate with the almost nominal cost of obtaining it. order to obtain a Patent it is necessary to employ a Patent Attorney to prepare the specifications and draw the claims. This is a special branch of the legal profession which can only be conducted successfully by experts. For nearly sixty years we have acted as solicitors for thousands of clients in all parts of the world. Our vast experience enables us to prepare and prosecute Patent cases and Trade Marks at a minimum of expense. Our work is of one quality and the rates are the same to rich and poor. Our unbiased opinion freely given. We are happy to consult with you in person or by letter as to the probable patentability of your invention.

Hand Book on Patents, Trade Marks, Etc., Sent Free on Application.
