

RECENTLY PATENTED INVENTIONS.

Agricultural Implements. COMBINED SEEDER, FERTILIZER-DISTRIBUTER, AND CULTIVATOR.—A. CRAVOTTO, Montevideo, Uruguay. The invention relates to agricultural machines and provides a new seeder and fertilizer distributor designed for sowing small seeds, such as clover, lucerne, linseed, wheat and the like, at the same time fertilizing the soil uniformly to insure proper growing and ripening of the plants.

SILO.—A. F. WALLIHAN, Reliance, Va. It is necessary to the attainment of the best result in preservation of fodder that the vertical wall of a silo shall have no acute angles or corners, and therefore a circular form is the ideal one. This form is, however, difficult to construct and also expensive. Mr. Wallihan has devised a silo of polygonal shape which closely approximates the circular. Cement-holding laths are applied thereto in such a manner that the cement does not become cracked or detached by vertical expansion of the silo wall.

GEAR-TRANSMISSION.—J. SUCHY, Littleheart, N. Dak. This gear transmission is designed for use on self-binding harvesting machines. It is composed of but few parts not liable to get easily out of order, and is arranged to permit the operator to conveniently throw the driving gear quickly in and out of mesh with the driven gear, and to securely hold and lock the driven gear in position whenever desired.

Apparatus for Special Purposes.

APPARATUS FOR THAWING FROZEN GROUND.—G. R. CLARKE, Dawson, Canada. The invention relates to mining in northern countries, and its object is to provide certain improvements in apparatus for thawing frozen ground, whereby hot water is readily and cheaply furnished. In the case of hot, hydraulic mining the hot air and vapors in the drift are removed therefrom and utilized in the furnace for heating the water.

ELEVATED-CABLE SYSTEM OF TRANSPORTATION.—T. ALEXANDER, Brookhaven, Miss. The system is employed in transporting logs, dirt, coal and other freight in which a truck runs upon a cable attached to horizontal arms or brackets affixed to posts. The invention provides improved means for supporting and locking the cable, also means for raising the cable to cause propulsion of the freight by gravity and for allowing slack of the cable at any desired point for the purpose of taking up or arresting and releasing the freight when at the end of its transit.

SUPPORT FOR OVERHEAD CARRIERS.—T. ALEXANDER, Brookhaven, Miss. This invention provides improved frame support for the track or wire rope of an overhead carrier. One of the chief difficulties in constructing such carriers is the provision of supports that shall have due strength, rigidity and durability without involving too great a cost. Such a support has been designed by Mr. Alexander.

Hardware.

SPIRIT-LEVEL.—S. E. ROE, New York, N. Y. The invention relates to a means for mounting and carrying spirit-tubes for use on levels and plumb-lines employed by mechanics in various trades. The spirit tubes are secured to the straight edge of a plumb-rule and by means of a cruciform arrangement, vertical, as well as horizontal attachments may be secured.

Miscellaneous Inventions.

TROUSERS CREASER.—H. A. BROWN, Macon, Ga. Dr. Brown is the inventor of a new device for creasing trousers. The device is very simple and light, so that it may be easily carried in a valise and will occupy but little room therein. The construction is such as to permit the creasing of the trousers over night, when it is desired to use them in the day, or they can be creased at other times in a few hours, as may be desired.

SPRING-CLAMP FOR LENSES OR THE LIKE.—E. L. LEMBEKE, New York, N. Y. Every wearer of eyeglasses wishes occasionally that his pince-nez were spectacles. Spectacles stay on however violent one's exercise, however warm the weather. Mr. Lembeke has invented a device for transforming eyeglasses into spectacles. Temple attachments are provided which can be quickly and easily clamped onto the eyeglasses to produce the required spectacles.

PILLOW-SHAM HOLDER.—TILLY BAMBAUER, Volta, Cal. The invention provides means whereby the pillow-sham may be held properly in every respect and yet the holder made readily applicable to any bed without marring or injuring its finish.

DEVICE FOR UNROLLING CLOTH OR OTHER FABRICS.—H. L. ROSENTHAL, New York, N. Y. This device, which is of simple construction, is provided with a revoluble platform and means for controlling the movement of the platform, along with means for receiving and sustaining a roll or bolt of cloth removable from the platform, yet capable of ready interlocking engagement therewith.

NOTE.—Copies of any of these patents will be furnished by Munn & Co. for ten cents each. Please state the name of the patentee, title of the invention, and date of this paper.

Business and Personal Wants.

READ THIS COLUMN CAREFULLY.—You will find inquiries for certain classes of articles numbered in consecutive order. If you manufacture these goods write us at once and we will send you the name and address of the party desiring the information. In every case it is necessary to give the number of the inquiry. MUNN & CO.

Marine Iron Works. Chicago. Catalogue free.

Inquiry No. 2866.—For parties to manufacture small wire articles.

AUTOS.—Duryea Power Co., Reading, Pa. Inquiry No. 2867.—For manufacturers of die machinery.

"U. S." Metal Polish. Indianapolis. Samples free. Inquiry No. 2868.—For manufacturers of milk condensers.

WATER WHEELS. Alcott & Co., Mt. Holly, N. J. Inquiry No. 2869.—For dealers in mailing cases, labels, advertising cards, etc., for a patent medicine.

FOR SALE.—Patent carbonating machine. F. W. Z., Box 773, N. Y.

Inquiry No. 2870.—For dealers in wood screw-brackets for glass insulators for electric purposes.

Handle & Spoke Mch. Ober Mfg. Co., 10 Bell St., Chargin Falls, O.

Inquiry No. 2871.—For blocks of hard cardboard or soft wood 3/4 inch square by 1/2 inch thick.

Sawmill machinery and outfits manufactured by the Lane Mfg. Co., Box 13, Montpelier, Vt.

Inquiry No. 2872.—For small steam slidevalve engines 1 1/2 x 2 or 2 x 3 inches.

We make anything in sheet metal, any shape. Estimates free. Metal Stamping Co., Niagara Falls, N. Y.

Inquiry No. 2873.—For metal door plates, numbers, etc., and machinery for making same.

We design and build special and automatic machinery for all purposes. The Amstutz-Osborn Company, Cleveland, Ohio.

Inquiry No. 2874.—For manufacturers of machines for gathering nails in large quantities.

IDEAS DEVELOPED.—Designing, draughting machine work for inventors and others. Charles E. Hadley, 584 Hudson Street, New York.

Inquiry No. 2875.—For dealers in German silver wire, tube and plate, hard and soft.

Automobiles built to drawings and special work done promptly. The Garvin Machine Co., 149 Varick, cor. Spring Streets, New York.

Inquiry No. 2876.—For an oil burner adaptable for furnace, heating and cooking stoves.

Manufacturers of patent articles, dies, stamping tools, light machinery. Quadriga Manufacturing Company, 18 South Canal Street, Chicago.

Inquiry No. 2877.—For dealers in rubber stamp-making outfits.

The celebrated "Hornsby-Akroyd" Patent Safety Oil Engine is built by the De La Vergne Refrigerating Machine Company. Foot of East 138th Street, New York.

Inquiry No. 2878.—For dealers in metal specialties, novelties and articles of merit.

INVENTIONS DEVELOPED.—Designing and building of labor-saving machinery and general engineering. L. J. Zimmerman, Elect. and Mech. Engineer, 106 Center St., N. Y.

Inquiry No. 2879.—For manufacturers of hydraulic lifting jacks.

An experienced business man desires correspondence with party requiring means for developing, manufacturing or marketing a patented specialty of merit. Address Specialty, Box 773, New York.

Inquiry No. 2880.—For parties to make small wooden blocks of different shapes.

WANTED.—Experienced master mechanic for blast furnaces. Apply immediately, stating in detail experience, references, age, salary expected and earliest date can commence. Address "Blast," Box 773, N. Y.

Inquiry No. 2881.—For manufacturers of sheet aluminium.

WANTED.—A large correspondence school desires the spare time services of an experienced electrician to prepare and write a mail course on electrical engineering. In writing state qualifications, experience and references. J. H. Bowen, Box 233, Scranton, Pa.

Inquiry No. 2882.—For dealers in or makers of aluminium tubing.

Send for new and complete catalogue of Scientific and other books for sale by Munn & Co., 361 Broadway, New York. Free on application.

Inquiry No. 2883.—For manufacturers of lawn mowers in the United States.

Patents developed and manufactured, dies, special tools, metal stamping and screw machine work. Metal Novelty Works Co., 43-47 S. Canal St., Chicago.

Inquiry No. 2884.—For full information from parties familiar with the destructive ravages of the teredo to piling.

Die work, experimental work and novelties manufactured. American Hardware Mfg. Co., Ottawa, Ill.

Inquiry No. 2885.—For manufacturers of black oxide of manganese.

Inquiry No. 2886.—For manufacturers of black and green ground slate.

Inquiry No. 2887.—For makers of machinery for working peat ground.

Inquiry No. 2888.—For dealers in electric ceiling and desk fans.

Inquiry No. 2889.—For machinery for making horseshoe nails.

Inquiry No. 2890.—For dealers in small engine castings.

Inquiry No. 2891.—For makers of rubber balls, such as are used on toy balloons.

Inquiry No. 2892.—For wholesale dealers in bamboo for use in the manufacture of furniture.

Inquiry No. 2893.—For makers of small go-cart wheels 6 inches high and rubber tires.

Inquiry No. 2894.—For dealers in articles for a street fair, such as rubber sandwiches, candy bag-pipes, etc.

Inquiry No. 2895.—For dealers in very thin sheet steel.

Inquiry No. 2896.—For dealers in thin brass called "hand plating material."

Inquiry No. 2897.—For dealers in apparatus and chemicals used in the manufacture of incandescent mantels.

Inquiry No. 2898.—For manufacturers of spring motor ceiling fans.

Inquiry No. 2899.—For makers of small wool carding and spinning machines.

Inquiry No. 2900.—For makers of carpet-cleaning machinery.

INDEX OF INVENTIONS

For which Letters Patent of the United States were Issued for the Week Ending

July 8, 1902,

AND EACH BEARING THAT DATE.

[See note at end of list about copies of these patents.]

- Acid, apparatus for making sulfurous, W. Wenzel 704,412
Advertising device, wind actuated, Cribbs & Allerton 704,002
Aging or treating spirits, R. C. Scott 704,380
Air compressor, hydraulic, W. J. Linton 704,059
Alkali metal sulfates from mixed solutions, separating, C. Hoepfner 704,036
Ammonia compressor, J. T. Ludlow 704,062
Ammunition and water carrier and litter, combined, H. E. L. Allen 704,426
Ammunition and water carrier and litter, portable, H. F. L. Allen 704,427
Animal trap, J. S. Moon 704,355
Antimony oxid, making white, A. S. Plawus 704,367
Automatic lubricator, A. A. Freeman 704,021
Automobile, J. D. Carrington 704,296
Awning fixtures, antirattler for, J. Sullivan 704,397
Axle box, car, O. Newhouse 704,085
Axle lubricator, R. H. Gowan 704,028
Axle, vehicle, G. Hock 704,327
Bag tilling machine, J. L. Drolen 704,176
Bag holder, W. Hayward 704,251
Bale tie, W. T. Johnson 704,048
Balls, making playing, E. Kempshall 704,463
Balls, manufacturing playing, E. Kempshall 704,464
Barrel finishing machine, G. M. Carter 703,994
Barrel, wrought metal, E. C. Phillips 704,366
Batteries and product thereof, making plates for storage, H. K. Hess 704,252
Battery, W. T. Seaton 704,125
Bed bottom, P. B. Rooney 704,215
Bed bottom, spring, C. B. & F. White 704,416
Bed rail, W. Tucker 704,148
Bell, W. B. Augir 704,283
Belt fastener, clasp, or buckle, M. Cochran 704,437
Belt tightener, G. A. Schwingel 704,388
Bib, H. Newlin 704,206
Bicycle, O. W. Griffiths 704,029
Bicycle, H. B. Gillis 704,317
Bicycle, A. G. Anderson 704,288
Bicycle attachment, F. W. Talley 704,145
Bicycle handle bar, W. N. & W. N. White 704,159
Bicycle support, R. O. Wilcox 704,161
Bicycles, auxiliary hand-operated driving mechanism for, K. Wimmer 704,284
Bilge block, J. McCullough 704,358
Blasting cartridge, W. Kirsanov 704,465
Bleaching vat, F. Taylor et al. 704,402
Blower and compressor, C. Neumann 704,369
Boards, stacking of, G. Johnson, Jr. 704,260
Boiler furnace, steam, H. E. Meech 704,353
Bolster, Carlson & Perrie 703,993
Bolt, See Door bolt.
Book account, C. F. Rosenberg 704,216
Boring apparatus, hydraulic, G. Schmidt 704,385
Boring tool, expandible, H. Lietheger 704,057
Bottle filling and stoppering machine, P. Minis 704,171
Bottle or flask, E. D. Road 704,105
Bottle or jar, E. L. Livingstone 704,482
Bottles or jugs with beer, apparatus for filling, A. Schroedter 704,386
Box, E. O. Clark 704,298
Bracket or the like, E. P. Davis 704,233
Brake, J. G. Alexander 704,229
Brake mechanism, O. F. Randall 704,103
Brake shoe, G. A. Woodman 704,491
Brick kiln, T. M. Wilson 704,418
Broom head, W. Mansfield 704,453
Buggy boot or apron, H. A. Sorensen 704,276
Building material, M. W. Marsden 704,066
Burglar alarm, F. W. Dunne 704,246
Burglar alarm, C. Frauchau 704,247
Bustle, H. H. Taylor 704,146
Button machine, T. F. Morrissey 704,358
Calendar, C. L. Post 704,205
Camera, C. E. Hutchings 704,334
Camera attachment, photographic, Robertson & Hutchings 704,378
Camera, panoramic hand, N. Conti 704,438
Camera, photographic, C. E. Hutchings 704,335
Camera, photographic, H. F. Purser 704,370
Camera with roll film magazine, folding, C. F. Goetz 704,320
Can body forming machine, W. S. Case 704,173
Can coating or heading machine, Hodgson & Norton 704,255
Can head delivering apparatus, H. N. Norton 704,266
Can or jar cover attachment, fruit, G. E. Woodbury 704,421
Can testing machine, H. N. Norton 704,267
Can testing machine, W. H. H. Stevenson 704,278
Can testing machine, G. F. Leiger 704,480
Canning food products, J. G. Hodgson 704,258
Candy clipping machine, F. Goldschmidt 704,248
Cane magazine, toy, J. H. Fox 704,310
Car brake, catch, H. Witte 704,227
Car coupling, J. E. Thomas 704,223
Car fender, J. T. Hodgins 704,461
Car fender, street, C. T. Stoelting 704,141
Car fender, street, C. Zimmerman 704,166
Car guard gate, railway, H. Witte 704,228
Car guard rail, street, W. S. Bradley 704,432
Car side bearing, railway, C. F. Hunteon 704,044
Car side bearing, railway, Northrop & Steinbruner 704,088
Car trimmer, A. Maurer 704,067
Car wheel holding device, E. C. Deskin 704,474
Cars, hand strap for street railway, M. Straus 704,143
Carburetor, Head & Dovey 704,034
Carriage top backstay, R. C. Schemmel 704,384
Carrier. See Package carrier.
Carton, collapsible, C. H. Russell 704,380
Cashing sales accounts, means for, F. E. Anderson 704,168
Cash closing means, J. J. Henningson 704,329
Cash attachment, J. G. Richards 704,109
Chair brace, A. Gruenwald 704,187
Chatelaine clasp, J. Ritter 704,212
Chenille, woven, T. F. & A. Naylor 704,083
Chuck, rock drill, Mellale & Trainor 704,081
Churn power, J. A. Maddox 704,064
Cigar maker's board, A. C. Cambridge 704,235
Cigar or cigarette lighting device, R. Wilson 704,163
Clock, program, O. D. Rice 704,149
Clock, self winding, C. Hurst 704,018
Clothes line prop head, J. G. Mote 704,073
Clothes line support, Gordon & Davis 704,026
Cock for gas burners, ston, G. D. Gibbs 704,315
Cock, self closing, P. Schwegel 704,121
Coin actuated machine, P. S. Gattolliat 704,312
Composing machine keyboard attachment, D. W. Fratcher 704,183
Computing machine, E. Roenius 704,114
Cooking eggs, means or apparatus for, L. H. Stocks 704,140
Copyholder, W. R. Fox 704,017
Corker, J. E. Doelittle 704,007
Crane, electric locomotive, G. M. Brill 703,985
Crank hanger, W. B. Spencer 704,138
Crayon sharpener, A. P. Peterson 704,365
Crib and table, combined, H. G. Doran 704,443
Cuff holder, P. J. Roberts 704,111
Cultivator, C. W. Slocter 704,131
Cultivator, J. D. Riddle 704,376
Cupellation furnace, D. Laird 704,198
Curler, hair, A. G. B. Scott 704,390
Currents, means for changing the tension of, W. M. Fairfax 704,453
Curtain fixture, S. T. Nakashjian 704,205
Curtain pole and shade roller bracket, G. L. Lyons 704,351
Cutting woven threads, machine for, J. P. Brophy 703,986
Dampener, stove, E. M. Gleason 704,319
Dams, building, A. D. Footc 704,151

- Desk, C. F. Dephlanty 704,473
Disinfecting apparatus, W. H. Francis 704,182
Display case, F. E. Deiter 704,005
Display rack, W. White 704,357
Display rack or stand, collapsible, Johnston & Merrill 704,341
Door bolt, E. Pages 704,179
Doors, means for preventing dust, draft, and rain from entering under, J. Crowther 704,441
Draft equalizer, B. Creplin 704,001
Dredge, hydraulic, L. W. Bates 704,231
Drills, water attachment for power, F. L. Whitehead 704,158
Driving mechanism, A. F. Spaulding 704,220
Drums and cymbals, pedal device for bass, W. C. L. Evans 704,308
Dyeing apparatus, R. Illingworth et al. 704,191
Dyeing apparatus, E. Weiss 704,283
Electric circuit thermal protector, F. B. Cook 704,439
Electric cut out, G. N. Oehmen 704,361
Electric distribution system, C. J. A. Michalke 704,484
Electric motor regulation, O. H. & A. F. Pieper 709,099
Electric motors, protective operating device for, A. C. Eastwood 704,447
Electric wires in buildings, junction box for, E. W. Allen 704,424
Electric wires, wall plate or shield for, E. W. Allen 704,423
Electrical apparatus, circuit closer for portable, W. Roche 704,113
Electrical transportation system, H. F. Freed 704,019
Electrode, battery, T. A. Edison 704,305
Elevator boot or housing, pneumatic, C. Bradford 703,983
Elevator controlling system, electric, J. D. Hildor 704,337
Elevator safety device, H. Wisley 704,468
Endless chain reel, J. M. Dunahoo 704,445
Engine. See Internal combustion engine.
Engine regulators, controlling mechanism for steam, E. Reynolds 704,270
Engraving machine, R. Jay 704,193
Eyelet, J. C. Rhodes (reissue) 12,005
Face protector, M. Galley 704,311
Facing and binding, skirt, W. J. Hay 704,033
Fan case for blast fans, J. T. Hope 704,038
Fastening device, string, E. Flowers 704,016
Feed water burner, or like regulator, J. Johnston 704,342
Feed water heater and condenser, H. A. Ferguson 704,454
Fence making machine, E. E. Stewart 704,396
Fence, portable, J. Steiner 704,277
Fence post, A. Henry 704,035
Fibrous substances, treating, E. T. Holmes 704,258
Filling indicator, L. F. Doellinger 704,442
Finger ring, N. Rosen 704,273
Firearm single trigger, E. D. Fulford 704,025
Firearm single trigger mechanism, E. D. Fulford 704,024
Fire escape, Nic & Laclein 704,086
Fire escape, C. Seesle 704,126
Fishing rod line guide, E. C. & E. M. Cattley 703,986
Fly screen attachment, A. M. Nelson 704,094
Flying machine, J. T. Rice 704,375
Folding box, E. B. McFadden 704,080
Food guard, A. M. Stadelman 704,139
Formaldehyde, composition for the production of vapors of, J. A. Trillat 704,490
Furnace, C. Phillips 704,097
Furnace for progressive metal heating, T. V. Allis 704,286
Furnaces, apparatus for recovering minerals carried off in the fumes from smelting, W. R. Lee 704,199
Galvanic battery, reversible, T. A. Edison 704,306
Game apparatus, M. E. Wright 704,164
Game counter, E. T. Vap. Gieson 704,149
Garbage burner, electric, F. E. McGarrin 704,359
Gas, apparatus for making carbonic acid or other, V. W. Riesberg 704,272
Gas generator, Canton & Warring 703,995
Gas generator, acetylene, I. L. Harris 704,932
Gas generator, acetylene, A. Winch 704,226
Gas lighting mechanism, automatic, A. E. Shaw 704,391
Gear, friction draft, G. F. Ritter 704,110
Gearing, C. H. Pelton 704,094
Glass articles, apparatus for the manufacture of, molten hollow, P. T. Sievert 704,488
Glass bottle making machine, C. Leistner 704,055
Glass, framing, Taluan & Scattergood 704,100
Glass, framing, J. Taluan 704,401
Glass tank, L. Houze 704,040
Glass window or similar object and making same, stained, J. Taluan 704,399
Gold saving machine, C. Ramos 704,372
Golf balls, manufacture of, E. Kempshall 704,462
Governor, steam engine, R. J. Patterson 704,486
Grader, road, J. H. Aldrich 703,977
Grinding machine, S. P. Hastings 704,324
Grinding machine, J. N. Lapointe 704,348
Grinding mill, H. G. Johnson 704,195
Hammer, J. Dempsey 704,006
Hammer, magazine nailing, G. I. Smith 704,467
Harvester divider, J. Macphail 704,063
Hasp fastener, A. L. Weston 704,413
Hat box, J. M. Bird 704,431
Hearse, D. Johnston 704,340
Heater, A. H. Humphrey 704,043
Heating system hot water, J. Ebersole 704,009
Hedge frame, T. Fayat 704,455
Heel front abrading machine, shoe, J. G. Buzzell 703,991
Hides or skins, machine for treating, Perkins & Parkhurst 704,095
Hinge, C. H. McCauley 704,077
Hinge, spring butt, Penty & Bullard 704,487
Hoisting device, E. Stowell 704,222
Hoisting machine control device, G. H. Reynolds 704,271
Hoists or elevators, controlling system for electric, A. E. Macoull 704,264
Horse holding device, M. Lopisch 704,061
Horseshoe, F. N. Cline 704,175
Horseshoe machine, M. J. Kelly 704,049
Hose or like pipes, apparatus for cleaning the interior of, Hyden & Simonson 704,045
Hose supporter hook, M. B. Hammond 704,249
Hot air furnace, G. H. Fouts 704,309
Hub drilling machine, metallic, G. H. Everson 704,178
Hub cutter, adjustable, R. O. Bailey 704,290
Ice runway, F. H. Eichhorn et al. 704,450
Igniter, C. A. Wilkinson 704,417
Indicator, See Filling indicator.
Insect trap, H. A. Bierley 704,293
Insecticide and fertilizer, Emig & Krout 704,013
Insulator, J. E. Calvin 704,172
Internal combustion engine, F. Lister 704,060
Iron, manganese, and alloys of these metals by aid of electricity, manufacture of, A. Simon 704,393
Jar cover requiring tool, L. Sarr 704,217
Journal bearing and air compressor, combined, C. F. E. Bois 704,475
Knee joint or hinge connection, G. W. Greenwood 704,321
Knots, device for untying hard, J. W. Matton 704,357
Label holder fastener, J. R. Thorne 704,404
Lacing device, E. Savoye 704,381
Lacing stand, L. L. Russell 704,118
Ladder, E. L. Scott 704,123
Lamp, F. J. Centre 704,422
Lamp burner, H. H. Zimmerman 704,299
Lamp, incandescent gas, L. T. Alton 703,978
Lamp supporting device, electric, W. F. Brewster 703,984
Lasting machine, pneumatic, C. K. Pickles 704,098
Lathe auxiliary appliance, S. H. Croker 704,440
Lathing, metallic, E. A. Mitchell 704,072
Leaf holder, C. F. Weaver 704,410
Leather lace cutter, G. O. Bjorkander 704,294
Leathers, varnish for making enamel or patent, H. McKay 704,082
Ledger, J. B. Winn 704,420
Lemon squeezer, J. G. Malloch 703,988
Letter sheet and envelop, combined, H. V. Wagoner 704,153
Leucogalloyanin and making same, C. De la Harpe 704,301

(Continued on page 45)

Level and plumb, combined, R. W. Pritt... 704,369
 Level, gravity, G. Seyfarth... 704,219
 Life preserver, G. E. Conley... 704,000
 Linoleum machine for the manufacture of
 inlaid, D. N. McVinn... 704,068 to 704,070
 Liquid delivery apparatus, Sheedy & Camp-
 bell... 704,129
 Loading apparatus, J. Straub... 704,142
 Loads, means for moving hay, A. Schulz...
 704,387
 Lock, A. R. Ferguson... 704,180

ENGINE & FOOT LATHES

MACHINE SHOP OUTFITS TOOLS AND SUPPLIES

SEBASTIAN LATHE CO. CINCINNATI, O.

THE EUREKA CLIP

The most useful article ever invented for the purpose. Indispensable to Lawyers, Editors, Students, Bankers, Insurance Companies and business men generally. Book marker and paper clip. Does not mutilate the paper. Can be used repeatedly. In boxes of 100 for 25c. To be had of all bookellers, stationers, and notion dealers, or by mail on receipt of price. Sample card, by mail free. Manufactured by Consolidated Safety Pin Co., Box 121, Bloomfield, N. J.

DO YOU USE GRINDSTONES?

If so we can supply you. All sizes mounted and unmounted, always kept in stock. Remember, we make a specialty of selecting stones for all special purposes. Ask for catalogue.

The CLEVELAND STONE CO.
2d Floor, Wilshire, Cleveland, O.

GASOLINE ENGINES

Marine & Stationary from 1-4 to 16 H. P.

A thoroughly satisfactory engine at a moderate price. Write for catalogue.

THE CLIFTON MOTOR WORKS.
233 E. Clifton Ave., Cincinnati, O.

THE FRANKLIN DYNAMO

50 Watts, 10 Volts, 5 Amperes

3,000 to 4,000 revolutions. Sets of materials, finished parts, complete machines. For amateur construction—very efficient. Will drive a dental engine, sewing machine or small lathe; run as a generator, will furnish current for six 6-candle lamps. Parts, \$3.50, \$6.00, \$8.50. Complete, \$12.50. Write for circular.

Parsell & Weed, 129-131 W. 31st St., N. Y.

Search Lights, Electric Gas Lighters.

Push the "plate" or lever, it lights. For all uses where candles, lamps, etc., are dangerous. Extra batteries, 35 cents, by mail or express prepaid.

New Standard Electric Gas Lighter.
\$1.50 each.

Good for one year in any home. (New cells by mail, 40c. Quantities, \$15 per hundred.) Money makers for bright people. Agents wanted. **W. M. ROCHE, Inventor and Sole Mfr., 42 Vesey St., New York, N. Y.**

TRUSCOTT MARINE MOTORS.

The simplest, most powerful, and highest speed gasoline engines of their class upon the market.

Made single, double and triple cylinder, both two and four cycle, ranging from 1 to 40 H. P.

Catalog for the asking.

Truscott Boat Mfg. Co., ST. JOSEPH, MICH.

3,000 Degrees

of heat exist in the cylinder of working gas engines, which assists in causing the igniters of all regular stationary engines, except the **Hardy Motor** to stick, wear out and give trouble; we do not have these troubles because the spark jumps inside the cylinders—no moving parts exposed to heat—4-horse, 30 electric lights, 1 hour—4 cents.

HARDY MOTOR WORKS, Ltd.
Port Huron, Mich.

B. F. BARNES ELEVEN-INCH SCREW CUTTING LATHE

For foot or power as wanted. Has power cross feed and compound rest. A strictly high grade, modern tool. Ask us for printed matter.

B. F. BARNES COMPANY,
Rockford, Ill.

Practical Pointers For Patentees

Containing Valuable Information and Advice on THE SALE OF PATENTS. An Elucidation of the Best Methods Employed by the Most Successful Inventors in Handling Their Inventions. By F. A. CRESEE, M. E. 152 Pages. Cloth. Price, \$1.00.

THIS is the most practical, up-to-date book published in the interest of Patentees, setting forth the best methods employed by the most successful inventors in handling their patents. It is written expressly for Patentees by a practical inventor, and is based upon the experience of some of the most successful inventors of the day. It gives exactly that information and advice about handling patents that should be possessed by every inventor who would achieve success by his ingenuity, and will save the cost of many expensive experiments as well as much valuable time in realizing from your inventions. It contains no advertisements of any description and is published in the interests of the Patentee alone, and its only object is to give him such practical information and advice as will enable him to intelligently handle his patent successfully, economically and profitably. It gives a vast amount of valuable information along this line that can only be acquired by long, expensive experience in realizing from the monopoly afforded by a patent.

A printed copy of the specification and drawing of any patent in the foregoing list, or any patent in print issued since 1865, will be furnished from this office for 10 cents, provided the name and number of the patent desired and the date be given. Address Munn & Co., 361 Broadway, New York.

Canadian patents may now be obtained by the inventors for any of the inventions named in the foregoing list. For terms and further particulars address Munn & Co., 361 Broadway, New York.

BOOK NOTICES.

AN ELEMENTARY TREATISE ON ALTERNATING CURRENTS. By W. G. Rhodes, M.Sc. London, New York and Bombay: Longmans, Green & Co. 1902. 8vo. Pp. xii, 211.

If ever an electrical book was needed, it is a clear work on alternating currents. Such a book Mr. Rhodes has endeavored to provide. The product of an instructor's labor, the book will probably be appreciated by students. The practical engineer will also find this book of service; for, without being the least ponderous, it gives him a simple and comprehensive treatment of any phase of the subject, which he may be at the time interested in.

PAPERS AND REPORTS RELATING TO MINERALS AND MINING. By Authority of John Mackay, Government Printer. Wellington, New Zealand. 1901. Pp. 36.

CONDITIONS OF CONTRACT RELATING TO BUILDINGS. By Frank W. Macey. London: Sweet & Maxwell, Ltd. 1902. 8vo. Pp. xix, 278.

Mr. Macey and Mr. Levenson have collaborated to produce a book that deals with the conditions of contracts and with agreements as applied to all classes of architectural work, and with the law generally in its relation to various matters embraced within the scope of architecture. The style of the book, although essentially legal, is nevertheless clear and readily understandable.

ON THE FUSION OF QUARTZ IN THE ELECTRIC FURNACE. By R. S. Hutton, M.Sc. From Volume 46, Part II, of Memoirs and Proceedings of the Manchester Literary and Philosophical Society, Session 1901-1902. Manchester. Pp. 5.

THE COPPER HANDBOOK. A Manual of the Copper Industry of the United States and Foreign Countries. Vol. II. Houghton, Mich. Compiled and published by Horace J. Stevens. 1902. Small 8vo. Pp. ix, 416.

This second annual edition of "The Copper Handbook" includes new chapters on the history of the chemistry, mineralogy, and metallurgy of copper, and on the copper deposits and copper mines of the world besides those of the United States. In this respect it supplies information which may have been missed in the first edition. A considerable amount of new statistical matter has been added; and the tables given in the previous issue have been decreased in number, although increased in scope and value.

A B C OF ELECTRICAL EXPERIMENTS. By W. J. Clark. New York: Excelsior Publishing House. 1902. 16mo. Pp. 146.

Mr. Clarke writes in a way that will probably appeal to every boy who is at all interested in electricity. The apparatus which he describes is simple; and what he has to say, he says with a clearness that leaves nothing to be desired. The personal pronoun "I" plays a somewhat too important a part in his prefatory remarks. Six "I's" in the space of four lines assuredly transcend the limits of propriety.

PERFORATED METALS OF EVERY DESCRIPTION AND FOR ALL USES. THE HARRINGTON & KING PERFORATING CO. 225 N. UNION ST. CHICAGO, ILL. U.S.A.
