Our Publications on MARCONI WIRELESS

WE KNOW—That the American Newspaper reader is an intelligent, reasoning and reasonable human being.

WE BELIEVE—That he is willing to acquire knowledge, even through the medium of an advertisement, if facts are plainly, honestly, fairly and fully stated.

WE HOPE—To have the opportunity to instruct the readers of this paper in the matter of Commercial Wireless Telegraphy as an inviting and profitable field for investment. To that end we have published:

- 1.—"MARCONI WIRELESS."—56 pages, 32 half-tone cuts. Handsomely printed and bound. An ornament to the library table.
- 2.—"THE WEEKLY MARCONI GRAM." A periodical presenting a day-by-day history of the progress and development of the Marconi System.
- 3.—A LITTLE BROCHURE, containing much historical and statistical matter of interest to a possible investor.
- 4.—A VARIETY of minor documents.

WE WILL SEND FREE OF CHARGE—Any one or all of these publications, for the asking, provided you mention the name of this paper. Don't write for them unless you are truly interested.

We are offering the public an opportunity to take advantage of the great possibilities of Wireless Telegraphy as a means of profitable investment. An investigation on your part will demonstrate that more money is to be made in a few years out of the Marconi securities than is possible by any other medium.

WE DON'T WANT YOUR MONEY unless you are convinced that by investing it in the securities we offer you, you are benefiting yourself and your family. In order to fully inform you of the present status of the Marconi System, we have compiled the above publications, and are publishing "The Weekly Marconigram," in which each stage of development is recorded. Our Correspondence Bureau will answer any and all questions and furnish all desired information in reference to the Marconi system and the Marconi Wireless Telegraph Co. of America.

TWENTY-THIRD EDITION
EXPERIMENTAL SCIENCE.
By GEORGE H. HOPKINS
Revised and Greatly Enlarged. 2 Octavo Volumes. 1,100 Pages. 900 Illustrations. Cloth Bound. Postpaid, \$5.00. Half Morocco. Postpaid, \$7.00. Volumes Sold Separately: Cloth, \$3.00 per Volume; Half Morocco, \$4.00 per Volume.

EXPERIMENTAL SCIENCE is so well known to many of our readers that it is hardly necessary now to give a description of this work. Mr. Hopkins decided some months ago that it would be necessary to prepare a new edition of this work in order that the many wonderful discoveries of modern times might be fully described in its pages. Since the last edition was published, wonderful developments in wireless telegraphy, for example, have been made. It was necessary, therefore, that a good deal of new matter should be added to the work in order to make it thoroughly up-to-date, and with this object in view some 200 pages have been added. On account of the increased size of the work, it has been necessary to divide it into two volumes, handsomely bound in buckram.

A Complete Electrical Library.

The regular price of the five volumes is \$7.00.

MAGIC Stage Illusions and Scientific Diversions, including Trick Photography.

This work appeals to old and young alike, and it is one of the most attractive holiday books of the year. The illusions are illustrated by the highest class of engravings, and the exposes of the tricks are, in many cases, furnished by the prestidigitateurs themselves. Conjuring, large stage illusions, fire-eating, sword-swallowing, ventriloquism, mental magic, ancient magic, automata, curious toys, stage effects, photographic tricks, and the projection of moving photographs are all well described and illustrated, making a handsome volume. It is tastefully printed and bound. Acknowledged by the profession to be the Standard work on Magic.
By A. A. HOPKINS. 568 pages. 420 illus. Price \$2.50.

Practical Pointers For Patentees
