Some of the Reasons That Make It The Best Encyclopædia Ever Issued
 in English, and comparable only to the great German works of Brockhaus and of Meyer
 THE LATEST—The only new Encyclopædia published in the last ten years—a period which has seen more changes and advances than any equal period of the world's history.
 THE MOST COMPREHENSIVE.—The 65,000 titles embrace 100,000 subjects—which is 50 per cent. more than are found in any other general reference encyclopædia in the English language.

RICHLY ILLUSTRATED
 Never before has it been attempted to illustrate a work of this character so copiously and so artistically. The plates and maps alone, if printed separately, would make a book larger than Webster's International Dictionary.
