

it is controlled, measured, and made to do man's work. The publishers have seen to it that the book appears in a neat dress.

NATURE AND THE CAMERA. By A. Radcliffe Dugmore. Illustrated from photographs by the author. New York: Doubleday, Page & Co. 1902. Square 8vo. Pp. viii, 126. Price \$1.35.

Mr. Dugmore is one of our best known photographers of birds and animals. In the volume which lies before us he has collected what may well be considered the best of his work. To accompany his pictures he has written an instructive text. The publishers should be congratulated upon the admirable manner in which they have issued his work.

THE ART OF SUCCESS. By T. Sharper Knowlson. New York and London: Frederick Warne & Co. 1902. 16mo. Pp. xi, 163. Price \$1.

The same methods that characterize the author's "Art of Thinking" will be found in this little volume. The author proceeds by defining success according to its accepted meaning and its applications to various types of successful life. He shows that sometimes there is a success of high quality, where dollars are fewest. But since this idealistic kind of success hardly appeals to the multitude, he confines himself largely to what may be termed business success. After considering the difficulties which are met with, he deals with the constructive side of success, the first point naturally being the need of finding a suitable occupation. As concrete examples are often valuable, he devotes an entire chapter to the success of certain well-known modern business men.

INDEX OF INVENTIONS

For which Letters Patent of the United States were issued for the Week Ending

February 3, 1903.

AND EACH BEARING THAT DATE.

[See note at end of list about copies of these patents.]

Accumulator mechanism, M. J. Whitlock	719,628
Acid mordant and making same, organic, W. Beckers	719,555
Addition tester, H. E. Brown	719,734
Adhesive applying apparatus, A. N. & E. J. Barnes	719,554
Advertising or other purposes, optical device for, R. C. T. Evans	719,771
Alarm system, electric time, E. T. Ackerman	719,551
Aluminum, producing, H. F. D. Schwahn	719,638
Animal trap, P. A. Whitney	719,544
Asparagus buncher, P. Brunett	719,561
Atomizer, S. Hasbrouck	719,587
Automobile steering gear, A. P. Brush	719,562
Baling press, F. L. Heinrich	719,591
Ball, K. V. Painter	719,498
Band cutter, T. N. Huddleston	719,594
Band cutter and feeder, Florence & Misner	719,777
Battery tank, storage, B. Ford	719,778
Bed mosquito bar holder, M. S. Schayer	719,957
Bed spring, W. F. Ade, Jr.	719,631
Bed spring, woven wire, Barcalo & Valone	719,635
Belt, apparel, M. Bruckner	719,560
Belt idler, W. R. Smith	719,895
Bicycle brake, A. E. Wahlbin	719,914
Bicycle driving mechanism, J. B. Huss	719,595
Binder, H. P. Jones	719,673
Binder, W. G. & H. S. Jones	719,674
Bit stock, N. R. Thibert	719,703
Blind slot lock, J. W. Clark	719,648
Boiler, N. Curtis	719,439
Boilers, device for maintaining the water level in, O. Berger	719,424
Book for county records, etc., abstract, J. E. Lutz	719,481
Book, loose leaf, S. Seemann	719,886
Book, manifold sales, H. H. Winslow	719,930
Boot or shoe cleaner, L. C. Smith	719,894
Boot or shoe trimming machine, E. E. Angell	719,414
Bottle filler attachment, Neubert & Wiedenbeck	719,846
Bottle, non-refillable, Platten & Ahrens	719,451
Bottle or jar cap, J. S. Alston	719,715
Bottles, jars, etc., protector for, J. W. Steel	719,527
Bottles or glasses, packing for, D. H. Russell	719,612
Box fastener, C. B. Baldwin	719,553
Brake mechanism, J. King	719,813
Brick cutter, B. E. Bechtel	719,722
Brick kiln, downdraft continuous, A. Yates	719,974
Briquettes, manufacture of, E. S. Meade	719,830
Brooches, etc., safety catch for, G. W. Washburn	719,919
Brush, automatic bicycle, J. M. Peterson	719,908
Brush, bath, L. Lauterbach	719,596
Brush holder, L. E. Gannett	719,784
Brush holder, electric, H. T. Maker	719,824
Buckle, trace, J. B. Bunkers	719,737
Buggy top attachment, E. Walter	719,538
Bulkhead doors, means for operating, P. Hoppe	719,669
Burglar alarm, J. Wagner	719,963
Burning liquid fuel, injector or apparatus for, J. Holden	719,801
Butter printing machine, A. Anderson	719,413
Button, collar, B. B. Mayer	719,828
Button setting machine, Gwinn & Smith	719,939
Cableway system, F. H. Lamb	719,478
Cabs, front sash supporting and operating apparatus for, W. C. Yelton	719,975
Calculator, J. M. Steele	719,701
Calipers, Z. T. Furbish	719,783
Candy crimping machine, S. Morgan	719,490
Candy wrapper, F. C. Spang	719,896
Cape, blanket, and shelter tent, combined, C. Stacey	719,899
Car bolster, hopper, J. M. Hansen	719,464
Car brake shoe, F. R. Spear	719,807
Car, compartment sleeping, H. F. Holland	719,802
Car, convertible dump, H. S. Hart	719,796
Car coupling, P. T. Handiges	719,792
Car door, grain, Kuhlman & Woodman	719,815
Car draft rigging, railway, G. P. Ritter	719,610
Car, dump, H. S. Hart	719,794
Car, dumping, E. S. Hart	719,793
Car grain door, freight, J. Riley	719,875
Car, hopper bottom, I. A. Randel	719,868
Car interlocking center bearing, J. E. Norwood	719,496
Car operated door, mine, Flint & Whitney	719,577
Car side bearing, J. E. Norwood	719,951
Car transfer, suspended, C. A. P. Turner	719,979
Cars, radial buffing and draft rigging for railway, H. H. Sessions et al.	719,519
Cars, etc., side bearing for railway, C. E. Havens	719,589
Carbid blocks or ingots, subdividing, J. Scales	719,882
Carburetor for internal combustion engines, F. H. Messinger	719,486
Carriage, tramway, F. H. Lamb	719,477
Cartridge fuses, electrical contact for, C. D. Platt	719,859

FLY PAPERS.—FORMULAS FOR
Sticky Fly Papers are contained in SCIENTIFIC AMERICAN SUPPLEMENT Nos. 1047 and 1324. Each issue contains several recipes. Price 10 cents each, from this office, and from all newsdealers.

He's Giving Away a Fortune

A BOOK FOR EVERY HOME

A Masterpiece of Philanthropy by Hon. James R. Kenney, Ex-Mayor of Reading, Pa.

HON. JAMES R. KENNEY.

The Man Who is Giving Away a Fortune in Books.

Hon. James R. Kenney, ex-Mayor, is giving away a fortune in books. He is putting them right into the homes of the people absolutely without cost or trouble to them save the small trouble of writing. He has had prepared and printed the most remarkable work on personal magnetism, hypnotism and how to succeed in life that has ever been written. It is brimful of intensely interesting and practical information. It is just what the young man needs who is starting in life to give him vim, push and energy; to make him magnetic, to enable him to overcome obstacles and surmount every difficulty to his success. It is just what the middle-aged man needs to enable him to win and hold friends, to become a leader in his community, to influence and sway the minds of his business associates and make his mark in life. It is just what every father and every mother needs to eradicate bad tempers and evil inclinations in children, to strengthen their moral faculties and make them grow to be men and women such as God intended they should be.

It is just what every minister of the Gospel needs to help him hold the wavering steadfast in their faith, to help him turn the minds of the wicked toward morality, honesty and right doing. It is just what every lawyer needs to help him influence juries, control witnesses and to deliver his argument in that forceful, convincing manner which carries conviction with every word. It is just what you do, to enable you to get out of life the success, pleasure and happiness which the Creator intended should be yours. If you are not successful, if you are not making money, it is because you do not know that secret power

that rules the thoughts and minds of men. If you are already successful you can become more successful if you will but master the hidden forces around you. Learn to use the secret magnetic power with which nature has endowed you.

Ex-Mayor Kenney's book proves every one is born with this mighty subtle power, that any one can easily develop it at home without the knowledge of his intimate friends or associates, and influence people secretly to carry out his thoughts and ideas. It certainly is a wonderful force, capable of infinite good.

"Hypnotism truly reveals the secret of life and the mysteries of nature," writes J. H. Schneller, 1412 Avon street, La Crosse, Wis. "My own father could not have convinced me of its wonderful power if I had not actually tested it for myself. I consider a knowledge of it invaluable to those who wish to get the most out of life; to those who wish to achieve success and live up to the full measure of their possibilities."

J. R. Gaskins, Newport News, Va., writes: "I must admit that I doubted very much that hypnotism could be practically taught. In four days after receiving your work, however, you demonstrated to my entire satisfaction that I was never further from the truth in my life. I have met with wonderful success. Your free book is the finest thing of the kind I have ever seen."

A. C. Hyers, of Ithaca, N. Y., writes: "If any fault could be found with your instruction it would be that you give too much, thereby giving too many people the opportunity to acquire great secrets that have been guarded and known only by a very few for centuries—secrets that confer upon the possessor a wonderful power over their less informed friends."

Rev. John Lewelling, of Brownville, Neb., writes: "You are engaged in a glorious work. I am applying your teachings every day. I congratulate you upon your work for suffering humanity."

Ex-Mayor Kenney ordered printed three months ago 19,000 copies of his new book for free distribution. The first copies are just now coming off the press. They are elegantly illustrated with the finest engravings and will prove a valuable addition to any library. If you would know all about hypnotism, the wonder science of the age, personal magnetism, thought force, magnetic healing and kindred sciences, write for a free copy of this remarkable book at once. It will be sent to your address, postage prepaid. You will be delighted, mystified and benefited more than words can tell. Nothing like it has ever before been printed. Ex-Mayor Kenney is giving them away for the benefit of the public. He believes by so doing he is accomplishing more good than by donating his money to hospitals, public libraries or anything of this nature. He gives you a book worth more to a young man than a college education. He gives it to you for your own personal use, to keep in your library or to carry with you. On account of the great expense in preparing and printing this book, only those are requested to write who are especially interested in bettering themselves in life and who actually wish to make practical use of the information given in the book.

If you want a free copy, write at once to L. C. Bauers, Secretary to ex-Mayor Kenney, ofice S H 11, 420 Walnut street, Philadelphia, Pa.

Experimental Science

BY

George M. Hopkins

EXPERIMENTAL SCIENCE is so well known to many of our readers that it is hardly necessary now to give a description of this work. Mr. Hopkins decided some months ago that it would be necessary to prepare a new edition of this work in order that the many wonderful discoveries of modern times might be fully described in its pages. Since the last edition was published, wonderful developments in wireless telegraphy, for example, have been made. It was necessary, therefore, that a good deal of new matter should be added to the work in order to make it thoroughly up-to-date, and with this object in view some 200 pages have been added. On account of the increased size of the work it has been necessary to divide it into two volumes, handsomely bound in buckram. It may be interesting to note the following additions that have been made to these volumes:

Volume I contains in addition to a large number of simple, well illustrated experiments, a full description of a $\frac{1}{4}$ H. P. electric motor made expressly for illustration in this edition of "EXPERIMENTAL SCIENCE." It is an ENCLOSED SELF-REGULATING electric motor for a 110 volt circuit. It can be operated by a current from a 110 volt lamp-socket, yielding a full $\frac{1}{4}$ H. P., or it may be used as a dynamo, furnishing a current capable of operating three 16-candle power, 110 volt incandescent lamps. The construction of the machine is perfect enough to admit of enlarging or reducing its size if desired.

Volume II contains much on the general subject of electricity, besides new articles of great importance. Among these the subject of alternate current machinery is treated. Wireless Telegraphy and Telephony receive attention. Electrical Measuring Instruments, The Electric Clock, The Telegraphone, Experiments in High Voltage, The Nernst Lamp, and Measuring the Heat of the Stars are all thoroughly illustrated and described.

The unprecedented sale of this work shows conclusively that it is the book of the age for teachers, students, experimenters and all others who desire a general knowledge of Physics or Natural Philosophy.

P. F. Collier and Son

Dear Sir

I hereby accept
your offer of \$100,000. for
100 double page cartoons.
to be delivered to you
during the next four years.
And I agree to draw
only for "Colliers Weekly"
and "Life"

Sincerely yours

C. E. Gibson

Oct 23 1902

To Remove All Misapprehension

The Ladies' Home Journal, in printing on its front cover for February a small sketch by Charles Dana Gibson (not originally drawn for that periodical, but an advertisement, arranged for by the publisher of his annual book), makes the misleading comment that "the original of the drawing sold in New York City for \$80." As we have recently concluded a \$100,000 contract with Mr. Gibson, it seems proper to correct the impression that the *right to reproduce* his original drawings may be had for any such sum as \$80; and, in justice to Mr. Gibson and to the two periodicals which control his work (*Life* and *Collier's Weekly*), we print, with his consent, the above contract, which shows the price paid for his original drawings *at first hand*.

New York, January 30, 1903

COLLIER'S WEEKLY

Mr. Gibson's latest drawing, "The Seed of Ambition," is in the January Household Number of Collier's—issue of January 31

Scientific American Building Monthly

NEW VOLUME NOW READY

VOL. 34-JULY to DECEMBER, 1902

A Monthly Magazine of Domestic Architecture
Sumptuously Illustrated

275 Illustrations Six Covers in Tint 146 Pages
Bound in Boards Price, \$2.00 prepaid by mail

The Thirty-fourth Volume of the SCIENTIFIC AMERICAN BUILDING MONTHLY more than maintains the high standard established by this valuable Magazine. Its "Talks with Architects"—contributions by the leading architects of the day; its editorial discussions of important subjects relating to domestic architecture; and its many specialized Departments make it the most useful and most valuable publication of its kind.

TALKS WITH ARCHITECTS
"A Talk on House Fittings" by a sanitary expert. Mr. Frederick S. Lamb on "Municipal Art." Mr. F. Wellington Ruesch on "Sculpture for the Home." Mr. Charles M. Lehean on "Opportunities for Decorative Art." Mr. William Martin Aiken on the "City Architect." Mr. Percy Griffen on "Small Houses."

EDITORIAL ARTICLES
"Cheap Houses," "Walls and Wall Treatment," "The Arts and the House," "The Country House," "How the Architect Helps the Home," "How the Householder Helps the House."

DEPARTMENTS
"The Garden," "The Household," "Sanitation," "Stable Lore," "The City House," "Civic Betterment," "Country Life," "The Flat," "Fire Protection," "The Country House," "Housing Problems," "Heating Talk," "Furniture," "House Suggestions," "Wall Papers," "The Kitchen," "New Books," "Legal Notes," "New Building Patents," "Publishers' Department."

The SCIENTIFIC AMERICAN BUILDING MONTHLY contains each month photographs and plans of dwelling houses, gardens, country estates and buildings of moderate price, together with a cover beautifully printed in tint. The illustrations are all made from photographs taken expressly for the Magazine and are printed with every advantage of the printer's art. The plans which accompany many of the illustrations present a complete synopsis of each subject and are a unique feature of this valuable Magazine. Careful and concise descriptions accompany each illustration. The illustrations include photographs of exteriors, interiors and details, views of gardens and ornamental adjuncts to the house. No expense is spared to make this Magazine the leading periodical of its class and of the utmost practical value to its readers.

1902 EDITION

All The World's Fighting Ships

By FRED T. JANE, Author of the Naval War Game (Kriegsspiel).
Used as a text-book in European navies. The only absolutely correct and complete work of the kind published.

394 PAGES. OVER 3,000 ILLUSTRATIONS.

OBLONG QUARTO. CLOTH. PRICE, \$5.00, POST FREE.

CONTAINS:—A photograph of every warship in the world; also a silhouette and a gun and armor diagram of each vessel.

CONTAINS:—The length, beam, draught, horse power, speed, coal supply, number and size of guns thickness and disposition of armor of every warship in the world.

CONTAINS:—Tables of the size, weight, velocity, energy, penetration, etc., of every gun of every navy in the world.

CONTAINS:—A series of chapters by noted Admirals, Naval Constructors and other experts of various navies, on vital questions of the day in naval construction, tactics, and strategy.

CONTAINS:—A comparative table (by the author) of the strength of the navies of the world—the most scientific attempt yet made to classify the world's warships and navies as to actual fighting strength.

IT SHOULD BE NOTED that this work is from the pen of a naval critic and expert, whose reputation is far-reaching on both sides of the Atlantic. It will be of fascinating interest to those who follow the course of naval development, and as a book of reference should find a place in every library.

MUNN & CO., Publishers, 361 Broadway, New York.
