

Waterman's Fountain Pen

Received the First Award at St. Louis. A Grand Prize at St. Louis, 1904.

Tell Him That You Want One

for Christmas and when he expresses his admiration for your good taste you will know that he has just lost his and is hinting for you to give him another one. A Waterman Ideal Fountain Pen is the Universal Christmas Gift because everybody wants a ready, cleanly fountain pen that never floods or fails to write. For sale by all dealers. A pen bought of any dealer may be exchanged at any of our offices. Insist on Waterman's Ideal and beware of imitations. Send for catalogue of special Christmas styles and mountings.

L. E. Waterman Co., 173 Broadway, New York.
 8 School Street, Boston 160 State Street, Chicago. 138 Montgomery Street, San Francisco.
 12 Golden Lane. 107 St. James Street, Montreal.

The Constitution of Portland Cement

is chemically and physically discussed in SCIENTIFIC AMERICAN SUPPLEMENTS 1510 and 1511. Price 10 cents each by mail. Order from your newsdealer or from

MUNN & Co. 361 BROADWAY, NEW YORK

"THE STORY OF THE SCIENCES"

A HISTORY OF SCIENCE

By HENRY SMITH WILLIAMS, B.Sc., M.D., LL.D.

Author of "The Story of Nineteenth-Century Science," "The History of the Art of Writing," Editor of "The Historians' History of the World," etc., etc.

IN FIVE VOLUMES

Profusely Illustrated with Portraits of Famous Scientists, Diagrams, Facsimiles, and Pictures.

A GREAT EDUCATIONAL WORK

If you are a scientist, teacher, student, professional man, or layman, interested in the world's progress, you will be interested in A HISTORY OF SCIENCE for it is a record of this progress from the earliest discoveries of primitive man to such recently discovered facts in modern science as radio-activity and the new theories of light and electricity.

It is a complete history of the development of the natural sciences—Astronomy, Physics, Chemistry, Anatomy and Physiology, Medicine and Surgery, Meteorology, Paleontology, Zoology, Geology, Biology, Psychology, and the various important subdivisions of these sciences. There are also biographical sketches of most great discoverers, with picturesque incidents that have figured in so many of their discoveries. The method of presentation as given in A HISTORY OF SCIENCE has all the charm of romance and all authority of history.

It is a Work the Layman can understand. It is Untechnical, yet Accurate. It Fascinates the General Reader while commanding the respect of the most Critical Students. IT IS THE ONLY WORK OF ITS KIND IN THE ENGLISH LANGUAGE.

Send for the Books and judge for yourself.

OUR OFFER On receipt of One Dollar we will send you the entire set of five beautiful volumes. If you do not like the books when they reach you, send them back at our expense and we will return the \$1.00. If you do like them, send us \$2.00 a month for nine months. On receipt of your request for these books we will enter your name as a subscriber for one year, without additional cost to you, to either HARPER'S MAGAZINE, HARPER'S WEEKLY, or THE NORTH AMERICAN REVIEW. In writing, state which periodical you want.

Or, on receipt of the attached coupon, we will send you, free, an illustrated booklet describing this unique work.

HARPER & BROTHERS, NEW YORK.

Please send me, free of charge, your illustrated booklet describing A HISTORY OF SCIENCE.

electric furnace. The succeeding chapters then describe very clearly the working principles of various types of furnaces, including many which have not yet passed the experimental stage. Electrolytic furnaces, though not strictly coming under the head of electric furnaces, are also described. The illustrations are in almost every case sectional diagrams, thus showing very clearly the different constructions.

THE WORLD'S WORK. St. Louis Fair Number. New York: Doubleday, Page & Co., 1904. 4to; pp. 200; numerous illustrations. Price, 50 cents.

The special Exposition number of the World's work, published last August, contains numerous fine half-tone illustrations of typical scenes at the St. Louis Fair, as well as articles on the Fair and what it commemorates; a new epoch in the use of power; transportation and the measure of progress; the people as an exhibit; Philippine peoples; Japan's extraordinary exhibit; the inspiring displays of the States; exhibits of pictures and sculpture; improvement of education; strange races of men; panorama of forestry, fish, and game; modern mining and its progress, etc. The number forms one of the best high-class publications on the World's Fair that we have seen.

INDEX OF INVENTIONS

For which Letters Patent of the United States were Issued for the Week Ending December 6, 1904

AND EACH BEARING THAT DATE [See note at end of list about copies of these patents.]

Adding machine, F. T. Betts	776,582
Adding machine, G. Rainey	776,616
Adjustable chair or similar article, E. Harry	776,740
Air brake, J. J. Turner	776,765
Air forcing mechanism, F. Paul, Jr.	776,932
Ammonium formate, manufacturing, H. Pauling	776,543
Ammunition hoist, L. D. Lovekin, et al.	776,667
Amusement apparatus, H. A. Shaules	776,807
Auger, post hole, Givens & Gridley	776,903
Automobile driving gear, P. Steinhauer	776,561
Automobile spring, L. A. Hill	776,513
Ax, C. E. Fuller	776,734
Axle construction, front, S. D. Latty, et al ..	776,529
Axle, lubricating, H. Nicholson	776,537
Balance, lever, C. W. Allen	776,880
Baling fibrous material, W. L. Spoon	776,956
Baling press, J. S. Tuttle	776,704
Balls by the use of plastic or gutta percha strips, covering golf, F. H. Richards.	777,045
Banana storage and show case, D. D. Rush.	776,490
Barrel scrubbing machine, J. Muller	776,863
Bearing housing, A. M. Mattice	776,669
Bearing, roller, T. A. Blakely	776,773
Bed, E. Michaud	776,528
Bedclothes fastener, R. E. France	777,016
Belt, O. Wider	776,431
Belt cutter and square, F. M. Linderman.	777,038
Belt fastener, machine, J. Schnorr	776,694
Belt loop and garment supporter, combined, C. O. Barnes	776,486
Belt, ore concentrator, J. Kane	776,744
Belt tightener, automatic, H. E. Clark.	776,726
Bicycle, N. J. Greenison	776,827
Bicycle gearing and controlling mechanism therefor, H. F. Maynes	776,750
Bill or invoice, B. C. Tillinghast	776,962
Bin. See Grocery bin.	
Binder, catalogue, E. B. Little	776,924
Binder, loose leaf, F. M. Turck	776,763
Binding, apparel, E. J. Ricker	776,618
Blower, J. E. Kelley	776,847
Boat, life, R. A. Brown	776,641
Boat or launch, J. C. Burcher	776,493
Bobbin, F. Clark	777,000
Boiler furnace, steam, J. Milton	776,608
Boiler tube cleaners, turbine motor for, H. F. Weiland	776,877
Book attachment, account, H. Eggersgluss.	776,651
Bootjack, E. Finck	777,015
Bottle, J. L. Bair	776,484
Bottle, non-refillable, H. Parker	776,678
Bottle, non-refillable, E. Risso	776,759
Bottle, non-refillable, F. W. Smith	776,762
Bottle, non-refillable, A. F. Shaw	776,808
Bottle washing machine, J. A. Prince	776,547
Botling machine, A. Schneider	776,620
Box, G. H. Rice	776,942
Box machine, G. H. Rice	776,942
Bracket, G. E. Squire	776,764
Bread, making, C. F. Dietz	776,777
Brick pressing machine, I. V. Wolfe	776,829
Bridge or other structures, expansion or movable bearings for, G. Ward	776,572
Brush holder, E. D. Priest	776,546
Buckle, grab, Ladd & Baker	776,854
Buckle, E. J. Colvin	776,005
Building blocks, manufacture of, G. L. Peabody	776,794
Bur wheel, R. W. Gormly	776,588
Button, snap, J. McLean	777,043
Cabinet for specialists, T. W. Kelsey	776,519
Cables on winding drums, machine for laying, A. F. Wheaton	776,975
Calculating and recording machine, G. Rainey	776,617
Calendering roll, J. L. Perkins	776,796
Can capping machine, A. Hoffman	776,910
Can opener, G. C. Parish	776,540
Car body, W. W. Smith	776,811
Car bolster, trussed, A. Stucki	776,814
Car brake, H. J. Bayard	776,717
Car coupling, A. Gomer	776,904
Car coupling, C. A. McKarahan	776,929
Car coupling, Keller & Bowers	777,057
Car coupling, mine, M. G. Moore	776,531
Car door hanging and operating device, P. J. McCullough	776,928
Car, dumping, J. D. Hampton	777,020
Car fender, W. H. Sievers	776,840
Car indicating or recording mechanism, street, V. Antony	777,054
Car loader, F. D. Buffum	776,825
Car, passenger, H. Romunder	776,552
Car signal, street, J. H. Howard	776,843
Car underframing, Williamson & Pries	776,579
Car vestibule door and trap, J. Filion	776,507
Cars, etc., electric propulsion of, O. H. Caldwell	776,826
Cars or trains, means for automatically stopping electric railway, W. O. Mundy	776,534
Carbureter, F. Paul, Jr.	776,542
Carbureting apparatus, explosive engine, J. D. Anderson	776,982
Cards, educational, C. A. Roberts	776,680
Carriage curtain or the like fastener, H. Higgin	776,838
Carrier. See Hay carrier	
Cartridge, A. H. Emery	776,652
Casket cover, J. De Long	776,500
Casting plant, C. W. Sherman	776,696
Cement block mold, M. H. Johnson	776,516
Cement building block molding press, I. P. Hyer	776,846
Centrifugal machine, S. R. Kennedy	776,745
Chair, C. E. Whipple	776,976

50 Cents Electric Motor

The Rienco Motor runs at high speed when connected to one coil of almost any kind of battery. It rotates in either direction and is reversed without changing connections. It is fitted with grooved pulley. Price \$1.00. Postage and packing 10c. Motor outfit No. 8—consists of 1 Rienco Motor; 1 Rheostat, or speed regulator; 2 Small Dry Batteries and 10 feet of wire. Price \$1. Postage and packing 20c. Send stamp for catalog. Agents wanted.

Medical Coil and Shocks, postpaid, \$0.60
 Electric Door Bell Outfit, complete, 75
 Electric Light Outfit, complete, postpaid, 1.05
 Electric Automobile, complete with rubber tires, 3.50
 Electric Top, postpaid, 95

CASTINGS IRON, BRASS @ ALUMINUM

HIGHEST GRADE ONLY

We make a specialty of Cylinders, Casings, etc., and supply some of the most critical automobile and engine concerns. Send patterns or drawings for estimate. We guarantee satisfaction.

RACINE BRASS & IRON CO., Inc. - Racine, Wis.

PERFECT - PUMP - POWER.

is attained only in the TABER ROTARY PUMPS. They are mechanical, simple and durable. Will pump hot or cold fluid, thin or thick. Requires no skilled mechanic. Most power at least cost. All parts interchangeable. Made of iron, steel or bronze. Can be driven by belt, motor or engine attachment. Large illustrated Catalogue free.

TABER PUMP CO., 32 Wells St., Buffalo, N. Y., U. S. A.

TOOLS AS A TOPIC

must be interesting to every hand-craftsman. There is a mine of information in

Montgomery & Co.'s Tool Catalogue which enumerates thousands of tools. Capital handbook of reference. Profusely illustrated. Sent by mail for 25 cents, discount sheet included.

MONTGOMERY & CO.
 105 Fulton St., New York City.

For PIPE-THREADING or CUTTING

there is no machine on the market that can compare for ease of operation and excellence of work with

FORBES PATENT DIE STOCK

Use is self-centering and dies are adjustable to any variation of fittings. Parts can be duplicated at slight cost when worn out. Will thread and cut up to 12 in. pipe. CATALOGUE FREE.

MACHINE No. 30. CURTIS & CURTIS CO.,
 Range 1/2-2 in. R. & L. Garden St., Bridgeport, Conn.

SUBSTITUTES FOR COAL

Are described from the technical standpoint in the following Scientific American Supplements.

Each Supplement named costs 10 cents by mail:

COMMERCIAL USES OF PEAT. SCIENTIFIC AMERICAN SUPPLEMENT 1324. The article enumerates the principal peat bogs and states their financial possibilities.

GERMAN BRIQUETTING MACHINERY IN AMERICA. SCIENTIFIC AMERICAN SUPPLEMENT 1411. A valuable economic report.

A NEW ELECTRICAL PROCESS FOR THE MANUFACTURE OF PEAT FUEL. SCIENTIFIC AMERICAN SUPPLEMENT 1492. The paper fully describes the Bessey process.

LIGNITE, PEAT, AND COAL DUST FUEL. SCIENTIFIC AMERICAN SUPPLEMENT 1426. A careful consideration of German methods.

MOOR CULTIVATION AND PEAT INDUSTRY IN GERMANY. SCIENTIFIC AMERICAN SUPPLEMENT 1481. An excellent critical review.

THE MANUFACTURE OF BRIQUETTE FUEL. SCIENTIFIC AMERICAN SUPPLEMENT 1145. A paper on the briquette factories of Blanzay, France.

DOMESTIC COKE AND BRIQUETTES FROM RETORT COKE OVENS. By R. M. Atwater, SCIENTIFIC AMERICAN SUPPLEMENT 1211. A valuable monograph by an expert.

THE WHITE MINERAL PRESS FOR BRIQUETTING. SCIENTIFIC AMERICAN SUPPLEMENT 1224. An article describing and illustrating an American briquetting machine.

BRIQUETTING FUEL MATERIAL. SCIENTIFIC AMERICAN SUPPLEMENT 1495. An excellent résumé of the state of the art.

Price 10 cents each, by mail.

New Model Comptometer

Light and Uniform Key Touch

Its Duplex Key Action permits of a single stroke touching several keys altogether to instantly add amounts like \$4.55, \$13.40 et cetera. We have what no other has; a machine operated by keys only with:

- | | |
|---------------------|----------------|
| Perfect Duplex | Light Touch |
| Noiseless Operation | Durability |
| Uniform Key Action | Reliability |
| Dust Proof | Practicability |

All the Really Valuable Features. No Impracticable Complications.

The result of 16 years' practical experience in the making of mechanical calculators.

Many thousands used by Accountants and Engineers in all lines of business.

Send for literature and Special Trial Offer.

Sherlock Holmes
in
Collier's
January Household Number

"Watson, I simply can't leave that case in this condition. Every instinct that I possess cries out against it. It's wrong—it's all wrong—I'll swear that it's wrong. And yet the lady's story was complete, the maid's corroboration was sufficient, the detail was fairly exact. What have I to put against her? Three wine-glasses, that is all."

—From "The Adventure of the Abbey Grange."

Sherlock Holmes

leaves the case, only to return again because the dregs left in three wine-glasses excite his interest. How they give clew to the murder is told in "The Adventure of the Abbey Grange." Published in the January Household Number of Collier's.

On sale December 29th.
At all news-stands for an entire month, 10 cents.

YOU DON'T NEED A GUN IF YOU KNOW JIU-JITSU

If you would know how to defend yourself, unarmed, against every form of vicious attack and render helpless your assailant with an ease and rapidity which is astonishing—if you would possess that physical strength and power of endurance which characterizes the Japanese soldier—you must learn Jiu-Jitsu.

Jiu-Jitsu is the most wonderful system of physical training and self-defense the world has ever known. Its practice develops every muscle, every tissue and strengthens every organ of the human body. It makes men "strong as steel" and women the physical equal of men of their own age and weight. As a means of self-defense, it is as potent at short range as the most deadly weapon. The Science of Jiu-Jitsu includes a thorough knowledge of anatomy, and teaches how to produce temporary paralysis by a slight pressure exerted at one of the many vulnerable points. When once a person skilled in the art effects one of the Jiu-Jitsu "holds," it is utterly useless for an opponent to offer resistance. It makes no difference how unequaly matched in point of size or strength the contestants may be, a knowledge of Jiu-Jitsu will enable a woman to overcome and render powerless the strongest man.

Jiu-Jitsu Successfully Taught by Mail.

For over 2,000 years the principles of Jiu-Jitsu have been religiously guarded. By an Imperial edict the teaching of the system was forbidden outside of Japan. The friendly feeling, however, existing between Japan and the United States has been instrumental in releasing Jiu-Jitsu from its oath-bound secrecy, and all the secrets of the Japanese National System of Physical Training and Self-Defense are now being revealed to the American people for the first time by the **Yabe School of Jiu-Jitsu**, at Rochester, N. Y. Mr. Y. K. Yabe formerly of the Ten Shin Ryu School of Japan, has formulated a correspondence course which contains full instructions in Jiu-Jitsu. It is identical with the course taught in the leading school of Japan.

First Lesson Sent Free

An intensely interesting book which explains the principles of Jiu-Jitsu has just been written by Mr. Yabe. As long as the edition lasts, this book, together with the first lesson in the art, will be sent free to interested persons. The lesson is fully illustrated with full-page half-tone engravings, and shows one of the most effective methods known to Jiu-Jitsu for disposing of a dangerous antagonist. If you desire to know more about the closely guarded secrets of this marvelous science, you should write to-day for this free book and specimen lesson. They will be sent you by return mail, post-paid.

Time is the most important thing in human life.

ELGIN WATCHES

The most accurate of timekeepers. An illustrated history of the watch sent free.

Elgin National Watch Co., Elgin, Ill.

Scientific American Reference Book

12mo; 516 pages; illustrated; 6 colored plates. Price \$1.50, postpaid.

THE result of the queries of three generations of readers and correspondents is crystallized in this book, which has been in course of preparation for months. It is indispensable to every family and business man. It deals with matters of interest to everybody. The book contains 50,000 facts, and is much more complete and more exhaustive than anything of the kind which has ever been attempted.

¶ The "Scientific American Reference Book" has been compiled after gauging the known wants of thousands. It has been revised by eminent statisticians. Information has been drawn from over one ton of Government reports alone. It is a book for everyday reference—more useful than an encyclopedia, because you will find what you want in an instant in a more condensed form.

REDUCED FACSIMILE PAGE 118.

One chapter contains everything relating to shipping, including the projected Cunarders of 1906. The section relating to navies is also most complete. Types of vessels are minutely described and illustrated. If you want to find the funnels and house flags of transatlantic fleets, look at the frontispiece in eight colors. If your son wishes to enter Annapolis, consult the "Scientific American Reference Book." The armies of the world are adequately treated. Railroads, both steam and electric, come in for a share of attention. If you wish to know how many are engaged in various trades in the United States, consult the full index and be referred to an elaborate table of occupations. The chapter relating to patents, trademarks and copyrights is a thorough one and aims to give inventors proper legal aid. The chapter on manufactures deals with most interesting figures, admirably presented for reference. The Departments of the Government, Post Office, international bureaus, mines and mining, farms and foods, all come in for attention. The astronomical section has a valuable star map. The chapter dealing with Mechanical Movements contains nearly three hundred illustrations, and they are more reliable than those published in any other book—they are operative. The chemical chapter has valuable

tables of elements and the value of rare metals and other substances. Weights and measures occupy a considerable section of the book, and are indispensable for purposes of reference. Sixty years of experience alone have made it possible for the publishers of the Scientific American to present to the purchasers of this book a remarkable aggregation of information. The very wide range of topics covered in the "Scientific American Reference Book" may be inferred by examining the table of contents printed below. The first edition of this work is 10,000 copies. The readers of the Scientific American are requested to send in their orders promptly. Remit \$1.50, and the book will be promptly mailed. Send to-day.

PARTIAL LIST OF CONTENTS
