The Wizard Engine With Pump. OLDS ENGINES Economical Power. In sending out their last specifications for gasoline engines for West Point, the U. S. War Department required them "to be Olds Engines or equal." This speaks volumes for our engines. It means they excel all others or the U. S. Government would not demand them. They are the horizontal type, 2 to 100 H. P., and are so simply and perfectly made that it requires no experience to run them, and Repairs Practically Cost Nothing. Send for a catalogue of our Wizard Engine, 2 to 100 H. P. (spark ignition system, same as in the famous Oldsmobile, the most economical small power engine made) with either pump-jack or direct connected pump; or our general catalogue showing all sizes. Olds Gasoline Engine Works, Lansing, Mich.
