

Hercules Cement Stone Machine

Makes blocks perfectly water-proof. Every shape and kind of stone from 2 inches to 6 feet long, ornamental design, sills, coping, anything.

Tamps on the face of the mould using 2 to 1 of sand and cement for facing, rendering block impervious to water and 5 to 1 for backing, thus saving cement.

Hercules blocks cheaper than lumber, brick or stone—far more durable.

Making cement stone a new and very profitable industry. Small capital required, as one machine makes every kind of stone.

The Gallery of Masterpieces

IS THE MOST REMARKABLE ART PUBLICATION EVER PRESENTED IN AMERICA, BECAUSE IT COMBINES THE GREATEST BEAUTY OF REPRODUCTION WITH THE MINIMUM OF COST.

The collection consists of fifty pictures (miniature suggestion of one is here given), and represents, by a new and secret process, the finest works of the world's most famous painters in the wonderful art period between 1400 and 1800.

Each photo-mezzotint is 15x20 inches, and is accompanied by a page of critical notes by Sir Martin Conway, Slade Professor of Art, Cambridge University.

When it was issued in Europe this work caused amazement in art circles; it seemed incredible that such exquisite beauty and fidelity of reproductive tone could be by any process be executed and delivered to the public so inexpensively.

If it astonished the critical it delighted art lovers in general.

It solved the problem how to enrich the home with the refining graces of true art on terms within the means of the most careful purchaser.

And yet the pictures are worthy a distinguished place in the collection of the most discriminating connoisseur.

For the first time in the history of art a collection of masterpieces is open to the possession of persons of taste and refinement who are not millionaires.

A member of the Royal Academy, London, said of this group of Masterpieces: "In this age, when so many inartistic pictures are constantly appearing, this series comes as a boon to mankind, and should mean the dethronement of hideous productions which so long have occupied a place on our walls."

That is the Mission of True Art

These pictures give you an intimate knowledge of the great paintings that have been for centuries the inspiration of genius and the spring of culture.

A home without the ennobling influence of art is without one of the greatest benefactors of intelligent society.

The photo-mezzotint is superior to the best etching or engraving. The secret of this remarkable process remains with the European publishers who discovered it. We are the sole importers for America, and are prepared to furnish the Pictures at a price surprising to all.

The publication of "The Gallery of Masterpieces" allows no one an excuse for not having a home collection of art pictures that shall be both charming and educative to all who may have the privilege of its study and enjoyment.
