

The Science of the LINDSAY LIGHT

Here it is, so plainly illustrated that anyone can readily see why the Lindsay Light produces more light and better light from a less amount of gas than would be burned in the same time by an ordinary incandescent gas burner.

The Lindsay Light gives a forced pressure that sends the flame clear out to the end of the mantle, making it all incandescent—all light giving. It regulates the pressure of any gas system, allowing no waste from over pressure. The Lindsay Light mantle gives out a strong, white, brilliant light of 800 candle power.
