

SMALLEY

MARINE GAS ENGINES

"It Beats the Devil"

A customer writes us as follows: "It beats the devil what a man will sometimes do to save money. Two years ago I purchased an engine of ——. The price was very low and I figured I would not be much out of pocket even if the engine was a failure, but I was wrong; I paid nearly twice the price of the engine trying to get satisfaction out of it. Neither could I get any satisfaction from the people who built the engine. I guess they figured they sold it so cheap they couldn't afford to pay postage answering my letters. Last year I was again attracted by another 'something for nothing' proposition and got sold again. I believe I now know the difference between a cheap motor and a good one. A number of your machines are used in boats here on the river and I know what they are. Send me your latest catalogue and I will place order within ten days for one of your 9 horse power double-cylinder engine."

The above letter is a fair sample of similar experiences that constantly come to our notice. Perhaps you are in the same boat. In any event, if you are interested in marine motors, send 10 cents in stamps and we will forward our 84 page handsomely illustrated 1905 catalogue. Address Dept. W.

SMALLEY MOTOR CO. LTD., Bay City, Mich., U. S. A.
Member of the National Ass'n of Engine and Boat Mfrs.

Convert Your Bicycle into a Motorcycle

at a moderate cost by attaching the **Mesco 1 1/2 h.p. Motorcycle Outfit** which includes all accessories to make a complete motorcycle from your bicycle without alteration. Choice of transmissions. Complete Motorcycles and Cycle Motors. Parts sold separately. Write for catalogue.

The whole face of every-day life is being changed by the introduction of electricity. Here is the story of electricity in all its various uses, told in non-technical language. We know of no book or set of books that treats the subject with such absorbing interest for the general reader

Prof. EDWIN J. HOUSTON'S
"Electricity in Every-Day Life"

Vol. I. THE GENERATION OF ELECTRICITY AND MAGNETISM; 584 pages, 217 illustrations, of which 19 are full pages (3 in full color).

Vol. II. THE ELECTRIC ARTS AND SCIENCES; 566 pages, 313 illustrations, of which 19 are full pages (3 in full color).

Vol. III. THE ELECTRICAL ARTS AND SCIENCES (continued); 609 pages, 270 illustrations, of which 18 are full pages (2 in full color).

This is undoubtedly the most comprehensive and extensive popular treatise on electrical subjects. It is written by the foremost electrical expert of the United States, Prof. Edwin J. Houston, a founder of the famous Thomson-Houston Electric Company, now known as the General Electric Company, whose arc and incandescent lights and trolley-car system are now used practically all over the world.

It is no longer a matter of choice whether or not one shall become acquainted with the general facts and principles of electrical science. So intimately does electricity enter into our every-day life, that to know nothing of its peculiar properties or application is, to say the least, to be severely handicapped in the struggle for existence.

The three volumes will be sent by express, prepaid, on receipt of \$4.00 in stamps, draft, money order, or registered letter. A special easy payment offer will be submitted upon request. *A prospectus will be sent upon request*

P. F. COLLIER & SON, 404 West Thirteenth St., New York City
