

HAYNES

Automobiles

The day of *exacting* commercialism is here. Hobbies or freaks have no place in the automobile world.

Let us look at this automobile question squarely—and sensibly, and select a machine as we would a horse—because of its *soundness*, its durability and because of the service it gives.

The "Haynes" machine gives satisfaction that *lasts*. All parts essential to endurance are made in our factory under the personal supervision of Mr. Elwo D Haynes, the pioneer auto builder of America.

Half a generation's experience warrants us in confidently affirming that no machine now offered anywhere in the world will give equal satisfaction.

Fuel Consumption Reduced

Remove the scale from your boiler tubes and fuel consumption immediately is lessened. The Dean Boiler Tube Cleaner will remove all the scale.

We loan the Dean Cleaner to power users for trial in one boiler to demonstrate that it will remove scale better than any other device. "Boiler Room Economy," a book we publish, tells all about this trial offer. Write for it to-day.

**ELECTRONS AND THE ELECTRO-
NIC THEORY** are discussed by SIR
OLIVER LODGE in SCIENTIFIC AMERICAN
SUPPLEMENTS 1428, 1429, 1430, 1431,
1432, 1433, 1434.

THE PANAMA CANAL is described from
the engineering standpoint in SCIENTIFIC
AMERICAN SUPPLEMENT 1359.

WIRELESS TELEGRAPHY. Its Progress and
Present Condition are well discussed in
SCIENTIFIC AMERICAN SUPPLEMENTS 1425,
1426, 1427, 1386, 1388, 1389, 1383,
1381, 1327, 1328, 1329, 1431.

**HOW TO CONSTRUCT AN EFFI-
CIENT WIRELESS TELEGRAPH
APPARATUS AT SMALL COST** is
told in SCIENTIFIC AMERICAN SUPPLEMENT
1363.

SUBMARINE NAVIGATION. An ex-
haustive review of the subject is published
in SCIENTIFIC AMERICAN SUPPLEMENTS
1414, 1415, 1222, 1223.

**SELENIUM AND ITS REMARKABLE
PROPERTIES** are fully described in
SCIENTIFIC AMERICAN SUPPLEMENT 1430.
The paper is illustrated by numerous en-
gravings.

**THE INTERNAL WORK OF THE
WIND.** By S. P. LANGLEY. A painstaking
discussion by the leading authority on
Aerodynamics, of a subject of value to all
interested in airships, SCIENTIFIC AMERICAN
SUPPLEMENTS 946 and 947.

LANGLEY'S AERODROME. Fully de-
scribed and illustrated in SCIENTIFIC AMER-
ICAN SUPPLEMENTS 1404, 1405 and 1546.

STEAM TURBINES. Their Construction,
Operation and Commercial Application.
SCIENTIFIC AMERICAN SUPPLEMENTS 1306,
1307, 1308, 1422, 1400, 1447, 1370,
1372, 1521. The articles have all been
prepared by experts in steam engineering.

PORTLAND CEMENT MAKING is de-
scribed in excellent articles contained in
SCIENTIFIC AMERICAN SUPPLEMENTS 1433,
1465, 1466, 1510, 1511.

AERIAL NAVIGATION. Theoretical and
Practical Discussions. Pictures and Descrip-
tions of actually-built dirigible balloons and
aeroplanes will be found in SCIENTIFIC
AMERICAN SUPPLEMENTS 1161, 1149, 1150,
1151, 1404, 1405, 1413, 1455.

THE TANTALUM LAMP. A full illus-
trated description of a lamp having a metal-
lic filament and burning at once without
preliminary heating appears in SCIENTIFIC
AMERICAN SUPPLEMENT 1523.

THE WATERPROOFING OF FABRICS
is thoroughly discussed in SCIENTIFIC AMER-
ICAN SUPPLEMENT 1522 by an expert.

**THE SPARK COIL, ITS CONSTRU-
TION AND MAINTENANCE,** is the
subject of a painstaking article in SCIENTIFIC
AMERICAN SUPPLEMENT 1522.

**ELECTRIC IGNITERS FOR GAS EN-
GINES** are discussed in SCIENTIFIC AMER-
ICAN SUPPLEMENT 1514.

CARBURETERS, a subject of immense im-
portance to automobilists and the users of
oil engines, is well treated in SCIENTIFIC
AMERICAN SUPPLEMENT 1508.

EPICYCLIC TRAINS, which play an im-
portant part in toothed gearing, are ably
described in SCIENTIFIC AMERICAN SUPPLE-
MENT 1524.

volume in order to enable the general reader to appreciate the glory and magnitude of the stars. The book contains two stereoscopic views of the stars, which may be cut out and used in any stereoscope. It also contains, among other chapters, several on the Stars and Space; Our Stellar Universe; Stellar Magnitudes and Parallaxes; and the Sun Power of the Stars. As the author expresses it, his book is intended to be an "itinerary or road-book to the stars." Although he does not vouch for its accuracy, it is founded upon the best stellar parallax obtainable. The novel method of appreciating the distances is based upon Mr. Heath's discovery, that "if the distance which light travels in one year be represented by one mile, then the distance of the earth from the sun will be represented by one inch on the same scale." With this principle as a basis, it is possible to construct a model or diagram in which the solar system and the stars of known parallax can be shown in such a way that our minds are able to form a clear conception of the whole. This is attempted in the present volume, which has several diagrams worked out on this scheme. The book will be readily appreciated by the merest tyro in astronomy.

Another Week Gone!

and the little family in your cheerful home is still unprotected from the trials of financial stress if you should be suddenly taken away.

Save them that trial. Save a little money which now goes for incidentals, and let it build a barrier wall against the attacks of want, when such protection is most needed.

The Prudential

can help you build that wall. It is no idle catch phrase that has inseparably linked the Prudential name with the rock of Gibraltar. It has the strength of Gibraltar, and you may well use its resources, its solidity, its liberal terms of insurance to safeguard the financial welfare of your family.

Another week has begun. Write to-day for circular, "How Can I Invest One Hundred Dollars per Year to the Best Advantage?"

Home Mechanics for Amateurs

This book has achieved an unparalleled success in one week and a Special Edition of 4,000 copies has been ordered. It is by far the largest and best book on the subject ever offered at such a low price. It tells how to make things the right way—the "only" way—at small expense. It will prove of value to you—much more than you realize. Do things with your hands. Send for a circular giving contents—the circulars cost only a cent the book \$1.50 postpaid. If the book could meet you face to face you would be the first to purchase. The first large edition is almost gone, order to-day.

370 Pages 326 Engravings Price \$1.50

TWENTY-THIRD EDITION EXPERIMENTAL SCIENCE.

By GEORGE M. HOPKINS
Revised and Greatly Enlarged. 2 Octavo Volumes. 1,700 Pages. 900 Illustrations. Cloth Bound, Postpaid, \$5.00. Half Morocco, Postpaid, \$7.00.

EXPERIMENTAL SCIENCE is so well known to many of our readers that it is hardly necessary now to give a description of this work. Mr. Hopkins decided some months ago that it would be necessary to prepare a new edition of this work in order that the many wonderful discoveries of modern times might be fully described in its pages. Since the last edition was published, wonderful developments in wireless telegraphy, for example, have been made. It was necessary, therefore, that a good deal of new matter should be added to the work in order to make it thoroughly up-to-date, and with this object in view some 200 pages have been added. On account of the increased size of the work, it has been necessary to divide it into two volumes, handsomely bound in buckram.

JUST PUBLISHED Scientific American Reference Book

12mo. 516 Pages. Illustrated. 6 Colored Plates. Price \$1.50, postpaid

The result of the queries of three generations of readers and correspondents is crystallized in this book, which has been in course of preparation for months. It is indispensable to every family and business man. It deals with matters of interest to everybody. The book contains 50,000 facts, and is much more complete and more exhaustive than anything of the kind which has ever been attempted. The "Scientific American Reference Book" has been compiled after gauging the known wants of thousands. It has been revised by eminent statisticians. Information has been drawn from over one ton of Government reports alone. It is a book of everyday reference—more useful than an encyclopedia, because you will find what you want in an instant in a more condensed form. Sixty years of experience alone have made it possible for the publishers of the SCIENTIFIC AMERICAN to present to the purchasers of this book a remarkable aggregation of information.

Three of the 1906 Models
Type G
The Big-Little Car
5-passenger Touring Car, weight, 1300 pounds; 35 miles an hour. \$1,800

FRANKLIN

Type G, the new Big-little, Shaft-drive, Three-speed, Four-cylinder, Air-cooled, Side-door car carries 4 or 5 people over American roads more miles in a day or a year—and safer, easier and cheaper than any other car but a Franklin.

Small in weight, bulk and operating cost. Big in capacity and performance. A 12 "Franklin-power" engine which delivers up more actual "go" than the average car of 20 horse-power rating. Construction, material, springs and air-cooling that make all the power available on all roads all the year.

Costing 50 per cent more per pound to build than any other make of car and yielding 100 per cent more comfort, safety and enjoyment.

Type D. High-power Touring Car

This is another 1906 model, 20 "Franklin-power" car. We could not build enough last year to supply the demand. This year we have brought it to a point that nothing with 4 cylinders or less can get by it for mileage, comfort or economy.

Type E. 12 Franklin-power Runabout

All three cars show a few detail improvements over our former models: Brake and clutch levers put forward—so that the driver gets in and out easily. Force-feed, wire-belt oiler on the dash. Ball bearings on rear axle and transmission. And more effective brakes.

But not a single change or departure from the time-tried and victorious principles which make Franklins the coming standard American type.

WINCHESTER

MODEL 1905 SELF-LOADING RIFLE.

This rifle is a six-shot, hammerless take-down, made in .32 and .35 calibers, the cartridges it handles being of the modern smokeless powder type, having excellent penetration and great shocking effect on animal tissue. As its name indicates, the Model 1905 is self-loading. The recoil of the exploded cartridge ejects the empty shell, cocks the hammer and feeds a fresh cartridge from the magazine into the chamber, leaving the rifle ready to shoot upon the operator's pulling the trigger. The self-loading system permits rapid shooting with great accuracy, and on account of the ease and novelty of its operation adds much to the pleasure of rifle shooting, either at target or game. The list price of the standard rifle of this model is \$28.00.

"American Homes and Gardens"

the new monthly magazine for all Americans appreciating the "home."

This unique publication, every issue of which is a veritable *edition de luxe*, introduces the reader to the interiors of the finest homes in America, shows how they are built, arranged and decorated, explains how furniture may be arranged to the best advantage, and gives authentic and expert hints upon the laying out of house gardens and the planting of proper flowers. It tells how bric-a-brac should be displayed and pictures hung so as to get the best effects.

1905 MODEL ROTARY ADDRESSING MACHINE

HAVE YOU CONSIDERED the question of an Addressing Machine to handle your private mailing lists? We have the only practical machine for mercantile and mail-order houses. The important question is, cost of stencils and changes. Your mailing list prepared on stencils ready for work on our machines costs you but \$2.50 per thousand. You can make your own changes at a cost of one-eighth of a cent each. A child can operate it.

OUR LIST DEPARTMENT
 We are prepared to furnish a list of any class of names desired, compiled from the Reference Book and other authentic sources, on short notice. We have facilities for revising special lists through the R. G. DUN & COMPANY, MERCANTILE AGENCY, and are constantly adding new names and throwing out dead ones, keeping them up-to-date as nearly as possible.

Send for List of Trades and How to Reach 'Em, and Descriptive Catalogue of Addressing Machine.

A Scientific Method of Growing Hair

The Evans Vacuum Cap provides the scientific means of applying to the scalp the common sense principles of physical culture. Baldness and falling hair are caused by the lack of proper nourishment of the hair roots. This lack of nourishment is due to the absence of blood in the scalp—an abnormal condition. It is the blood which conveys nourishment to the hair roots as well as to every other part of the body. If you want the hair to grow on the scalp the blood must be made to circulate there. It is exercise which makes the blood circulate. Lack of exercise makes it stagnant. The Evans Vacuum method provides the exercise which makes the blood circulate in the scalp. It gently draws the rich blood to the scalp and feeds the shrunken hair roots. This causes the hair to grow.

Test It Without Expense

You can tell whether it is possible to cultivate a growth of hair on your head by ten minutes' use of the Evans Vacuum Cap. We will send you the Cap with which to make the experiment without any expense to you. If the Evans Vacuum Cap gives the scalp a healthy glow, the normal condition of the scalp can be restored. A three or four minutes' use of the Cap each morning and evening thereafter will produce a natural growth of hair. If, however, the scalp remains white and lifeless after applying the vacuum, there is no use in trying further—the hair will not grow.

The Bank Guarantee

We will send you, by prepaid express, an Evans Vacuum Cap, and will allow you ample time to prove its virtue. All we ask of you is to deposit the price of the Cap in the Jefferson Bank of St. Louis, where it will remain during the trial period, subject to your own order. If you do not cultivate a sufficient growth of hair to convince you that the method is effective, simply notify the bank and they will return your deposit in full. We have no agents, and no one is authorized to sell, offer for sale or receive money for an Evans Vacuum Cap. All Caps are sold under the bank's guarantee, and all money is sent direct to the bank.

A sixteen-page illustrated book will be sent you free, on request

Do You Know

that the appearance of your product is one-half of the selling point? If you use enamel, why not the best? That means

BRAZILIO

The pigments selected for Brazilio Enamels are of the finest, and after being bolted through silk of about 10,000 meshes to the square inch are ground in Hard Finish Brazilio, which makes an enamel especially adapted for **ONE COAT WORK** on wood and metals of all kinds. This process of manufacture is protected by us.

Brazilio enamels dry from the bottom up, producing a hard, smooth finish which will not chip or peel.

80,000 COPIES ALREADY SOLD!

The choice of all the remarkable photographs taken during the war for Collier's Weekly is here gathered into one splendid volume of permanent value

Collier's Photographic Record of the RUSSO-JAPANESE WAR

Now ready in one large quarto volume (11 x 15 1/2 inches), 256 pages, 570 photographs, carefully printed on special paper.

"The manner in which the Russo-Japanese war has been handled by Collier's is without equal in the history of journalism." "These photographs were made by men who took their lives in their hands to get them. Never before has a war been so realized in pictures."

This record presents in consecutive form and comprehensively the story of the greatest military duel of modern times. The pictures and text tell the story from the time that preparations were made in Russia and Japan down to and including the great naval battle between Togo and Rojstvensky.

This history is not only the best of its kind, it is the only one of its kind. To turn its pages is to bring the whole campaign before one with startling vividness.

No publication in the world has such resources for gathering material for such a record as had Collier's. Its correspondents and photographers included Richard Harding Davis, Frederick Palmer, J. H. Hare, J. F. J. Archibald, R. L. Dunn, Victor K. Bulla, H. J. Whigham, Horace Ashton, and four others.

Captain Mahan, the world's greatest authority on naval warfare, writes on the naval battles between Japan and Russia.

Can be had of local bookseller or sent by express, prepaid, on receipt of \$4, in stamps, draft, money order, or registered letter. An interesting prospectus will be sent upon request.

SPECIAL AUTHORIZED EDITION

Complete Works of Frank Norris

\$3.50 instead of \$9.75

A DEAL IN WHEAT
MORAN OF THE LADY LETTY
A MAN'S WOMAN
ESSAYS ON AUTHORSHIP

To buy these stories in the regular way costs \$9.75. We have now ready a special cloth-bound edition in four octavo volumes, library style, from entirely new plates, portrait of author, and illustrations by Frederic Remington, Frank X. Leyendecker, Lucius Hitchcock and Charles E. Hooper. Price, \$3.50; express prepaid on receipt of stamps, draft, money order, or registered letter.

When Frank Norris died, one of the most promising careers in this generation was broken. He looked at the teeming life around him in a big, sympathetic manner, and, among a thousand commonplace writers, took his work seriously. The life of the Middle West and the Coast was what interested him—so closely had he studied some phases of it that he may be said to have made them his own. Not to know Norris is to have missed the most characteristic American writer in his generation.

W. D. HOWELLS—"The novels he left are sufficient for his fame."
HAMLIN GARLAND—"For the throngs of marvelously realized characters in each of these books we are indebted to the keen eyes, the abounding insight, and the swift imagination of a born novelist."

The four volumes will be sent by express, prepaid, on receipt of \$3.50, in stamps, draft, money order, or registered letter. A special easy-payment offer will be submitted upon request.

A PROSPECTUS WILL BE SENT UPON REQUEST
