SENSITIVE LABORATORY BALANCE.

By N. Monroe Hopkins. This "built-up" laboratory balance will weigh up to one pound and will turn with a quarter of a postage stamp. The balance can be made by any amateur skilled in the use of tools, and it will work as well as a \$125 balance. The article is accompanied by detailed working drawings showing various stages of the work. This article is contained in SCIENTIFIC AMERICAN SUPPLEMENT No. 1184. Price 10 cents. For sale by MUNN & Co., 361 Broadway, New York City, or any bookseller or newsdealer.

BUFF
TRANSITS AND LEVEL
are used exclusively on the largest works where utmost precision is required. Send for new catalog No. 22. THE BUFF & BUFF CO. Boston, Mass.

Hermaphrodite Calipers

are constructed in a manner to insure the maximum rigidity with the minimum weight. The chief peculiarity is the adjustable point. An auxiliary point is furnished when desired. The calipers have beeswax joints, 2, 6, 8, 10 and 12 inches. Prices 65 cents up to \$1.50. Catalogue sent free.

SAWYER TOOL MFG. CO. Fitchburg, Mass.

An Automatic Pump

that works wherever there is a spring, creek or pond. It costs but little and wears day and night without attention or expense. The Niagara Hydraulic Pump, used and endorsed by the U. S. Government, is made in all sizes. Free booklet and terms to agents upon request.

Niagara Hydraulic Engine Co. CHESTER, PA. 140 Nassau St., New York, N. Y.

THE EUREKA CLIP

The most useful article ever invented for the purpose. Indispensable to Lawyers, Editors, Students, Bankers, Insurance Companies and business men generally. Book marker and paper clip. Does not mutilate the paper. Can be used repeatedly. In boxes of 100 for 25c. To be had of all booksellers, stationers and notion dealers, or by mail on receipt of price. Sample card, by mail, free. Manufactured by Consolidated Safety Pin Co., Box 121, Bloomfield, N. J.

60 YEARS' EXPERIENCE

PATENTS

TRADE MARKS, DESIGNS, COPYRIGHTS & C.

Anyone sending a sketch and description may quickly ascertain our opinion free whether an invention is probably patentable. Communications strictly confidential. HANDBOOK on Patents sent free. Oldest agency for securing patents. Patents taken through Munn & Co. receive special notice, without charge, in the

Scientific American.

A really excellent manual by Edwin J. Houston, which presents in lucid form a mass of timely information not elsewhere attainable in handy form.—From *The Herald*, New York, February 11, 1905.

The manifold applications of electricity in modern industry are strikingly shown in the illustrations.—From *The Review of Reviews*, February, 1905.

Everything that one wishes to know about electricity is described in non-technical language in Edwin J. Houston's "Electricity in Every-Day Life."—From *The Press*, New York, January 28, 1905.

The books are peculiarly adapted to their popular purposes.—From *The World*, New York, Jan'y 27, 1905.

There is no slurring over difficulties, but an earnest effort is made to present them in such a shape that they can be understood with no technical education.—From *The Sun*, New York, January 21, 1905.

Dr. Houston needs no introduction to the electrical student. His writings are always clear and entertaining, and, above all, accurate. The style of the work is such that any one can read it understandingly. Indeed, if any one goes through this work carefully, he may consider himself well posted in elementary electrical science.—From *The Electrical Review*, February 18, 1905.

NOW OFFERED TO THE GENERAL PUBLIC FOR THE FIRST TIME

Prof. Edwin J. Houston's "Electricity in Every-Day Life"

- Vol. I. THE GENERATION OF ELECTRICITY AND MAGNETISM; 584 pages, 217 illustrations, of which 19 are full pages (3 in full color).
- Vol. II. THE ELECTRIC ARTS AND SCIENCES; 566 pages, 313 illustrations, of which 19 are full pages (3 in full color).
- Vol. III. THE ELECTRIC ARTS AND SCIENCES (continued); 609 pages, 270 illustrations, of which 18 are full pages (2 in full color).

This is undoubtedly the most comprehensive and extensive popular treatise on electrical subjects. It is written by the foremost electrical expert of the United States, Prof. Edwin J. Houston, a founder of the famous Thomson-Houston Electric Company, now known as the General Electric Company, whose arc and incandescent lights and trolley-car system are now used practically all over the world.

It is no longer a matter of choice whether or not one shall become acquainted with the general facts and principles of electric science. So intimately does electricity enter into our every-day life, that to know nothing of its peculiar properties or application is, to say the least, to be severely handicapped in the struggle for existence.

The three volumes will be sent by express, prepaid, on receipt of \$4.00 in stamps, draft, money order or registered letter. A special easy payment offer will be submitted upon request. A prospectus will be sent upon request. Address

P. F. COLLIER & SON, 418 West Thirteenth St., New York City
