SMALLEY

MARINE GAS ENGINES

"It Is Self Starting"

INDIAN RIVER, MICH., October 14, 1905.
Gentlemen—You can refer anyone to me in regard to the Smalley motor; my motor runs perfectly. There is one thing about your motor that you do not mention—IT IS SELF STARTING. My motor starts just as sure as steam; it has not stood over ten hours; if it has I only have to turn the flywheel back one-quarter turn in the morning, but that is all for the day. Your rotary timer starts the engine every time. I don't think you mention this in your catalogue, but for a perfect motor it can't be beat. Yours truly, CAPT. W. M. F. DAGWELL.

Bay City, Mich., June 10, 1905.
SMALLEY MOTOR CO., Bay City, Mich.
Gentlemen—After using the 12 H. P. engine I am pleased to report to you that the engine has proved far beyond my expectations. In all my use of the engine I have never known it to miss an explosion. I have kept actual count of twenty-seven times I have started engine after having made stops at various points along the river and in twenty-six of these twenty-seven times I have never used either starting lever or turned a wheel, simply starting engine by means of the commutator. IT IS SELF STARTING. Years very truly, CHAS. CORVELL.

BRENNAN MOTOR CO., SYRACUSE, N. Y.
GENTLEMEN—The 20 H. P. Motor I bought of you three years ago, to run my ice harvester, is a dandy. It is simple, easy to control and cheap as to fuel. I did my threshing with it, running a large separator, with blower for stacking, and it seemed to run with as much power, if not more, than the large steam engine. Crowds of people came to see the little thing run such a large machine and do the work so easily. It took about three hours to thresh over 400 bushels of grain and we did not stop once. Any one wanting a motor will make no mistake if they get a Brennan. Yours very truly, J. B. HAUSE.

Whitewash Your Buildings A Perfect Ignition Device

At Lowest Cost

With a Progress Universal Spraying Machine. One man can apply whitewash or cold water paint 25,000 square feet of surface in one day and do better work than with a brush. It is also adapted for spreading disinfectants, destroying insect pests and diseases on trees, vegetable and other plants, extinguishing fires, washing windows, wagons, etc. and other purposes. The machine is really a little water works system on wheels because the easy movement of the pump develops a pressure exceeding 40 pounds, and will raise the liquid more than 80 feet higher than its own level. The Progress, 12 gallon size, costs only \$24.00; its 20 gallon size, \$30.00. It will last a lifetime and pays for itself the first year. Other types of machines sold as low as \$5 and \$10. Write for detailed description.

For Gas and Gasoline Engines

is the Edison Battery and Spark Coil. Ensures constant speed in Gas Engines and Motor Boats. The Batteries deliver a high constant current to the coil which is specially wired to yield a hot spark every time. This combination obviates all ignition troubles. Is surer and more economical than any other sparking device. Sold by dealers everywhere. Send for name of nearest dealer, and booklet "Battery Facts," containing valuable ignition information.

"Probably No One Thing

Has Given a Greater Stimulus to Saving Than Has the Development of Insurance, and the Endowment Policies in Connection With It."—From the Principles of Economics, by Fetter.

Under this plan you can save money and insure your life at the same time.

Every Up-To-Date Man Should Look into Endowment Insurance. For an annual payment by him (which is never increased) he is guaranteed the return of a sum of money, with dividends added, all to be drawn out upon reaching a certain age.

He also has the Company's pledge to pay the full amount of policy in the event of death, even if it were to occur the day after the payment of the first premium.

Prudential Policies have many benefits such as cash loans, cash dividends, cash surrender values, paid-up insurance and automatic extended insurance. No restriction as to residence, travel or occupation of policy-holder.

Would you like to learn more about The Prudential's Excellent Endowment Policies? If so, fill out and mail coupon to-day. We will send the information by next mail.

FREE FOR YOUR DESK

At a cost of thousands of dollars, with the aid of twenty-seven business experts, we have clipped, extracted, preserved business data from thousands of different sources—from magazines, newspapers, books, correspondence courses, from actual business experience. And all this data we have boiled down, classified, arranged and indexed into one complete business Britannica.

There are dozens of books on accounting, advertising, salesmanship, business letter-writing, but the Business Man's Encyclopedia is a condensation of them all. It deals not merely with one department of business, but with all departments—from the purchase of raw materials to the sale of the finished product—from advertising and selling to credits and collections.

One man under ordinary conditions could not gather in a lifetime one-tenth of the business information these books contain. Where the average business man sees one article, reads one book, meets one business man these twenty-seven experts have seen a hundred. And the best of what they learned they condensed in these THE MAGAZINE OF BUSINESS books for you. Employer or employee, you need these books in your office, on your desk, or in your library.

System, the magazine, is essential to business success. It tells every month all that is new in business to save time—all that is good in business to make money—225 or more pages of indispensable information for business men. Through SYSTEM you can learn all that anyone can possibly tell you about system and business methods. It will give you each month dozens of clever advertising, selling and manufacturing plans that have built some of the greatest retail, wholesale and manufacturing concerns in America. The price of SYSTEM is two dollars a year. It is worth a great deal more than that to any alert man with his eyes on the main chance.

W. P. CHASE & Co.: "We would not have SYSTEM discontinued now though the price were raised to \$10 a year."
W. F. JOHNSON: "Secured one idea from SYSTEM that solved the hardest problem in my department."
Send \$2.00 to-day for a full year's subscription to SYSTEM. At once we will send you free a full cloth bound set of the Business Man's Encyclopedia—in two volumes—all transportation charges prepaid. Write your name on the margin of this advertisement—tear out—mail to us to-day with a two-dollar bill. Better still, include \$1.00 extra (\$3.00 in all), and we will bind the books for you in the finest flexible Morocco and gold the edges.

BUILD YOUR OWN BOAT
By the **BROOKS System**
10,686 NOVICES
—most of them with no tool experience whatever—built boats by the Brooks System last year. Over fifty per cent. have built their second boats. Many have established themselves in the boat building business.
If you can drive a nail and cut out a piece of material from a full size pattern—you can build a Canoe—Row-boat—Sail-boat—Launch—or Yacht—in your leisure time—at home.
The Brooks System consists of exact size printed paper patterns of every part of the boat—with detailed instructions and working illustrations showing each step of the work—an itemized bill of material required and how to secure it.
All you need is the patterns, costing from \$2.50 up—a no materials from \$5.00 up. Only common household tools required.
We also furnish complete boats in the Knock Down form—ready to put together. Satisfaction guaranteed or money refunded.
Our big free catalog tells how you can build boats all styles—all sizes.
