A Dividend Earning FURNACE

AUTUMN'S golden day should be made a most profitable forerunner of Winter's frigid reign by following the example of thousands who have found, to their delight and the good health of their bank accounts, that the

PECK-WILLIAMSON UNDERFEED FURNACE Saves 1-2 to 2-3 on Coal Bills

We might grow eloquent ourselves in telling of this modern furnace-marvel, with all the fire on top, which gets as much heat out of the cheapest coal as high-grade anthracite will yield in an Overfeed. We prefer, however, to speak through the enthusiastic and voluntary testimony of those who know and want others to know the exclusive saving, lasting worth of the Underfeed.

Mr. JOSEPH A. WARREN writes from Cumberland Mills, Maine, and Maine folks know just what cold weather is:

"I have used the Underfeed Furnace one Winter with ENTIRELY SATISFACTORY results. I find that a ton of soft slack coal will go as far as a ton of anthracite coal costing TWICE AS MUCH. We have no dust in the house and the furnace consumes all gas and smoke. The heat is regular and we have abundance of pure, warm air."

Our Underfeed booklet is crowded with fac-simile testimonials just as cheerful. Can't we send it to you? Heating plans and services of our Engineering Department are yours—FREE. Write to-day, giving name of local dealer with whom you prefer to deal. Illustration shows furnace without casing, cut out to show how coal is forced up under fire.
