

Prosperity Simplified!

Wherever you live, a small investment for an Ideal Concrete Machine will bring you a profitable, permanent business in the manufacture of Concrete Building Blocks. Previous experience unnecessary. Read what one machine did in thirty days.

Taylorville, Ill., 4, 30, 06.
IDEAL CONCRETE MACHINERY CO., South Bend, Ind.

Sirs: We have had our Ideal Machine going every day for a month now with perfect satisfaction. Are getting all the business we can handle. All the blocks we can make for a month are already sold in advance. Must soon have another machine. Please send out of Concrete Block to use in getting out a letter head.

Respectfully,
E. W. COLEGROVE,
Mgr. Litholite Stone Co.

IDEAL Concrete Machines

turn sand, gravel, water and a little cement into building material more durable and ornamental than brick, stone or lumber, and far less expensive. The machine is simple, rapid, and everlasting. Has no cogs, chains, wheels, or gears. The same machine makes blocks in countless ornamental designs and natural stone effect.

Write and learn how easily one man with one Ideal Concrete Machine can start a profitable business wherever people live in houses.

IDEAL CONCRETE MACHINE CO.,
DEPT. E,
SOUTH BEND, IND.

A printed copy of the specification and drawing of any patent in the foregoing list, any patent in print issued since 1862, will be furnished from this office for 10 cents, provided the name and number of the patent desired and the date be given. Address Munn & Co., 361 Broadway, New York.

Canadian patents may now be obtained by the inventors for any of the inventions named in the foregoing list. For terms and further particulars address Munn & Co., 361 Broadway, New York.

Saves 20% to 50% on Power

In nearly every plant one-half the total power goes to waste - it is eaten up in friction. A series of tests made by Prof. C. H. Benjamin, of the Case Scientific School, of Cleveland, Ohio, at sixteen different works, proved that it took over 50 per cent. of the total power of the plant to drive the shafting alone, when run in babbitted bearings. That meant 50 per cent. of the power was unproductive. It showed for the

Peninsular Self-Oiling Roller Bearings

an average saving in friction over the babbitted bearing as follows: 43.2 per cent. for the 1 1/2 inch shaft; 73.6 per cent. for the 2 1/2 inch shaft; and 76.6 per cent. for the 2 1/2 inch shaft.

OUR GUARANTEE:

Without knowing anything whatever about your plant, we guarantee, if you are now using babbitted bearings, to save 10 per cent. of your total power by replacing them with Peninsular Self-Oiling Roller Bearings.

10 per cent. is assured; 50 per cent. has been achieved, and never have we fallen below a saving of 20 per cent.

For any reliable firm we will gladly put the claim to the test by equipping a shaft, or, if desired, their entire plant with Peninsular Self-Oiling Roller Bearings and allow them to be run for 30 to 60 days on trial. If they fail to substantiate our claim, the bearings can be returned at our expense.

Peninsular Self-Oiling Roller Bearings, besides what they save in power, save enormously in belting and general wear and tear. Running in a bath of oil, they are non-heating and not a drop of oil is lost—a saving in oil of 50 per cent. over a babbitted bearing. These bearings are adapted to works of any character.

Write for Our Book on "POWER-SAVING"

giving official tests comparing relative efficiency of the babbitted bearings with the Peninsular Self-Oiling Roller Bearings in reducing friction; also containing letters from companies engaged in all branches of manufacture now using Peninsular Self-Oiling Roller Bearings.

Unless we save 10 per cent. of your total power they can be returned at our expense.
