HINTS TO CORRESPONDENTS.

Names and Address must accompany all letters or no attention will be paid thereto. This is for our information and not for publication. References to former articles or answers should give date of paper and page or number of question. Inquiries not answered in reasonable time should be repeated; correspondents will bear in mind that some answers require not a little research, and though we endeavor to reply to all either by letter or in this department, each must take his turn. Buyers wishing to purchase any article not advertised in our columns will be furnished with addresses of houses manufacturing or carrying the same. Special Written Information on matters of personal rather than general interest cannot be expected without remuneration. Scientific American Supplements referred to may be had at the office. Price 10 cents each. Books referred to promptly supplied on receipt of price. Minerals sent for examination should be distinctly marked or labeled.

(10279) M. O. C. asks: Can you inform us how to copper common iron castings without a battery so they will not rust, or how to whiten them by dipping? A. To copper iron castings, the articles must be made perfectly clean, and then dipped in a solution of 1 1/2 pounds copper sulphate in water to which 1 ounce sulphuric acid has been added. They are then washed and dried.

(10280) W. H. asks: Please give me the best formula for a dry primary battery. A. One of the best dry cells is said to be filled with the following mixture: Oxide of zinc, 1 part by weight; sal-ammoniac, 1 part; plaster of Paris, 3 parts; chloride of zinc, 1 part; water, 2 parts.

NEW BOOKS, ETC.

PRINTING ART. Vol. VII. Cambridge, Mass.: Issued by the University Press, 1906. 4to.; pp. 412.

The volume before us is one of the most luxuriant, from a typographical point of view, that we have ever seen. It should be on the desks of all managers of printing establishments, and every compositor should subscribe for this beautiful publication, which will teach him how to produce the most artistic composition and printing. All of the advertisements are bound in, which is an excellent idea, as they are most informing. There are a large number of inserts showing cover papers of various weights and colors. The text is devoted to articles on the printing art written by experts, and freely illustrated by examples from the very best presses. A large number of samples of commercial work are tipped in. One can see at a glance what the up-to-date printers are doing in the line of commercial work. This publication should be subscribed for regularly by all those who are in a position to buy printing, as it enables them to keep abreast of a rapidly-advancing art. The publication is highly creditable to editor and printer alike.

We have said a good deal about the infinite variety of incomparable Color Designs it is possible to render with

Pennsylvania Interlocking Rubber Tiling

and how, through its employment, elaborate interior effects may be enhanced to an artistic degree far beyond the scope of any other flooring material. While the Architect cannot fail to delight in the execution of ideas calling these wide and exclusive possibilities into play, the MARVELOUS ELEGANCE OF PENNSYLVANIA RUBBER TILING FLOORS LAID IN SOLID COLOR OR TONE IS EQUALLY WORTHY OF ATTENTION.

Where art goes hand in hand with simplicity, the unmatched greens, browns, blues, yellows, reds and tones obtainable in this flooring, vastly heighten and enrich effects which other materials can only restrict. Its peculiar, beautiful finish adds a most attractive sense of softness and warmth to interior schemes.

ALL ARCHITECTS AND BUILDERS SHOULD HAVE AT HAND OUR BOOK OF DESIGNS IN COLOR, with full data regarding PENNSYLVANIA RUBBER TILING, which will be mailed free upon request.

Wouldn't You Like to Own This 16 Shot Repeating Rifle? Only \$7.75

Hopkins & Allen .22 Caliber Repeater

The squirrels and rabbits can't get away from you when you carry this rifle. If you miss one the first time—you have 15 more shots coming almost before he can move. It makes a ramble in the forest a pleasure—productive of full game bags—and all the excitement of quick successful shots.

Description: This is the finest and most reliable repeating rifle ever offered at the price. It shoots 22 long or short or 22 long rifle cartridges—16 shots for shorts and 12 for long or long rifle—and the ejector works like lightning. You can deliver 12 or 16 shots (depending on the cartridge used) almost as quick as you can pull the trigger. THE GAME SIMPLY CANNOT GET AWAY. Quick take-down pattern—full length 36 1/2 in., length of barrel 40 in.—weight 5 1/2 lbs. Has that excellent military bolt action—the first ever put on an American sporting rifle. HAS THE BEST SAFETY DEVICE—A SIMPLE TOUCH OF THE LEVER PREVENTS ACCIDENTAL DISCHARGE. HAS THE ONLY EJECTING DEVICE THAT WILL QUICKLY EMPTY THE MAGAZINE WITHOUT FIRING A CARTRIDGE. HAS MORE UNIQUE, DESIRABLE FEATURES THAN ANY OTHER 22 CALIBER REPEATER. Has beautifully polished walnut stock, military butt plate, very part drop forged—lock work made of spring steel. AN EXCELLENT RIFLE FOR FIELD, FOREST OR GALLERY PRACTICE—SURE TO GIVE SURPRISING PLEASURE TO ITS POSSESSOR.

PRICE—Safe delivery guaranteed—\$7.75—IF YOUR OWN DEALER CANNOT SUPPLY YOU. We publish two delight full stories—"William Tell," the experience of an expert with his first Junior Rifle, and "My First Rifle," by the famous marksman, Capt. Jack O'Connell, WHICH WE WILL SEND FREE, with our illustrated catalogue of rifles, revolvers and shotguns.

MAGIC Stage Illusions and Scientific Diversions, including Trick Photography

This work appeals to old and young alike, and it is one of the most attractive holiday books of the year. The illusions are illustrated by the highest class of engravings, and the exposes of the tricks are in many cases, furnished by the prestidigitateurs themselves. Conjuring, large stage illusions, fire-eating, sword-swallowing, ventriloquism, mentalism, magic, ancient magic, automata, curious toys, stage effects, photographic tricks, and the projection of moving photographs are all well described and illustrated, making a handsome volume. It is tastefully printed and bound. Acknowledged by the profession to be the standard work on Magic.

By A. A. HOPKINS. 568 pages. 420 illus. Price \$2.50.

JUST PUBLISHED Scientific American Reference Book

12mo. 516 Pages. Illustrated. 6 Colored Plates. Price \$1.50, postpaid
The result of the queries of three generations of readers and correspondents is crystallized in this book, which has been in course of preparation for months. It is indispensable to every family and business man. It deals with matters of interest to everybody. The book contains 5000 facts and is much more complete and more exhaustive than anything of the kind which has ever been attempted. The Scientific American Reference Book has been compiled after gauging the known wants of thousands. It has been revised by eminent statisticians. Information has been drawn from over one ton of Government reports alone. It is a book of everyday reference—more useful than an encyclopedia, because you will find what you want in an instant in a more condensed form. Sixty years of experience alone have made it possible for the publishers of the Scientific American to present to the purchasers of this book a remarkable aggregation of information.

Mute Evidence of Strength

It's an axiom in mechanics that no chain is stronger than its weakest link—that the strength of any piece of machinery is the strength of its weakest part.

The strength of a typewriter is the strength of its typebars. On the typebar and its bearings the chief wear comes—the chief strain comes—and the wearing out first comes. The strength of the Typebar sets the limit to everything.

The picture shown herewith tells its own story. It shows a Remington Typewriter suspended in mid-air from a heavy four-strand copper wire attached to the type on one of the typebars. The entire weight of the machine (28 pounds) is supported on this one bar—all without displacement either of the bar or its bearings. Think of it!

The Remington bar represents skill and care in manufacture carried to the absolute limit. There are THIRTY-THREE distinct processes in the manufacture of this single Remington part.

The result—a typebar which is incomparably stronger and more durable than the typebar of any other writing machine. No wonder the
