Ready Made Gas for Automobiles

"Prest-O-Lite"

Light Without Work, Waiting or Danger

If you try to make gas for your auto lights in the old way, with a generator, you must have patience and wait—you must make up your mind to fix carbide, get water, blow out pipes, clean burners and do a lot of other disagreeable things.

There is one way to escape the difficulties, however—and only one. All the labor, uncertainty and danger of the old-fashioned way can be avoided by getting gas ready for use—generated in advance. That's exactly what Prest-O-Lite gas is—pre-generated acetylene gas, of very high illuminating power, condensed for convenient carrying, and compressed to give even pressure for steady, non-flick-

ering, always reliable, always brilliant light.

There is no labor for the user. You simply turn the gas on and light it when you want it, just as you do the city gas in your home.

When a tank is empty, it can be replaced with a full one for the cost of recharging. Send for our book "Ready-Made Gas for Auto Lights."

We will send you a copy, postpaid, by return mail, with our compliments, for your name and address in a letter or on a post card. Write to-day, to
