

Tex. The object here is to provide a joint arranged to securely unite the meeting ends of adjacent rails with each other to allow expansion and contraction of the rails without their sliding on the joint, thus preventing wear, to insure lateral alignment of the rails, to effectively resist the flange thrust on curves, and to allow the convenient use of the device on steam and electric railways.

#### Pertaining to Recreation.

**SKATE.**—T. SPACIE, Houston, Texas. Mr. Spacie preferably provides the skate with a foot-plate, but embodies in connection therewith substantially similar devices for attaching the skate to the sole and heel of a shoe, as described in former Letters Patent granted to him. Special means are used for securing to the under side of the foot-plate the forward set of rollers for the skate, and other special means are employed for also attaching to the under side of the foot-plate the rearward sets of rollers employed for the skate.

**PUNCHING-BAG.**—C. MCKENZIE, Butte, Mont. The invention is an improvement in bags, such as are used for practice in boxing and exercising. The apparatus embodying the invention includes two bags which are so suspended and adapted to revolve and swing laterally in vertical planes as to afford special advantages for instruction in boxing and exercise in general.

**CONFETTI - CANNON.**—R. KLIEMANDT, Mount Vernon, N. Y. The device is for use upon social occasions and for amusement for the purpose of scattering the substance known as "confetti" over floors and tables and over the persons of participants in various social functions. The invention relates more particularly to a miniature cannon or mortar for causing the confetti or analogous substance to be scattered by means of an explosion.

**CARRIER FOR GAME.**—J. M. PAUL, El Paso, Texas. One purpose of the inventor is to provide a device for carrying game adapted to be worn across the shoulders and held in place by the weight of the load. Another, is to so construct the device that moderately large or small game of all kinds in large or small quantities may be expeditiously, conveniently, and securely placed in position in the carrier and carried with comfort without injury to the game.

#### Designs.

**DESIGN FOR A BOTTLE.**—G. BUTON, Bologna, Italy. In this original and ornamental bottle the inventor produces a design the length of which is about evenly divided between the neck and body portion. The latter is plain in outline, but the neck at its center is gracefully and slightly increased in diameter.

**NOTE.**—Copies of any of these patents will be furnished by Munn & Co. for ten cents each. Please state the name of the patentee, title of the invention, and date of this paper.

### Business and Personal Wants.

**READ THIS COLUMN CAREFULLY.**—You will find inquiries for certain classes of articles numbered in consecutive order. If you manufacture these goods write us at once and we will send you the name and address of the party desiring the information. In every case it is necessary to give the number of the inquiry.

MUNN & CO.

For logging engines. J. S. Mundy, Newark, N. J.

**Inquiry No. 8286.**—For manufacturers of small machinery of brass or iron, such as can be used in model construction work.

"U. S." Metal Polish. Indianapolis. Samples free.

**Inquiry No. 8287.**—For manufacturers of an attachment of a gasoline or gas stove testing automatically the temperature of an oven.

Sawmill machinery and outfits manufactured by the Lane Mfg. Co., Box 13, Montpelier, Vt.

**Inquiry No. 8288.**—For manufacturers of machinery for making silk underwear, stockings and gloves.

I sell patents. To buy, or having one to sell, write Chas. A. Scott, 719 Mutual Life Building, Buffalo, N. Y.

**Inquiry No. 8289.**—For manufacturers of burlap bag turning machine.

Metal Novelty Works Co., manufacturers of all kinds of light Metal Goods, Dies and Metal Stampings our Specialty. 43-47 S. Canal Street, Chicago.

**Inquiry No. 8290.**—Wanted, the address of a party to make closures to fit in a corset.

The celebrated "Hornsby-Akroyd" safety oil engine. Koerting gas engine and producer. Ice machines. Built by De La Vergne Mch. Co., Ft. E. 138th St., N. Y. C.

**Inquiry No. 8291.**—For manufacturers of high-grade stilletes.

**Manufacturers of patent articles,** dies, metal stamping, screw machine work, hardware specialties, machinery tools, and wood fiber products. Quadriga Manufacturing Company, 18 South Canal St., Chicago.

**Inquiry No. 8292.**—For manufacturers of sheet gutta-percha  $\frac{1}{4}$  inch thick, and sheet ebonite No. 14 gauge, also Stubs' steel wire.

Automobile experts are in constant demand at high salaries. Our seven weeks' course is the most thorough and practical, fitting men to drive, handle and repair. Day and evening classes. Special course for owners New York School of Automobile Engineers, 146 West 56th Street, New York.

**Inquiry No. 8293.**—For manufacturers of machinery for cutting and polishing the bevel on plate glass.

**Inquiry No. 8294.**—For manufacturers of match-making machinery.

**Inquiry No. 8295.**—For manufacturers of machinery for sawing logs up into shingle lengths by having it stationed on the log and operated by a small gasoline motor.

**Inquiry No. 8296.**—Wanted, a decorticating machine for South American fibers.

**Inquiry No. 8297.**—Wanted, a malleable cast factory to manufacture a horse release lever.

**Inquiry No. 8298.**—For manufacturers of wood-turning machinery, such as machines for making bungs for beer barrels, also wooden corks, also spikots.

#### HINTS TO CORRESPONDENTS.

**Names and Address** must accompany all letters or no attention will be paid thereto. This is for our information and not for publication.

**References** to former articles or answers should give date of paper and page or number of question. **Inquiries** not answered in reasonable time should be repeated; correspondents will bear in mind that some answers require not a little research, and, though we endeavor to reply to all either by letter or in this department, each must take his turn.

**Buyers** wishing to purchase any article not advertised in our columns will be furnished with addresses of houses manufacturing or carrying the same.

**Special Written Information** on matters of personal rather than general interest cannot be expected without remuneration.

**Scientific American Supplements** referred to may be had at the office. Price 10 cents each.

**Books** referred to promptly supplied on receipt of price.

**Minerals** sent for examination should be distinctly marked or labeled.

(10085) C. S. J. asks: I wish to learn the cause of trichinae in pork. A. The trichina spiralis is a worm, a parasite of the hog. It is often found in great numbers in the flesh of these animals, in the encysted condition but still alive. If such meat is eaten without cooking thoroughly, the parasite is taken into the body and is rapidly propagated. The worm came originally from the rat. As hogs eat rats, they pass into the hog and thence into man. The only preventive is thorough cooking. This kills the trichinae. No rare or underdone pork should ever be eaten. The risk is too great. The cost of immunity is so little, that anyone may be safe. Cook all pork thoroughly. 2. The cause of ptomaine poisoning by eating pork. What causes the presence of the poison, how the poison can be prevented, and whether or not there is any way of detecting the presence of poison before using the meat? A. Ptomains are formed by decomposition. If only fresh food is used, one will be safe from these poisons.

(10086) H. S. N. asks: I have been a reader of your paper for several years, and always enjoy reading it. I should like to submit a problem for solution. The problem is this: Several years ago I took a picture of a fast train while running, a Michigan Central flier, at a point about two miles east of Decatur. On development the plate showed a blur of 1-32 inch, i. e., the pilot did. I used a Vibe extra rapid plate; the focus of the lens was 6 inches; the distance of the engine, the pilot, from the camera, 50 feet; the length of exposure, 1-100 of one second; camera was placed at an angle of 15 deg. with the track. What was the speed of the train? The camera was a Vibe,  $4\frac{1}{4} \times 4\frac{1}{4}$ , meniscus lens. A. The solution of your problem of the speed of the train is not difficult, at least so far as a sufficiently close approximation is concerned. Start with the fact that the image of the pilot moved 1-32 inch during exposure. Since the lens is 6-inch focus and the pilot is 50 feet away, the pilot moved across the line drawn through the center of the lens, 100 times 1-32 inch, or 3.125 inches, since 50 feet is 100 times 6 inches. And since the camera made an angle of 15 deg. with the track, we must divide the 3.125 inches by the sine of 15 deg. to find the distance the pilot moved during the exposure. This gives 12.07 inches as the distance the train moved in the time of exposure, or 1-100 second. In one second it moved 1,207 inches, or 100 feet 7 inches. This is a speed of somewhat over 71 miles per hour. As we said above, this is an approximate solution, but still not far from the result which an exact solution would give.

(10087) J. S. M. asks: Will you kindly answer in your column of Notes and Queries the inclosed questions relative to Roman computation? I suppose the matter is simple enough, but I have never come across any work explaining it, nor any person whom I have asked who could throw any light on the subject. A. Very little is known concerning the method by which the Romans used their very inconvenient notation for performing the ordinary calculations. They are supposed to have used the abacus for all except the most simple problems. This instrument is in common use now by all Chinamen, and it is not difficult for any one to see it used wherever these men may be found. A description of the abacus may be had from any encyclopedia. There was a rod for each denomination of numbers to millions, seven rods each carrying five balls. Another set of short rods corresponded to these, and had one ball sliding on each. They could thus count by fives and carry by tens. Other rods supplied their need for calculating ounces. Further than this their business did not require them to go; they never needed to divide the distance of the sun by the velocity of light. They died in total darkness in regard to both of these data of the universe. As we said at the outset, we do not know the detail of the method by which the Romans made their calculations. Their mode of writing numbers was not like ours by placing like denominations in the same column, but each letter had its significance, and each number could be added by itself on the abacus, since each rod meant a denomination.

(10088) A. N. says: 1. I have seen it stated frequently that a single "ground" on a metallic circuit, while a source of danger, does not impair the transmission. If the potential at a "ground" is 5,000 volts, for instance, does this not mean 5,000 volts above the zero potential of the earth? If so, why does not all the current, if the resistance at the "ground" is low, flow to earth and equalize? A. A single ground on a metallic circuit does not impair the transmission as you state. The amount of electrification that passes to the earth is so small, and the capacity of the earth is so great, that it would take practically an infinite period of time to change its potential. 2. Standing on the ground, can a person touch with impunity one wire of a high-potential circuit if the circuit is free from "grounds"? A. If there was no ground, and no chance for the current to jump and produce another ground, there would be no injury to you in touching a high-potential circuit, but such a condition practically never exists on outside circuits. 3. About what is the resistance in ohms of the human body? A. This varies with the person, the points where contacts are made, and the condition of the flesh where these are made, but it is approximately 2,000 ohms. 4. What is the minimum strength of current the human body can endure? A. You probably mean the maximum. This also varies with the person, and the condition of the body, from 0.5 to 1 amperé.

(10089) F. J. M. says: Will you please answer the following questions through Queries column of your paper: 1. What is a Faradic brush? Please give a short description of it. A. We believe you refer to the brush made of wire bristles, which are connected to one terminal of the coil, while the other terminal is connected to a plate on which the hand rests, thus sending the current from the coil to the brush, the head, and back to the coil through the hand. 2. Does it make any difference what kind of cells are used in connection with a physician's coil? A. Any kind of battery can be used. A good form of dry battery is the most convenient. Always give full name and address, as we might wish to answer your query by mail.

(10090) F. G. says: Please print formula for making a vibrator jump-spark coil for a 3-horse-power engine. A. SCIENTIFIC AMERICAN SUPPLEMENT, No. 1402, price ten cents, gives full directions for winding induction coils of various sizes. One giving a spark 1 inch long would be large enough for your purpose.

(10091) J. B. A. says: Is there any cheap way one can fix a camera so as to make a picture direct on bromide paper, so that you will not have to make a negative, then a print? I thought that there might be an arrangement, attached to the lens, so as to change the image on the ground glass, so that when you develop the negative it will appear like a positive. If an arrangement of this kind can be made, will it decrease the light coming through the lens, and how much? A. There is no arrangement by which you can obtain a positive by exposing the bromide to the object through a lens. The negative differs from the positive in other respects than in the inversion of the image. The tintype process appears to do this, but if you look at it carefully you will find that the positive is a perverted image of the object. We fail to see any advantage in such an arrangement, as duplicate copies could not be obtained. If you increase the number of lenses through which the light passes, the image will not be as bright.

(10092) W. D. W. says: Will you be kind enough to answer the following questions for one who is anxious to know and who has the greatest respect for your opinion on scientific matters? 1. Will electric wires, furnishing current for arc lights coming in contact with street trees, injure them, that is, when the insulating covering has worn off from rubbing against the branches of the tree? One of the tree and park commission of this city (Columbia, S. C.), a college professor and a very intelligent gentleman, insists that the electricity, that is, all that is taken by the tree in wet weather, will do no harm, while I hold to the opinion that it will ultimately kill it, and I wish to know which one of us is wrong. A. We have found by experience that leakage from electric arc light wires does injure the limbs of trees, particularly when the difference of potential is very great, although we do not believe it would kill the tree unless it was very young. 2. When a tree has been killed by escaping electricity, how long a time should elapse, in case the leak be located and stopped, before it will be safe to put another tree in its place? A. We see no reason why another tree cannot be put in at once if the ground has been removed. 3. Some very large oaks that are exposed to the smoke from the railroad workshops have died very recently, and I am anxious to know if the smoke is responsible for their dying. The shops have been there for a long time, and it seems that if the smoke is the sole cause the trees ought to have died long before this time. It may be possible, however, that loss of vitality on account of age may be partly responsible for their dying. A. If the trees are very close to the top of the smoke-stacks, we have no doubt that the trees have lost some vitality on account of it, as the products of combustion are very destructive to vegetable life, but the trees would have to be under the direct influence of the smoke.

#### NEW BOOKS, ETC.

**LOYD'S REGISTER OF AMERICAN YACHTS, 1906.** By the Committee of Lloyd's Register. New York: Lloyd's Register of Shipping, 15 Whitehall Street. 384 pages. 35 colored illustrations of flags of the United States and Canada. Price, \$7.50.

It was as long ago as 1874 that a small but complete volume containing the register of yachts was issued in New York. Since that time, publications of a like character have been local, rather than national, in scope, confining themselves to the larger yachts and clubs of the Atlantic seaboard only. In 1877 the Committee of Lloyd's Register of British and Foreign Shipping was requested by British yachtsmen to classify yachts after the same plan as merchant vessels. The work thus begun continued to the present time. In 1902, in response to a demand from American yachtsmen, the committee issued a similar Register of American Yachts, which has been continued annually to the present date. In the present volume for 1906, an entirely new plan has been adopted in the arrangement of the work. The introduction of other types of motor than the steam engine has removed the necessity for dividing yachts into two divisions, steam and sail. Consequently, all yachts in the present volume are grouped in one alphabetical list. The almost universal use of the internal-combustion engine has called for a more complete description of this type, and the diversity in hulls has called for new particulars descriptive of the details of houses and cabins. In quality of paper, text, and illustrations, this excellent work fully up to those which have annually preceded it. The first 260 pages consist of the register, which gives the full particulars concerning the construction, rig, leading dimensions, designer, builder, and place and date of launch, the machinery, the owner's name, and the home board of registry. Particularly handsome are the thirty-four colored plates, giving the flags of yacht clubs and the flags of private owners, following which are the particulars of the American and Canadian yacht clubs, lists of yacht designers, engineers, builders, etc., also an alphabetical list of yacht owners.

### INDEX OF INVENTIONS

For which Letters Patent of the

United States were Issued

for the Week Ending

July 31, 1906.

AND EACH BEARING THAT DATE

(See note at end of list about copies of these patents.)

Adjusting and fastening ring, C. Schmidt.....	827,267
Aerodrome, J. B. Kramer.....	827,157
Air brake, W. H. Collins.....	827,421
Animal head, artificial, F. Frankl.....	827,357
Animal trap, J. J. Crowson.....	827,215
Awning hood, S. H. Voorhees.....	827,483
Bag frame lock, L. B. Prahar.....	827,563
Bandage and dressing retainer, suspensory, J. L. Boehm.....	827,207
Bars of stock, mechanism for feeding, Pearson & Roberts.....	827,660
Battery, alkaline, T. A. Edison.....	827,207
Bearing, roller, J. M. & S. D. Horger.....	827,638
Bearings, making adjustable, F. Wolf-jager.....	827,135
Bearings, mold for babbitting, C. Remelius.....	827,466
Bed rests and chair backs, armpit crutch for, A. S. Turner.....	827,125
Bedclothes clamp, I. B. Nickles.....	827,260
Bell, electric, E. J. Burke.....	827,077
Binder, loose leaf, F. Egge.....	827,298
Binder, loose leaf, J. S. McDonald.....	827,461
Binder, temporary, W. S. Mendenhall.....	827,697
Biscuit making machine, G. Herbert, Jr.....	827,444
Blackleading machine, W. H. Nicholas.....	827,557
Blast furnace charging apparatus, W. Kennedy.....	827,155
Block, sanitary disinfecting and deodorizing, J. T. Freese.....	827,092
Block signal, safety, L. V. Greene.....	827,628
Boats, means for propelling and steering or guiding, H. Bachman.....	827,202
Boots and shoes, machine for paring and finishing, H. G. Rodges.....	827,570
Bottle holder, nursing, A. H. Oberg.....	827,559
Bottle, non-refillable, A. & D. Celenza.....	827,212
Bottle washer, J. T. H. Paul.....	827,388
Bottling machine, Ortman & Herbst.....	827,262
Box blanks, machine for making wire bound, W. P. Healy.....	827,097
Box, or carton setting up machine, W. S. Scales.....	827,671
Bracket, self-closing, W. I. Macomber.....	827,164
Bracket hook, E. A. Graham.....	827,627
Brake head, G. A. Woodman.....	827,200
Brick, ornamental, F. Pedrick.....	827,464
Brush, fountain, B. D. Knickerbocker.....	827,376
Brush holder and sterilizer, tooth, D. M. Hitch.....	827,308
Brush, scrubbing, J. Baumruk.....	827,074
Bucket, automatic, Clukies & Hazell.....	827,080
Buggy top joint controller, Nimmo & Long.....	827,651
Butter cutter, G. Ericson.....	827,622
Butter cutter, P. Holmberg.....	827,634
Buttons, etc., chuck for holding pearl, L. W. Holub.....	827,309
Cabinet, A. J. Murphy.....	827,649
Cabinet for holding account books, W. E. Wright.....	827,340
Cables, clamp and support for telegraph and telephone, H. E. Sheeley.....	827,573
Cake depositing machine, E. Herisse.....	827,306
Calcing furnace, T. A. Edison.....	827,089
Cans and jars, machine for lining covers for, J. Brenzinger.....	827,414
Candles, lamps, etc., wick for, V. Pfersdorff.....	827,176
Car door fastener, F. L. Estes.....	827,352
Car door opener, L. D. Gibson.....	827,526
Car end bracing, H. W. Wolff.....	827,489
Car fender, J. V. Battram.....	827,082
Car handling and dumping apparatus, W. V. Keefe.....	827,373
Car, railway, G. H. Hopkins.....	827,446
Car, railway, H. S. Hart, et al.....	827,632
Car, railway ballast, H. S. Hart, et al.....	827,633
Car, self-propelled, P. H. Batten.....	827,408
Car stake, R. V. Sage.....	827,266
Car stake and brace combined, J. C. Herrmann.....	827,307
Car step, C. C. Hummel.....	827,240
Cars, bolster for railway, W. W. Meissner.....	827,646

Cars, dumping and caging apparatus for mine, T. Fisher 827,354  
 Cars, stake for the sides of railway, T. R. Brown 827,501  
 Carbonating apparatus, F. Robbin 827,567  
 Carburetor, W. W. Grant 827,094  
 Carburetor, R. S. Lawrence 827,643  
 Carpet or rod holder, stair, D. Baltzer 827,073  
 Cart, snow loading and dumping, C. G. Ostersten 827,657  
 Cartridge, C. A. Bailey 827,600  
 Cattle stanchion, H. D. Elliott 827,221  
 Cement clinker by flame impingement and apparatus therefor, burning, C. Ellis 827,517  
 Cement, magnesia, E. Bidtel 827,286  
 Cement post for wire fences, O. Fleming 827,224  
 Cements, composition of matter to be used in making waterproof and polishable, Paul O. Krottnauer 827,158  
 Ceramic product, M. M. Meran 827,550  
 Chair, See Hammock chair.  
 Chair, W. J. Fountain 827,225  
 Chair, M. F. Schrenkeisen 827,398  
 Cheese cutting machine, H. Gross 827,305  
 Cigar case, M. Niell 827,558  
 Cigar filler and preparing same, O. Tyberg 827,126  
 Circuit breaker, automatic magnetic, W. M. Scott 827,469  
 Cleaning apparatus, air, G. J. Kindel 827,536  
 Cleaning apparatus, P. Roach 827,121  
 Clinker extractor, J. R. Place 827,591  
 Clock, electrically wound, A. De Vos 827,218  
 Clock striking mechanism, L. L. Volpo 827,275  
 Closet sanitary device, A. F. Lesler 827,162  
 Cloth on the bias, device for marking or cutting, S. Gould 827,233  
 Clutch, C. A. Sturtevant 827,475  
 Clutch, friction, G. E. Franquist 827,091  
 Clutch, friction, W. E. Magie 827,316  
 Clutch mechanism, friction, T. S. Miller 827,382  
 Coal chute, extension, F. S. Converse 827,349  
 Coal tippie, J. S. Pates 827,500  
 Cook and expansion valve, combined stop, F. W. Felsberg 827,521  
 Cook, curb, C. I. Wilkins 827,593  
 Coffin pedestal, W. R. Sparkman 827,578  
 Coil former, J. W. Lundskog 827,315  
 Coin tester for slot machines, M. D. Sadler 827,327  
 Collar, E. L. Hoover 827,637  
 Collar fastener, J. A. Coyner 827,084  
 Collar, harness breast, T. D. Gordon 827,232  
 Collars, machine for folding turnover, Messer & Joslyn 827,253  
 Collector ring, H. Geisenhoner 827,360  
 Concrete pile, J. Kahn 827,535  
 Concrete structures, anchorage for, J. A. Brown 827,613  
 Condenser, N. P. Towne 827,479  
 Condenser, steam, A. Pennell 827,114  
 Controller and dimmer switch, combined, J. W. Pierce 827,663  
 Cord knoter and cutter, combined, J. E. Quinn 827,666  
 Core, W. P. Frey 827,223  
 Core making machine, W. H. Larrison 827,541  
 Cotton planter and fertilizer distributor, combined, A. C. Taylor 827,328  
 Cotton, treating, G. D. Burton 827,293  
 Counter, revolution, H. P. C. Browne 827,614  
 Cover, machine, R. A. Bostelman 827,412  
 Creaming can, H. A. Arvig 827,495  
 Crib construction, F. Simpson 827,186  
 Cross tie, sectional metallic, J. P. Ashby 827,343  
 Cultivator, W. C. Children 827,078  
 Cultivator attachment, C. M. Weempe 827,337  
 Current collector, Linden & Hieserbaum 827,314  
 Current motor, alternating, M. Milch 827,319  
 Current tap and lamp socket, swiveling, C. F. Howes 827,310  
 Curtain fixture, E. F. Henderson 827,151  
 Curtain pole bracket, G. F. Taft 827,272  
 Curtain shade fixture, C. W. Moore 827,256  
 Cuspidor, W. C. Kirk 827,537  
 Cuspidor or spittoon, P. M. Freer 827,428  
 Dash pot, W. E. Whitney 827,339  
 Dental instrument, L. H. Crawford 827,507  
 Dental swaging apparatus, L. H. Crawford 827,548  
 Dedicating apparatus, J. C. McLachlan 827,172  
 Dedicating or evaporating apparatus, W. E. Jaques 827,153  
 Desk and seat, combined, H. G. Lippard 827,245  
 Die stock, W. E. Brooke 827,209  
 Die stock, H. W. Oster 827,656  
 Dish pan, J. J. Meyer 827,168  
 Door securer, G. H. Foster 827,624  
 Doors, etc., registering locking bolt for, J. F. Pixley 827,177  
 Drill, A. A. Caspari 827,211  
 Drill grinding machine, Morgan & Heald 827,459  
 Driving mechanism, velocipede, A. Schaad-Voegel 827,571  
 Dust separator and collector, combined, O. M. Morse 827,460  
 Dye and making same, ortho-oxymonoazo, K. Schirmacher, et al. 827,468  
 Ear trumpet, C. W. Levalley 827,645  
 Earthenware, etc., pipe joint for, C. H. & E. H. Bentley 827,409  
 Eaves trough hangers, machine for forming, H. A. Gibbs 827,229  
 Egg beater, A. Stewart 827,474  
 Electric alarm, W. O. Rehr 827,120  
 Electric light support, C. White 827,109  
 Electric machine, dynamo, L. A. Tirrill 827,331  
 Electric machine, static, O. Bayedorfer 827,497  
 Electric signaling, J. E. Struble 827,269  
 Electric switch, G. W. Richardson 827,181  
 Electric switches, controlling, C. E. Eveleth 827,353  
 Electroplating cylindrical articles, apparatus for, R. C. Totten 827,478  
 Electrostatic separation, G. W. Pickard 827,115  
 Electrostatic separation, apparatus for, G. W. Pickard 827,116  
 Elevating jack, T. J. Cope 827,585  
 Elevator, A. J. Myer 827,189  
 Elevator and carrier, J. M. Boyd 827,689

DESIGNS.

Table listing various designs with item names and page numbers, including 'Badge, F. B. Davison', 'Bottle, G. Buton', 'Cake stand, H. Panovitz', etc.

TRADE MARKS

Table listing trade marks with item names and page numbers, including 'Battery cells, hard rubber, American Hard Rubber Co.', 'Books, account, R. Hollingworth', 'Boots and shoes, leather, H. W. Crooker', etc.

Table listing various items with page numbers, including 'such instruments, M. B. Hern', 'Washing machines, bottle, M. C. Rosenfeld', 'Washing powder, D. S. Brown', etc.

LABELS.

Table listing labels with item names and page numbers, including '"D-Lish-Us Gum," for chewing gum, American Vending Machine Co.', '"Daisy," for canned lobster, J. A. Neville', etc.

PRINTS.

Table listing prints with item names and page numbers, including '"Autocrat and Baronial Backs, Bridge Series, Congress Playing Cards," for playing cards, United States Playing Card Co.', '"Captain Kidd Back, Congress Playing Cards," for playing cards, United States Playing Card Co.', etc.

Index of Inventions for which Letters Patent of the United States were Issued for the Week Ending August 7, 1906.

Table listing inventions with item names and page numbers, including 'A-frame, Ferris & Magle', 'Agricultural implement, G. C. Stanley', 'Air brakes and means to start automobiles, G. W. Young', etc.

Table listing inventions with item names and page numbers, including 'Car underframe, draw bar spring pocket', 'Car wheel, self oiling, R. F. Phillips', 'Carbide manufacture of, H. L. Hartenstein', etc.

Table listing inventions with item names and page numbers, including 'Gas main bag, J. H. White', 'Gas, producing, H. Gerdes', 'Gear, firing, S. A. S. Hammar', etc.

**"Star" Lathes**  
Automatic Cross Feed  
FOR FINE, ACCURATE WORK  
Send for Catalogue B.  
SENeca FALLS MFG. CO.  
695 Water Street,  
Seneca Falls, N. Y., U. S. A.

**Engine and Foot Lathes**  
MACHINE SHOP OUTFITS, TOOLS AND SUPPLIES. BEST MATERIALS. BEST WORKMANSHIP. CATALOGUE FREE  
SEBASTIAN LATHE CO., 120 Culvert St., Cincinnati, O.

**PATENTS**  
Our Hand Book on Patents, Trade-Marks, etc., sent free. Patents procured through Munn & Co. receive free notice in the SCIENTIFIC AMERICAN  
MUNN & CO., 361 Broadway, N. Y.  
BRANCH OFFICE: 625 F St., Washington, D. C.

**Keystone Well Drills**  
for Artesian and Ordinary Water Wells; Mineral Prospecting and Placer Testing for Dredgers; Deep Drilling for Oil and Gas. Contractor's Blast Hole Drilling, River and Harbor Exploration, etc. Our five catalogs are text-books in these lines.  
KEYSTONE WELL WORKS  
Beaver Falls, Pa.

**ORIGINAL BARNES Upright Drills**  
Positive Feed  
10 to 50-inch Swing  
Send for Drill Catalogue.  
W. F. & JNO. BARNES CO.  
(Established 1872)  
1999 Ruby St., Rockford, Ill.

**Asbestos and Magnesia Products**  
STEAM PIPE AND BOILER COVERINGS. ASBESTOS PACKING (For all purposes). ASBESTOS FIRE-RESISTING CEMENTS. ASBESTOS BUILDING MATERIALS.  
"J-M" ASBESTOS ROOFING. ASBESTOS FABRICS. KEYSTONE HAIR INSULATOR. ELECTRICAL SUPPLIES.  
H. W. JOHNS-MANVILLE CO.  
New York, Milwaukee, Chicago, Boston, Philadelphia, St. Louis, Pittsburg, Cleveland, New Orleans, Kansas City, Minneapolis, Dallas, San Francisco, Los Angeles, Seattle, London.

**New Light**  
CARBURETTED AIR  
THROW AWAY your old lamps, stop your gas and electric light bills and use Carburetted Air at the cheapest light known. Can be used for lighting, cooking, heating or power. Every Home can own their own plant.  
CHANCE FOR AGENTS & MANUFACTURERS  
We want a tinner or hardware dealer or agent in every county to manufacture and sell under our patent on a royalty basis. This is a chance to make a fortune. Any tinner can make the carburettor. Write for particulars.  
AMERICAN AIR LIGHT AND HEAT CO.  
42 Broadway - New York City.

**GAS ENGINE DETAILS.—A VALUABLE** and fully illustrated article on this subject is contained in SUPPLEMENT No. 1292. Price 10 cents. For sale by Munn & Co. and all newsdealers.

**Whitewash Your Buildings**  
At Lowest Cost  
With a Progress Spraying and Whitewashing Machine. One man can apply whitewash or cold water paint to 10,000 square feet of surface in one day and do better work than with a brush. It is also adapted for spreading disinfectants, destroying insect pests and diseases on trees, vegetables and other plants, extinguishing fires, washing windows, wagons, etc., and other purposes. The machine is really a little water works system on wheels because the easy movement of the pump develops a pressure exceeding 80 pounds, and will raise the liquid more than 80 feet above its own level. The Progress, 12 gallon size, costs only \$21.00; the 20 gallon size, \$30.00. It will last a lifetime and pays for itself the first year. Other types of machines sold as low as \$9 and \$10. Write for detailed description.  
Dayton Supply Co., Dept. R, Dayton, O.

**How To Increase Your Business**  
READ carefully, every week, the Business and Personal Wants column in the Scientific American  
This week it will be found on page 122.  
Some week you will be likely to find an inquiry for something that you manufacture or deal in. A prompt reply may bring an order.  
Watch it Carefully

**Edison Spark Coil**  
Reduced from \$3.25 to \$2.50  
It contains more copper than any other, but the great demand has enabled us so to reduce the price that you can now afford to throw away a "cheap" coil. With the Edison Battery it gives the most gas or gasoline engine revolutions for a dollar. The Edison cell never tires and is the cheapest form of battery energy; the Edison Coil transforms the largest portion of this energy into heat in the spark. This is scientifically proved in "Battery Sparks." Write for it.

**EDISON Manufacturing Company**  
25 Lakeside Ave., Orange, N. J.  
31 Union Square, New York  
304 Wabash Ave., Chicago  
25 Clerkenwell Road, London, E. C.

**THE MIETZ & WEISS OIL ENGINES**  
Stationary 1 1/2 to 80 H. P.  
Marine 3/2 to 100 H. P.  
Use KEROSENE and FUEL OILS. Direct connected Generators, Pumps, Air Compressors, Hoists, etc. Thousands in use in all parts of the world.  
AUGUST MIETZ  
128-128 Mott St., New York, U.S.A.

**It's Easy to Keep Cool!**  
The simplest, smallest, safest, neatest and most successful Motor Fan made is the **Hawlings Patent High-Speed Water Motor Fan**. Can be installed in a few minutes. No operating expenses. Made of high-grade brass. Price 14-in. Fan with complete couplings, \$10.00.  
E. GINTZEL  
150 Nassau St., New York City

**Wilford's Waterproof Cloth**  
light, strong, soft and durable. Made of twisted pure flax thread. It is pliable—will not crack, and is much stronger than cotton. It is positively salt and fresh water proof. The proper goods for Hatch Covers, Boat Covers, Sail Covers, Tarpaulins, Side Cloth, etc. Ten years of success—Every piece stamped. Test its merits with a trial order.  
EDWARD A. BUNKER  
Sole Agent for the United States and Canada  
P. O. Box 1579 NEW YORK

**HOW TO MAKE AN ELECTRICAL** Furnace for Amateur's Use.—The utilization of 110 volt electric circuits for small furnace work. By N. Monroe Hopkins. This valuable article is accompanied by detailed working drawings on a large scale, and the furnace can be made by any amateur who is versed in the use of tools. This article is contained in SCIENTIFIC AMERICAN SUPPLEMENT, No. 1292. Price 10 cents. For sale by Munn & Co., 361 Broadway, New York City, or by any bookseller or newsdealer.

**Scientific Color Printing**  
We have added to our large printing establishment, and now have in successful operation, a most complete **Photographic Color Department** equipped with the largest cameras, best possible instruments and printing machinery for making **Fine Colored Reproductions** by our Photo-Color Process.  
C Paintings, Objects of Art, Rugs, Carpets, Commercial Designs, and articles of merchandise faithfully reproduced in all their natural colors, in any quantity.  
C Periodical Covers, Artistic Book and Catalogue work, Calendars are among our specialties.  
The SPARRELL PRINT  
265 CONGRESS STREET BOSTON

**To Book Buyers**  
We have just issued a new 48-page catalogue of recently published Scientific and Mechanical Books, which we will mail free to any address on application.

### Inexpensive Classified Advertisements

Advertising in this column is 50 cents a line. No less than four nor more than ten lines accepted. Count seven words to the line. All orders must be accompanied by a remittance. Further information sent on request.

#### SALE AND EXCHANGE.

FOR SALE.—The George A. Seaman pipe and hose coupling patent and all for sale. For further particulars address George A. Seaman, Independence, Colo.

FOR SALE.—Going Machine Shop. Reason given for selling. Will bear strict investigation. Situated in Northern Ohio. Natural gas. A bargain if sold at once. Address Machinist, Box No. 525, Tiffin, O.

FOR SALE.—My patent No. 823,986 cream remover. or would take partner for developing same. This is a money-maker. For further particulars, E. S. Bartram, Selma, Ala.

AUTOMOBILE FOR SALE AT A BARGAIN.—A Knox double opposed cylinder touring car, 1906 Model F, roomy and comfortable, powerful hill climber, never out of order, has elegant top, glass front, and full equipment, and used only a short while. The reputation of the Knox cars is too well known to need more description; the magnificent score of their car in the Hidden Tour speaks for itself. Address Automobile Bargain, Box 773, New York.

POULTRY PAPER, 44 pages, illustrated, 25c. per year, 4 months, 10c; sample free; 64-page practical poultry book free to yearly subscribers; book alone, 10c; catalogue poultry books free. Poultry Advocate, Syracuse, N. Y.

IF YOU WANT to buy a machine, engine, boiler, power equipment, electrical, steam, pneumatic or other machinery—anything in themachine—tell us and we will see that you get full descriptions, prices, catalogs, etc., from all the first-class manufacturers. We charge nothing for the service. Address Modern Machinery Daily News, Security Building, Suite 10, Chicago.

MANLOVE AUTOMATIC DRIVEWAY GATE.—Always in order; operated by any wheel. Safe, handsome, valuable. 30,000 working. (Canadian rights for sale.) Manlove Gate Co., 272 Huron Street, Chicago, Ill.

#### BUSINESS OPPORTUNITIES.

CAPITAL WANTED.—Have been building two cycle marine engines for five years. Have built and engine some of the fastest launches in the country, among them one which has a record of over 2 1/2 miles per hour. Our engines have more power, speed and durability than 99 per cent. of the engines now on the market. We can manufacture these engines at a large profit if made in favorable lots. Present owners will take the whole value of the plant in stock if company is incorporated. Capitalists address X. Y. & Z., Box 773, New York.

CAPITAL TO INVEST for practical patents of interest to women. Dress, fashion, utility, etc. Only patents filed within six months of interest. Address William F. Eroman, 454 Broome Street, New York.

STEEL WHEELS to fit any wagon or cart. Made any size, any width of tire. Also handy wagons with low wheels and wide tires. Wood wagons with steel wheels, or steel wagons with steel wheels. Log wagons and heavy traction wagons of all kinds, for horses or traction engine power. Steel axles of any size and shape. Address Electric Wheel Company, Walton Square, Quincy, Ill., U. S. A.

WANTED.—Manufacturers of specialties as stated. Bucket bolts with thumb nuts, 3/4 inch swirl washers, thumb screw wheels cast of malleable iron. Ralph Parker, Lakewood, N. J.

WANTED.—Salesman representing machinery, hardware or supply houses to handle a high grade of leather belting on salary or commission basis. Address J. S. C., Box 773, New York.

BARGAINS TO CLOSE AN ESTATE.—All practically new. One Barnes No. 4 1/2 bench lathe screw cutting lathe cost spot cash \$51.75. Price with the tools and dogs \$38. One Barnes friction drill with chuck, cost cash \$40.30. Price \$32. One Eddy three-horse 500-watt electric motor, \$40. One Gray silver-plating outfit, never used, cost \$18. Price \$12. One iron-frame floor-leg hand-reef lathe, very cheap, \$8. These are all bargains. C. H. Jones, 414 Elwanger & Barry Buildings, Rochester, N. Y.

BARGAIN for one desiring a small and well-established manufacturing business, fully protected by patents, clearing \$10,000 annually. Investigation solicited. Inquire Manufacturer, Box 773, New York.

WANTED.—Buyers for our one and two-seated business and pleasure Concord spring wagons. Send for 80-page carriage and harness catalog, free. Box 525, Kalamazoo Carriage & Harness Co., Kalamazoo, Mich.

AGENTS WANTED.—Rubber Grip Burner fits any kerosene lamp, prevents breaking of chimneys, smoking or flickering. Send 25c. for sample. Rubber Grip Burner Co., 74 Park Place, New York.

#### HELP WANTED.

SOME EXCEPTIONAL OPENINGS for electrical, mechanical, architectural and structural draftsmen. Permanent positions. Advancement sure. Salaries \$1,000-\$2,500. Hapgoods, 305 Broadway, New York.

#### PARTNERS WANTED.

WANTED, A PARTNER.—I have a complete plan of a new propelling mechanism, a necessity for all kinds of vessels. It prevents collision, needs less fuel, and controls the direction of the vessel quicker without rudder. Wanted, a capitalist to develop the invention. G. Unzner, 159 Lincoln Avenue, Bronx.

#### POSITION WANTED.

A GOOD MAN OUT OF WORK. Anyone wanting a works superintendent is invited to answer this notice if they pay \$4.00 over for a mechanical executive. George F. Stillman, 117 Summit Ave., Syracuse, N. Y.

# WINCHESTER

## METALLIC CARTRIDGES

FOR RIFLES, REVOLVERS AND PISTOLS

In forty years of gun making we have learned many things about ammunition that no one could learn in any other way. These discoveries and years of experience in manufacturing ammunition enable us to embody many fine points in Winchester make of cartridges not to be found in any other brand. Winchester make of cartridges in all calibers are accurate, sure fire and exact in size. Always ask for Winchester make and insist upon getting it.

Winchester Ammunition and Guns are sold everywhere

WINCHESTER REPEATING ARMS CO.

NEW HAVEN, CONN.

**Rochester Water Still**  
Thoroughly purifies water from any source. Absolutely destroys disease germs in drinking water. No water is pure until distilled through the Rochester Water Still. Sits on any stove and distills from 20 to 30 quarts per day; ample supply for any household. Will save health and money for you. The price is \$12.00 and worth many times its cost. Free booklet.

**WILMOT CASTLE CO.,**  
17A Elm Street, Rochester, N. Y.

**Leader MARINE ENGINES**

Are the most symmetrical in design, accurately constructed of any marine engine made.

The designer of "Leader Engines" has had 20 years of ACTUAL PRACTICAL experience in building automobile and marine engines—each part of every engine is made under his personal supervision—A STRONG DURABLE engine with all parts absolutely INTERCHANGEABLE. 1-2 H. P., only \$75.00 completely ready to install in any launch.

The lowest in Price for actual H. P. developed of any engine made.

Write for our new catalogue—MAILED FREE. It explains gas engines more thoroughly than any other and tells why we can make a good engine at a small price.

**CLAUDE SINTZ, Manufacturer**  
292 So. Front Street GRAND RAPIDS, MICH.

**AIR-COOLED MOTOR CO.,** Lansing, Mich.

Largest Air-Cooled Stationary Engine made. Bore 6 x 6 inches. Cools perfectly. No engine ever constructed with so few working parts. Weight 300 lbs.

**5 H. P. Gasoline.**

**No More Hay Fever**

Pollen and Dust in the nostrils cause Hay Fever.

**6 1/2x CARENCE NASAL SHIELD**

excludes all irritating substances, thereby preventing inflammation. It is a dainty, invisible, thoroughly sanitary device. Normal in price. Send for Booklet. Address **NASAL SHIELD CO.,** 478 Fidelity Trust Bldg., Kansas City, Mo.

# Mrs. Harper Was Surprised

when her husband's policy, on which premium payments had ceased, was paid in full. She did not realize that an Extended Insurance Clause is found in all regular Ordinary Life Insurance policies now issued by The Prudential.

"I was therefore very much surprised," she wrote from her Indiana home, "to be notified within a few days after my husband's death that the claim would be paid in full."

Perhaps YOU would be surprised at the liberal provisions of a Prudential policy. We would like to explain them to you.

Address Dept. 121.

# The Prudential

Insurance Company of America

Incorporated as a Stock Company by the State of New Jersey

JOHN F. DRYDEN, President

Home Office, NEWARK, N. J.

**HESS** That's why he sells 'em cheaper. He pays freight too.

**SELLS** They're easy to buy, easy to run, simple to understand. Have every modern up-to-date feature for cutting down coal bills and increasing heat from

**FURNACES** fuel. Hess teaches you free how to erect this furnace yourself. A 40 page, free book tells the story. Write for it now.

**DIRECT FROM FACTORY**

**HESS WARMING & VENTILATING CO.**  
918 Tacoma Bldg., Chicago.

**Orient Friction Drive Buckboard**  
**\$400**

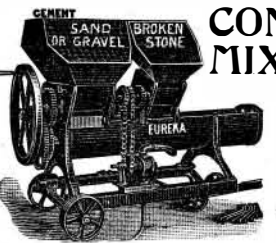

**World's Champion Motor Car**

In the New York Efficiency Contest, May 5th, the two Orient Buckboards entered broke all existing records, one car going 94 miles, the other 106.6 miles, each on two gallons of gasoline. No stops made for repairs or adjustments. This unequalled performance places the Orient first in efficiency, economy and endurance. Peerless in construction, smartest in appearance—4 H. P. Air Cooled, numerous speeds, forward and reverse—absolutely dependable for all-round road work—level roads—hills, sand or mud. Catalogue free with full information. Agents wanted in unassigned territory.

**WALTHAM MFG. COMPANY**  
Waltham, Mass., U. S. A.

**SENSITIVE LABORATORY BALANCE**  
By N. Monroe Hopkins. This "built-up" laboratory balance will weigh up to one pound and will turn with a quarter of a postage stamp. The balance can be made by any amateur skilled in the use of tools, and it will work as well as a \$125 balance. The article is accompanied by detailed working drawings showing various stages of the work. This article is contained in SCIENTIFIC AMERICAN SUPPLEMENT, No. 1184. Price 10 cents. For sale by MUNN & Co., 361 Broadway, New York City, or any bookseller or newsdealer.

**Eureka Machine Co.**  
Manufacturers of

**CONCRETE MIXERS**  
and  
**Block Machines**

Write for Catalog A  
420 N Jackson St., Jackson, Mich., U.S.A.

**"The Battery With-er-bee"**

Fifty-two leading makers of automobiles and motor boats adopted the With-er-bee Storage Battery Igniter because tests showed it to produce the biggest, hottest sparks and to run an average of over 1,500 miles without recharging. Send for booklet and name of satisfied user living near you.

**WITHERBEE IGNITER CO.**  
552 W. 43d St., New York City

A printed copy of the specification and drawing of any patent in the foregoing list, or any patent in print issued since 1863, will be furnished from this office for 10 cents, provided the name and number of the patent desired and the date be given. Address Munn & Co., 361 Broadway, New York.

Canadian patents may now be obtained by the inventors for any of the inventions named in the foregoing list. For terms and further particulars address Munn & Co., 361 Broadway, New York.

**Sy-CLO**  
TRADE MARK

**The Mark of Closet Sanitation**

What disinfection means to the surgeon—what vaccination means to the public health—all that and more does the Sy-CLO Closet mean to the sanitation of the home. The Sy-CLO is more than the best closet—it is a wonderfully efficient and perpetual safeguard of health.

Unlike the ordinary closet, the Sy-CLO has a double cleaning action. Instead of being merely flushed, its bowl is instantly and completely emptied by a powerful syphonic pull from below, and at the same time, thoroughly washed by a copious flush of water from above. The outlet of the Sy-CLO closet is closed by a water seal of unusual depth, that makes the escape of sewer gas impossible.

Being of a single piece of hand moulded china, the Sy-CLO is without crack, seam or crevice that might collect impurity and furnish a breeding place for germs of disease.

The Sy-CLO closet has no surface to chip off or crack, is not affected by acid, water, or wear, and with ordinary care, will outlast the building in which it is installed.

The name "SY-CLO" on a closet guarantees that it is made under the direction and supervision of the Potteries Selling Company, of the best materials, and with the aid of the best engineering skill, and has the united endorsement of eighteen of the leading potteries of America.

Booklet on "Household Health" sent free if you mention the name of your plumber.

Lavatories of every size and design made of the same material as the Sy-CLO Closets.
