MODERN AMERICAN LATHE PRACTICE

By OSCAR E. PERRIGO, M.E. Price \$2.50.

A complete book of 400 pages on The Modern American Lathe. Its development from the earliest times up to the present day; its modern form as constructed by up-to-date builders; its general and special classes of work; the quantity of its output, and its marvelous accuracy. Written by a man who knows not only how work ought to be done, but who also knows how to do it, and how to convey this knowledge to others. It is strictly up-to-date in its descriptions and illustrations which represent the very latest practice in lathe and boring mill operations as well as the construction of and latest developments in the manufacture of these important classes of machine tools.

Modern Steam Engineering in Theory and Practice

By GARDNER D. HISCOX, M.E. Price \$3.00

This is a complete and practical work of 487 pages, dealing with the care and management of Boilers, Engines, Pumps, Superheated Steam, Refrigerating Machinery, Dynamometers, Elevators, Air Compressors, and all other branches with which the modern Engineer must be familiar. It fully describes and illustrates the properties and use of Steam for the generation of power in the various types of engines in use. Slide Valve, High-Speed Corliss, Compound, Multi-expansion engines and their valve gear, the De Laval, Parsons, Curtis and other Turbines are included and fully described and illustrated. Forty-two tables of the properties and application of steam in its various uses are included, which in themselves form a most valuable and instructive section of the work.

Nearly Two Hundred Questions with their Answers on Steam and Electrical Engineering likely to be asked by the Examining Board are included. These if studied by you will help you to procure a license. This book is thoroughly reliable and practical, and not only a guide but a teacher. As a text book it is the latest and best authority on the subject. It is fully illustrated with detail engravings, not to be found elsewhere.

Punches, Dies and Tools for Manufacturing in Presses

By JOSEPH V. WOODWORTH Price \$4.00

A practical work of 500 pages fully illustrated by nearly 700 engravings, being an encyclopedia of Die Making, Punch Making, Die Sinking, Sheet Metal Working, and Making of Special Tools, Sub-presses, Devices and Mechanical Combinations for Punching, Cutting, Bending, Forming, Piercing, Drawing, Compressing and Assembling Sheet Metal Parts and also Articles of other Materials in Machine Tools. Two Hundred and Ten processes are clearly described and fully illustrated. This work is a companion volume to the author's elementary work entitled "Dies, Their Construction and Use." Nothing appears in this volume that has already been published in the author's previous work on "Dies."

Modern Plumbing Illustrated

By R. M. STARBUCK Price \$4.00

A comprehensive and up-to-date work illustrating and describing the Drainage and Ventilation of dwellings, apartments, and public buildings, etc. The very latest and most approved methods in all branches of sanitary installation are given. Adopted by the United States Government in its sanitary work in Cuba, Porto Rico, and the Philippines, and by the principal boards of health of the United States and Canada. 300 pages, 55 full page illustrations.

A special circular describing these books sent on request. Any of these books sent prepaid on receipt of price.

From Missouri:

"Five years ago I took out two policies of \$10,000 each in your company. At the time I made a memorandum on my list of life insurance: 'Due 1916, with possibly an additional two thousand as a dividend.'
"When notified a few days ago that a dividend on my two policies, of \$1,208.60, was due, and that it was mine for the asking, I was surprised and greatly pleased to discover that the prospects were so good for the two thousand dollar dividend being paid.
"I now regret that at the time I took out this insurance in your company, I had not made the amount double."

This Policyholder thought that possibly \$2,000 would be paid as a dividend in 1916, but in 1906—when his policies had been in force only five years—he receives \$1,208.60, and, mark you, this is only one dividend. If the policyholder lives until the policy matures he will have received two other dividends, and if he should die at any time the policy will be paid in full.

Cement Reinforced Concrete Concrete Building Blocks

SCIENTIFIC AMERICAN SUPPLEMENT 1543 contains an article on Concrete, by Brysson Cunningham. The article clearly describes the proper composition and mixture of concrete and gives the results of elaborate tests.
SCIENTIFIC AMERICAN SUPPLEMENT 1538 gives the proportion of gravel and sand to be used in concrete.
SCIENTIFIC AMERICAN SUPPLEMENTS 1567, 1568, 1569, 1570, and 1571 contain an elaborate discussion by Lieut. Henry J. Jones of the various systems of reinforcing concrete, concrete construction, and their applications. These articles constitute a splendid text book on the subject of reinforced concrete. Nothing better has been published.
SCIENTIFIC AMERICAN SUPPLEMENT 997 contains an article by Spencer Newberry in which practical notes on the proper preparation of concrete are given.
SCIENTIFIC AMERICAN SUPPLEMENTS 1568 and 1569 present a helpful account of the making of concrete blocks by Spencer Newberry.
SCIENTIFIC AMERICAN SUPPLEMENT 1534 gives a critical review of the engineering value of reinforced concrete.
SCIENTIFIC AMERICAN SUPPLEMENTS 1547 and 1548 give a resumé in which the various systems of reinforced concrete construction are discussed and illustrated.
SCIENTIFIC AMERICAN SUPPLEMENTS 1564 and 1565 contain an article by Lewis A. Hicks, in which the merits and defects of reinforced concrete are analyzed.
SCIENTIFIC AMERICAN SUPPLEMENT 1551 contains the principles of reinforced concrete with some practical illustrations by Walter Loring Webb.
SCIENTIFIC AMERICAN SUPPLEMENT 1573 contains an article by Louis H. Gibson on the principles of success in concrete block manufacture, illustrated.
SCIENTIFIC AMERICAN SUPPLEMENT 1574 discusses steel for reinforced concrete.
SCIENTIFIC AMERICAN SUPPLEMENTS 1575, 1576, and 1577 contain a paper by Philip L. Wormley, Jr., on cement mortar and concrete, their preparation and use for farm purposes. The paper exhaustively discusses the making of mortar and concrete, depositing of concrete, facing concrete, wood forms, concrete sidewalks, details of construction of reinforced concrete posts, etc.
SCIENTIFIC AMERICAN SUPPLEMENT 1372 contains an article by A. D. Ebers on tests and constitution of Portland cement.
SCIENTIFIC AMERICAN SUPPLEMENT 1396 discusses the testing of cement.
SCIENTIFIC AMERICAN SUPPLEMENT 1325 contains an article by Professor William K. Hatt giving an historical sketch of slag cement.
SCIENTIFIC AMERICAN SUPPLEMENTS 955 and 1042 give good accounts of cement testing and composition, by the well-known authority, Spencer B. Newberry.
SCIENTIFIC AMERICAN SUPPLEMENTS 1510 and 1511 present a discussion by Clifford Richardson on the constitution of Portland cement from a physico-chemical standpoint.
SCIENTIFIC AMERICAN SUPPLEMENT 1519 contains an essay by R. C. Carpenter on experiments with materials which retard the activity of Portland cement.
SCIENTIFIC AMERICAN SUPPLEMENTS 1465 and 1466 publishes an exhaustive illustrated account of the Edison Portland cement works, describing the machinery used.
SCIENTIFIC AMERICAN SUPPLEMENT 1491 gives some fallacies of tests ordinarily applied to Portland cement.
SCIENTIFIC AMERICAN SUPPLEMENT 1561 presents an excellent review by Brysson Cunningham of mortars and cements.
SCIENTIFIC AMERICAN SUPPLEMENT 1533 contains a resumé of the cement industry and gives some valuable formulae.
SCIENTIFIC AMERICAN SUPPLEMENT 1575 discusses the manufacture of hydraulic cement. L. L. Stone is the author.
SCIENTIFIC AMERICAN SUPPLEMENTS 1587 and 1588 contain an able paper by Edwin C. Eckel on cement material and industry of the United States.
SCIENTIFIC AMERICAN SUPPLEMENT 1586 contains a review of concrete mixing machinery by William L. Larkin.
SCIENTIFIC AMERICAN SUPPLEMENT 1583 gives valuable suggestions on the selection of Portland cement for concrete blocks.
SCIENTIFIC AMERICAN SUPPLEMENT 1581 splendidly discusses concrete aggregates. A helpful paper.
SCIENTIFIC AMERICAN SUPPLEMENT 1595 presents a thorough discussion of sand for mortar and concrete, by Sanford E. Thomason.

Each number of the Supplement costs 10 cents. A set of papers containing all the articles above mentioned will be mailed for \$3.50 Order from your Newsdealer or from MUNN & CO., PUBLISHERS, 361 BROADWAY, NEW YORK CITY

The New CADILLAC Model G

Persistent demand by motorists everywhere, especially among Cadillac enthusiasts, for a thoroughly high-grade, medium-powered, four-cylinder automobile, at a price somewhat lower than the large touring cars, has led to the production of our new Cadillac Model G.

Thus early in the season this racy new type has been universally accepted as a notable example of advanced automobile engineering. The motor, conservatively rated at 20 horse power, is finished in its vital parts to gauges that insure mechanical accuracy to the thousandth of an inch. It is equipped with our automatic ring type governor, which when set by the lever at the steering wheel for a certain speed will practically maintain that speed under all road conditions, up hill or down. A new type of muffler is used, giving a silent exhaust, at the same time almost entirely eliminating back pressure.

Direct shaft drive; transmission of a selective type sliding gear, with gears of a new design that facilitates meshing without crashing and grinding. Direct drive on high speed with no gears in mesh. Wheel base, 100 inches; stylish body design.

At every stage of designing and finishing, Model G has received all the care and thought that could possibly be given a car costing twice as much. Like the other Cadillac Models, it is the car for the critical motorist who wants to know why before he buys. Let your dealer show you by giving you a demonstration.

Model G—20 h. p. Four-cylinder, Touring Car; \$2,000. (Described in Catalog G—N)
 Model H—30 h. p. Four-cylinder, Touring Car; \$2,500. (Described in Catalog H—N)
 Model M—10 h. p. Four passenger car; \$950. (Described in Catalog M—N)
 Model K—10 h. p. Runabout; \$800. (Described in Catalog K—N)
 All prices F. O. B. Detroit; Lamps not included.

Send for special Catalog of car in which you are interested, as above designated.
