

BUILD YOUR OWN BOAT

If You are Interested in a Boat of any kind—send for our big free catalog—which tells how 21,311 inexperienced people built boats last year by the Brooks System of exact size patterns of every part and illustrated instructions, covering each step of the work. It contains testimonials from many of these builders and photographs of their boats.

It tells how you can construct any kind of a boat—Rowboat—Canoe—Sailboat or Launch—at a great saving over factory prices. Greatly Reduced Prices. Rowboat and Canoe patterns \$1.00. Launches \$1.50. Motorboat patterns \$2.00. Patterns of all kinds \$1.00. Don't fail to send for the catalog.

Canadian patents may now be obtained by the inventors for any of the inventions named in the foregoing list. For terms and further particulars address Munn & Co., 361 Broadway, New York.

HAYNES

Model T—And what it means

While other makers are putting out their Model D or F we are making our Model T, and we have not skipped any letters of the alphabet, either. For thirteen years we have been making (not assembling) automobiles, always under the keen eye of Elwood Haynes, the original genius of the company, and the pioneer to whose resource and inventiveness almost every automobile in America is, in some respect, in debt. The old situation—Haynes perfecting, rivals afterward copying—exists to-day. Take our rear axle roller drive, for instance. This feature is unique in the Haynes. It takes the place of the bevel gears and makes feasible the previously impossible high-powered shaft-driven car. It was this Model T that upheld the Haynes reputation for reliability in the Vanderbilt Cup race—our regular stock model—the only stock car in the race. Conservatism and progressiveness are combined in the 1907 Haynes.
