

A Famous ELGIN

The G. M. WHEELER Grade Elgin has long been famous for its accuracy and reliability. It is now in great demand in the new models.

For those who want a remarkably true watch at a very reasonable price the right watch is the G. M. WHEELER Grade Elgin.

Right in price—within the reach of everyone—"The Watch that's made for the majority."

Right in style—The new thin model in small sizes.

Right—always right—A wonderfully accurate timekeeper, and susceptible to extremely fine adjustment with the micrometer regulator.

Adjusted to temperature. Seventeen jewels. Ask to see the G. M. WHEELER Grade Elgin.

ELGINS of equal grade and reasonable price for women—desirable new models.

THE SOURCE IS ELECTRICITY

Almost every comfort, convenience and luxury of modern life is dependent upon this force. Under these circumstances, do you think you can make any mistake by devoting a few hours a day to the study of electricity?

Cyclopedia of Applied Electricity

Five handsome volumes—each nearly one foot high—containing the essence of the most successful methods yet devised for the education of the busy workman. The rules and formulas are in every case presented in a very simple manner, and every principle is illustrated with special diagrams and practical examples. Compiled from the most valuable instruction papers of the American School of Correspondence.

OF CURRENT INTEREST

Industrial Alcohol

Its Manufacture and Uses

A PRACTICAL TREATISE

BASED ON
DR. MAX MAERCKER'S "INTRODUCTION TO DISTILLATION" AS REVISED BY DR. DELBRÜCK AND LANGE

COMPRISING
Raw Materials, Malting, Mashing and Yeast Preparation, Fermentation, Distillation, Rectification and Purification of Alcohol, Alcoholometry, The Value and Significance of a Tax-Free Alcohol, Methods of Denaturing, Its Utilization for Light, Heat and Power Production, A Statistical Review, and The United States Law

By **JOHN K. BRACHVOGEL, M. E.**

528 Pages 105 Engravings Price, \$4.00

THE value and significance of a tax-free alcohol have been so widely discussed in the press and periodical literature of the entire country, that it is unnecessary to emphasize the great importance of the subject, especially to our agricultural and industrial interests. For years we have been far behind the nations of Europe in this regard, and in consequence our literature has been sadly lacking in authoritative works covering this phase of industrial activity. This book was designed with the especial purpose of filling this want, and it is the latest and most comprehensive work of its kind which has been published in this country.

It is based upon the researches and writings of the most eminent of Germany's specialists in the sciences of fermentation and distillation. It covers the manufacture of alcohol from the raw materials to the final rectified and purified product. An introductory section deals with the importance of the new law and what it means to the farmer and the manufacturer. Additional sections cover the methods of denaturing, domestic utilization of alcohol for heating and lighting purposes, alcohol as a fuel for power production, and a statistical review. The full United States law is given in an Appendix.

The 105 illustrations are of especial value and excellently supplement the text.

Few in number are those to whom this book would not prove of interest and value. The farmer, the manufacturer, the power-producer, the householder, will all find that denatured alcohol is of such importance to them, that its use and introduction will effect savings and economies which were hitherto impossible of accomplishment.

Send for Descriptive Circular.
