A Dog Day's Talk on FURNACE Truth

WE HAVE a dog day's talk to make to YOU that means BIG MONEY next winter and all succeeding winters to ALL good listeners. Most people look on a heating plant as a necessary money-eater, and they've got plenty of receipted coal bills to prove it. Thousands, however, have learned the valued lesson that the

Peck-Williamson Underfeed Furnace

Saves 1-2 to 2-3 on Coal Bills

There isn't any guess work about this. The Underfeed, fed from below with cheap slack, gives you greater warmth and comfort in clean, even heat than is yielded by top-feed furnaces burning expensive coal. Ask your coal dealer the difference in the price of ordinary slack and the coal you have heretofore used. Underfeed Furnace Owners save that difference and some of them have saved enough within the past few years to give to the Underfeed

The Credit of Paying for Itself

Gases and smoke which are wasted in other furnaces must pass through the flames, are burned and turned into heat in the Underfeed, for all the fire is on top. There is no smothering of flames—the topfeed way. Coal is easily forced, by means of a lever, into the firepot underneath the fire—the rational way. You not only get all the heat units from coal, but combustion is slower and the Underfeed requires less attention than other furnaces.

Hundreds of people have testified to the saving worth of the Underfeed Furnace, and we have fac-simile letters of appreciation from everywhere that we want YOU to see. They will be sent to anyone interested, with one of our Underfeed Booklets, fully describing and illustrating this most economical of furnaces. Heating plans and services of our Engineering Department are also yours—ALL FREE. Write to-day, giving name of local dealer with whom you prefer to deal.
