

## RECENTLY PATENTED INVENTIONS.

The inventions described in this Department were patented through the Scientific American Patent Agency.

## Of Interest to Farmers.

**WEED BURNER.**—A. ITEN, Mountainview, Hawaii Ty. The apparatus is adapted to be used between rows of growing crops to destroy weeds by burning without injuring the crops. A number of liquid fuel burners are used whose flames are directed downwardly to burn the weeds together with any insects thereon, and to destroy any obnoxious animal or vegetable life among the crops.

## Of General Interest.

**MOUNTING FOR PRECIOUS STONES.**—W. R. ELLIOTT, New York, N. Y. The invention consists in so constructing a finger ring or scarf pin that it will be in two hinged sections which are locked together by the act of applying the stone in the mount, thus enabling the ring to be fitted to the finger at a point below the knuckle over which it could not otherwise be passed.

**MANUFACTURE OF SULPHURIC ACID AND SODIUM SULPHATE.**—U. F. BENKER, 129 Rue Martre, Clichy, Seine, France. This is a process of making free sulphuric acid and neutral sulphate of soda by the decomposition of bisulphate of soda, consisting in heating a mixture of bisulphate of soda and of silica in substantially equal proportions, thus preventing the fusion of the bisulphate.

**GLASS HOLDER.**—J. W. BRICKER, Wilmerding, Pa. This holder is adapted particularly for use in dispensing soda water. Its principal advantage lies in the fact that it has substantially no corners or crevices for the collection of dirt so that it may easily be cleaned and kept in a sanitary condition.

**BUILT-UP POST.**—C. F. STEIBER, New York, N. Y. The object of the invention is to produce a post which is built up of a number of pieces set together, and it relates especially to the construction of the base, the capital, and the collar which connects the upper part of the post with the lower section. The form of these parts is such as to facilitate their being stamped from sheet metal.

**FRAME.**—L. SBOIRIG, New York, N. Y. The frame is made up of sheet metal members which are bent upon themselves to form side walls and bent further upon themselves to form inner walls parallel with the side walls and separated therefrom by slots. The side members are connected at the corners by angle members which are fitted in the said slots of the adjacent side members.

## Hardware.

**WRENCH.**—A. L. SHAW, Corinne, Utah. The invention provides a simple wrench by means of which vehicle wheels may be removed easily and expeditiously and which will prevent marring or other injury of the wheel. The device is provided with two pairs of jaws of which one pair may be clamped upon the axle nut, and the other pair on the vehicle wheel hub.

**DOOR FASTENER.**—F. E. RICHARDSON, Manchester, Iowa. The fastener is arranged to act automatically when the door is closed, to hold the same resiliently in closed position. A further object of the invention is to provide a fastener consisting of a catch and a retainer for the catch, the latter resiliently engaging the retainer and being adjustable so that its resistance to disengagement from the retainer can be regulated.

## Pertaining to Recreation.

**CAR FOR OBSERVATION WHEELS.**—A. F. BIAVATI, Freeport, N. Y. The cars are self-balancing so that they will remain in an upright position as the observation wheel revolves. This is accomplished by making the cars in the form of drums with heavy weights at the lower ends and mounting them on rollers in annular tracks in the wheel.

## Pertaining to Vehicles.

**VEHICLE WHEEL.**—I. C. SCUDDER, New York, N. Y. This construction is arranged to permit a tire to be attached to or detached from a wheel while inflated. A detachable rim is provided which carries the inflated tire and this rim may be quickly and easily attached without requiring the use of special tools.

## Designs.

**DESIGN FOR A FRONT MEMBER FOR RACKS OR DRAWERS.**—D. A. B. PLUNKETT, New York, N. Y. The design is in the form of a panel, provided with a handle at the center and a series of bosses are formed on the panel with projecting cubes marked with stars.

**DESIGN FOR A SUPPORTING BRACKET.**—J. KISER, Katalla, Dist. of Alaska. The bracket has the general form of an inverted A and a figure standing on the cross bar of the A holds a slanting bar which extends upward and supports the outer end of the upper cross bar of the bracket.

**NOTE.**—Copies of any of these patents will be furnished by Munn & Co. for ten cents each. Please state the name of the patentee, title of the invention, and date of this paper.

Full hints to correspondents were printed at the head of this column in the issue of August 5th, or will be sent by mail on request.

(10883) E. E. B. writes: Under your heading, p. 139, I read that the "Lusitania" beats all records. Do I understand that she has won her record back from the "Indomitable," which you spoke of in your paper a few weeks ago? A. The "Lusitania" holds the Atlantic record for any type of ship with an average speed of 25.05 knots.

(10884) A. P. McK. says: In your issue of September 12th you call the attention of the public to the fact that there is a growing demand for a noiseless rail joint. Will you kindly answer in your Notes and Queries column if it is a fact that when trains are traveling, say all in east or west direction, that the rails have a tendency to creep in opposite direction to which the train is moving, or do they creep in the same direction that the train is moving, or do they creep at all, for any other reason than contraction or expansion? A. Rails tend to creep in the direction of the traffic. The amount of movement depends upon certain local conditions which are not as yet well understood.

(10885) F. H. says: Please advise me if the word *cheeses* is correct; also state in what way it would be used if correct. Give several different ways. A. The plural of cheese is cheeses. The Century Dictionary has this: "Soft cheeses, such as cream cheese, bath, and Yorkshire cheese, do not keep long." If we should buy five we should not say five cheese but five cheeses. This usage satisfies us.

(10886) A. H. W. says: It is stated that the first suspension bridge ever in existence was in the city of Budapest, and that the Brooklyn bridge was modeled after same. That Budapest had the first subway, and the same was used as a model for the New York Subway. That Budapest has a telegraphic newspaper, viz., that telegraphic messages are at once connected by the instrument with the one bringing the message, printed in newspaper form. A. It would be difficult to determine which was the first suspension bridge; for it is a fact that from time immemorial, in some parts of Asia, suspension bridges have been formed of rope fiber. Those bridges are across comparatively short streams and are very crude, it is true, but they contain the principle. The Brooklyn bridge is by no means the first metal suspension bridge. Early in the nineteenth century a chain suspension bridge was constructed across the Menai Straits in England, which had a span of 580 feet; and the bridge over the river Avon at Clifton, England, also a chain bridge which originally spanned the Thames, are probably as old. Budapest had the first subway, and many of its good points are embodied in our present New York Subway, particularly the kiosks at the top of the stations. For a long time Budapest has had a telegraphic newspaper and also telephonic concerts. The inhabitants of Budapest are very advanced.

(10887) B. F. M. asks for information concerning sunstroke. A. Sunstroke is caused by excessive heat, and especially if the weather is muggy. It is more apt to occur on the second, third, or fourth of a series of hot days than on the first. Loss of sleep, worry, excitement, close sleeping rooms, debility, abuse of stimulants, predispose to it. It is more apt to attack those working in the sun, and especially between the hours of eleven o'clock in the morning and four o'clock in the afternoon. On hot days wear thin clothing. Have as cool sleeping rooms as possible. Avoid loss of sleep and all unnecessary fatigue. If working indoors and where there is artificial heat (laundries, etc.), see that the room is well ventilated. If working in the sun, wear a straw light hat (not black, as it absorbs the heat), etc., and put inside of it, on the head, a wet cloth or a large green leaf; frequently lift the hat from the head and see that the cloth is wet. Do not check perspiration; but drink what water you need to keep it up, as perspiration prevents the body from being overheated. Have, whenever possible, an additional shade, as a thin umbrella when walking, a canvas or board cover when working in the sun. If a feeling of fatigue, dizziness, headache, or exhaustion occurs, cease work immediately, lie down in a shady and cool place, apply cold cloths to and pour cold water over head and neck. If any one is overcome by the heat, send immediately for the nearest good physician. While waiting for the physician, give the person cool drinks of water or cold black tea, or cold coffee, if able to swallow. If the skin is hot and dry, sponge with or pour cold water over the body and limbs, and apply to the head pounded ice wrapped in a towel or other cloth. If there is no ice at hand, keep a cold cloth on the head and pour cold water on it, as well as on the body. If the person is pale, very faint, and pulse feeble, let him inhale ammonia for a few seconds, or give him a teaspoonful of aromatic spirits of ammonia in two tablespoonfuls of water with a little sugar.

## NEW BOOKS, ETC.

**THE AIR AND VENTILATION OF SUBWAYS.** By George A. Soper, Ph.D. New York: John Wiley & Sons, 1908. 12mo.; pp. 244. Price, \$2.50.

This volume is the outcome of studies carried on for two and one-half years for the Board of Rapid Transit Railroad Commissioners for the city of New York and, after that Board went out of existence, for the Interborough Rapid Transit Company, to whom the first New York subway is leased. The work was begun in the summer of 1905 and concluded in 1907. The original data covering about 2,000 pages have never been published, although reports summarizing many of the facts have appeared in the official transactions of the Rapid Transit Commissioners. It has seemed desirable to preface the description of the investigation by a few facts concerning the scientific groundwork upon which the solution of problems of ventilation should be based, and to this end the composition of good and bad air, some mechanical principles of the atmosphere and other matters have been included. The object throughout has been to make available in convenient form an account of the essential features of the investigation, in the hope that the information may be of service to persons not necessarily trained in sanitary science, but interested in knowing what good and bad air consists in and how to deal with it in subways and other inclosed spaces.

**CYCLOPEDIA OF CIVIL ENGINEERING.** Editor-in-Chief Prof. F. E. Turneaure, C.E., Dr. Eng., Dean of the College of Engineering, University of Wisconsin. Eight volumes. Chicago: American School of Correspondence, 1908. 8vo.; pp. 3200, 3,000 illustrations. Price, \$24.

This is a general reference work, and the first of its kind covering the entire field of modern engineering practice. It is particularly suited for the civil, structural, railroad, sanitary, irrigation, hydraulic, and hydro-electric engineer. The different departments have been prepared by a staff of practical experts of the highest professional standing in their particular lines of work. For this reason, the matter is up-to-date and representative of the best engineering methods, and should be of great value to the practical engineer, although primarily intended for the use of students. The work is prepared in the characteristic style of the American School of Correspondence, the subjects being taken up in very simple and clear language, so that they can be thoroughly understood by the student who is studying at home and hence is unable to clear up difficult points by directly questioning his instructor. For this reason abstruse formulae are avoided, and the text is very fully illustrated with diagrams and half-tone engravings. Among the staff who have assisted Prof. Turneaure in the preparation of this work are such men as Prof. A. E. Phillips of the Armour Institute of Technology, author of "Plane Surveying and Irrigation Engineering," and joint author of "Highway Construction"; Walter Loring Webb, author of "Masonry and Reinforced Concrete," "Railroad Engineering," and "Plotting and Topography"; H. P. Gillette, joint author of "Cost-Analysis Engineering"; E. A. Tucker, author of "Steel Construction"; Prof. F. O. Dufour of the University of Illinois, author of "Bridge Engineering and Roof Trusses"; Prof. A. Black of Columbia University, author of "Water-Power Development"; Prof. C. E. Morrison of Columbia University, author of "River and Harbor Improvement"; Prof. A. Marston of Iowa State College, author of "Sewers and Drains"; and Charles B. Ball, chief sanitary inspector of the city of Chicago, joint author of "Plumbing and House Sanitation." Other important sections are those on Statics, Strength of Materials, Mechanical Drawing, and Practical Problems in Construction in Steel and Concrete.

**POLK'S LUMBER DIRECTORY OF THE UNITED STATES FOR 1907-8.** Detroit, Mich.: R. L. Polk & Co., 1907. 8vo.; pp. 1614. Price, \$10.

This immensely valuable trade directory is very comprehensive, much more so than its title would lead one to suppose. It comprises lists of manufacturers of agricultural implements, boat builders, box manufacturers, car builders, carriage and wagon builders, chair manufacturers, cooperage stock, furniture manufacturers, hub and spoke manufacturers, logging railroads, lumber and lumber-mill machinery of all descriptions, piano and organ manufacturers, planing mills, saw mills, ties, posts and poles, veneer manufacturers, woodenware manufacturers, and a host of other allied interests together with laws affecting the lumber interests. This is the third revised edition. We have used the book, and have found it to be reliable.

**THE FUNDAMENTAL CONCEPTIONS OF CHEMISTRY.** By Dr. S. M. Jørgensen, Professor of Chemistry at the University of Copenhagen. Translated by M. P. Appleby, B.A. London: Society for Promoting Christian Knowledge; Brighton, New York: E. S. Gorman, 1908. 32mo.; cloth; 175 pages; illustrated.

Prof. Jørgensen's book belongs to a series of manuals of Elementary Science, and it discusses the more important of the theories forming the basis of modern chemistry. In its divisions into the weight and volume relations of chemi-

cal compounds, the atmosphere, acids, brass, salts, aqueous solutions, oxidation, and reduction and chemical action, the advance and collapse of theories of chemistry are treated in a scientific, historic and biographical manner. The work is intended to accustom a student to the methods of chemical thinking, and in the process he is given the aid of the necessary figures and experiments.

## INDEX OF INVENTIONS

For which Letters Patent of the United States were Issued for the Week Ending

September 29, 1908,

AND EACH BEARING THAT DATE

[See note at end of list about copies of these patents.]

Adding machine, H. L. Fisher.....	899,965
Adding machine, W. S. Horry.....	899,983
Adjustable rake, J. J. Holley.....	899,982
Adjustable table, Marrero & Helwig.....	899,548
Air and gas compressor, F. Elder.....	899,720
Air brake, A. A. St. Clair.....	899,844
Airship, A. R. Silverston.....	900,041
Amusement device, C. Adelhelm.....	899,477
Angle finder, W. Clark.....	899,692
Animal trap, W. Fagan.....	899,722
Auger, hollow, N. E. Swanson.....	900,044
Auscultophone, L. A. Townsend.....	899,815
Automobile, T. B. Jeffery.....	899,537
Automobile wheel, J. Laus, Jr.....	899,876
Axle box, self-rolling, G. C. Benjamin.....	899,941
Axle for motor road vehicles, J. & A. Niclausse.....	899,891
Axles, machine for turning cranked, H. W. Jacobs.....	899,536
Bag and blank therefor, P. A. Frye.....	899,723
Bag closing mechanism, J. Rogers.....	899,766
Bag filling and tying machine, J. Rogers.....	899,765
Bag tier shears, J. Rogers.....	899,765
Baling press, A. B. Bennett.....	899,502
Baling press, J. W. Galbreath.....	899,663
Baling press, T. Guidry.....	899,666
Band, band fastener, and seal combined, J. S. Mark.....	899,997
Bank, pocket coin, W. E. Porter.....	899,678
Barometer, J. Nelson.....	899,836
Battery. See Primary battery.	
Bearing for vertical shafts, ball, A. Riehe.....	899,563
Bed bottom and frame, wire, Rabedew and Vernal.....	899,681
Bed, recess, Ingram & Hinton.....	899,868
Beer, brewing, Nathan & Bolze.....	899,756
Bellows package for distributing powder, S. S. Adams.....	899,496
Bellows pedal, folding, C. S. Wright.....	899,935
Belt and belt fastener, K. Mastale.....	899,831
Belt guide, N. A. Groat.....	899,970
Belt tightener, Lane & Stevens.....	899,741
Blade fastening, R. A. McKee.....	899,607
Blade fastening, M. Rotter.....	899,622
Block molding machine, E. N. Edwards.....	899,517
Blowing engine, G. B. Petsche.....	899,558
Boat, life, R. D. Mayo.....	899,972
Boat releasing appliance, C. L. Bevins.....	899,942
Boiler blow-off device, domestic, J. Manne-schmidt, Jr.....	899,830
Book, loose-leaf, J. C. Hedges.....	899,594
Bottle capping machine, W. Cooper.....	899,861
Bottle case, T. L. Valerius.....	899,924
Bottle stopper, G. Kirkegaard.....	899,737
Bottle washing machine, cased, T. L. Valerius.....	899,927
Box machine, L. P. Brown.....	899,506
Box machines, automatic glue feeder and spreader for, E. Rothong.....	899,621
Brake release, A. A. St. Clair.....	899,919
Brick, block, or tile cutter or shaper, W. H. Hill.....	899,980
Broom making chuck, E. J. Powers.....	899,679
Buckle, F. A. Goodykoontz.....	899,969
Buckle, snap-fastening slide, T. R. Hyde, Jr.....	899,670
Buggy top attachment, E. Gano.....	899,789
Building block or brick, W. H. Daniels.....	899,958
Building blocks and artificial stone from plastic material, A. A. Pauly.....	899,799
Butter, cheese, and the like, machine for cutting, F. G. Hodell.....	899,533
Button, A. Hall.....	899,528
Button, J. G. Breitenstein.....	899,824
Button, upholsterer's, H. L. E. Krueger.....	899,601
Cabinet, cheese, C. C. Brown.....	899,945
Cabinet, ironing, B. A. Stocking.....	899,633
Cable clamp, H. B. Newhall.....	899,757
Cable drum, A. A. Pifer.....	899,613
Cable power, C. J. Eastman.....	900,060
Cables, relief grip for, J. H. Colby.....	899,786
Calendar, E. K. Plough.....	899,614
Can opener, J. H. Lynch.....	900,030
Canned goods, revolver for processing, H. L. Forhan.....	900,064
Capsule filling mechanism, J. P. Remington.....	899,761
Capsule placing device, J. P. Remington.....	899,760
Car coupling, automatic, V. Marton.....	899,604
Car door construction, J. M. Rush.....	899,909
Car, dump, T. H. Stagg.....	899,573
Car fender, G. F. Walker.....	899,689
Car, railway, E. T. Robinson.....	899,592
Car roof, M. E. Ward.....	899,817
Car underframe, A. Becker.....	899,649
Car wheel, O. S. Pulliam.....	899,880
Cars, detachable log-retaining device for, O. W. Wade.....	899,816
Cars, street signal for, N. G. Augir.....	899,499
Cars, trip-stake and bolster for logging, F. J. Schmittner.....	900,040
Carbonating and bottling apparatus, liquid, A. J. Billows.....	899,782
Carriage, folding, O. N. Turner.....	899,851
Carriage top, J. P. Fillingham.....	900,063
Carton, G. W. Teasdale.....	899,922
Cartridge loading machine, W. I. Donaldson.....	899,592
Caster, A. F. W. Bowen.....	899,505
Castings, cooling, L. Kavanagh.....	899,736
Central buffer claw coupling, L. Sr., & L. Scheib, Jr.....	899,565
Chair covering, barber's, O. H. Willard.....	899,853
Chair seat, C. H. Lenhart.....	899,745
Change maker, automatic, W. W. Roblyer.....	899,704
Chaplet and shrine of the holy rosary, W. Hendrick.....	899,977
China cleaning, J. Pass.....	899,893
Cigar wrapper rolling machine, H. Nagel-eisen.....	899,993
Clasp, J. V. Newton.....	900,034
Clothes line fastener, J. G. Schleiter.....	899,566
Clothes presser and hanger, L. Albert.....	900,051
Clutch, H. Ast.....	899,822
Clutch, W. M. Ammerman.....	900,052
Clutch mechanism for automobiles and the like, L. S. Chadwick.....	899,953
Coat and adjustable skirt hanger, combination, F. Levy.....	899,603
Coin separator, A. R. Moore.....	899,550
Coke oven, T. J. Mitchell.....	899,886
Collar cap and fastener, combination, J. J. Pol.....	899,803
Collar, horse, L. J. Powers.....	899,560
Concrete mixer, N. E. Marsh.....	899,549
Controller regulator, C. P. Ebersole.....	899,717
Converter, H. Shoemaker.....	899,629
Conveyer, C. D. Seehager.....	900,000
Cooler. See Hot box cooler.	
Copy holder, M. L. Flynn.....	899,520
Copying apparatus, exposure plate for, Rottgen & Frey.....	899,908
Core molding apparatus, H. W. Bracken.....	900,054
Corking machine, R. B. Gilchrist.....	899,525
Corn husking machine, J. F. White.....	899,777
Cotton picker, J. T. McDonald.....	899,835
Crane, traveling, A. W. Wright.....	899,712
Cream separating device, J. H. Reed.....	899,804

Crupper, L. S. Ellis	899,061
Cultivating implement, F. H. Weaver	900,004
Cultivating machine, C. Soltesz	899,917
Cultivator fender, E. G. Munson	899,753
Cultivator or harrow, rotary, B. F. Stewart	899,632
Culvert, J. H. Schlafly	900,039
Cup and saucer, D. A. Stewart	899,811
Current motor, J. R. Jeffrey	899,987
Cutting machine, R. F. Coleman	899,860
Cycle driving gear, motor, A. Leydahl	899,746
Cylinder and piston machines, increasing the volumetric efficiency of, A. Vogt	899,706
Dam, W. M. Ransom	899,703
Decoloring oils, fats, etc., and making the same, composition for, Macherski & Koperski	899,879
Derrick, F. R. Patch	899,758
Digester, C. Edgerton	899,961
Disintegrating apparatus, A. D. Furse	899,521
Display rack, F. Hennermann	900,014
Ditching machine, O. T. & O. C. Gullixson	900,072
Door, crane, J. T. Wallis	899,930
Door for lockers, D. Churchill	899,589
Door operating mechanism, J. B. Osmer	899,796
Draft gear, H. T. Krakau	900,024
Draft gear and buffing mechanism, H. T. Krakau	900,023
Draft gear, radial, H. T. Krakau	900,022, 900,025
Draft timber protector, A. P. Nordeen	899,554
Drag, road, F. E. Ott	899,798
Drain inlet guard, A. J. Shepard	899,568
Drawers, E. S. Bartram	899,500
Dumping device, A. M. Abelli	899,652
Dust receptacle, E. G. Adams	899,937
Duster and polisher, floor, G. W. Goodier	899,726
Dye and making same, orange to orange-yellow vat, A. Schaarschmidt	899,845
Dye and making same, violet vat, Kraft & Engli	899,994
Egg case carrier, J. E. Harker	899,531
Electric conductors, connection for, F. H. Ball	899,708
Electric installation, box connector for, W. H. Vibber	899,639
Electric installation, combined bushing and coupling for, W. H. Vibber	899,638
Electric installation molding box, W. H. Vibber	899,637
Electric switch, C. W. Wachtel	900,005
Electric wires, grounding clamp for, W. H. Vibber	899,636
Electrical distribution system, A. S. Hubbard	899,535
Engine, Schneider & Conrath	899,625
Engine ignition system, explosion, R. Varley	899,770
Engine starting device, gasoline, F. Reynolds	899,618
Engine starting mechanism, gas, W. K. Andrew	899,498
Engines, control and fuel-feeding device for internal combustion, J. T. Dickson	899,715
Eraser, ink, Johnson & Scott	899,539
Evaporator, W. Kirkwood	899,738
Excavating machine, O. Heltseater	899,597
Explosive, smokeless, M. A. Abelli	899,555
Explosives producing gelatinized nitrocellulose, G. H. Wadsworth	899,577
Extraction apparatus, C. M. Chamberlain	899,512
Fan, L. Owen	899,555
Fan, O. Selg	899,684
Farm gate, L. Liesmann	899,741
Fastener, L. F. Hammer	899,972
Feed mechanism, C. A. Hirth	899,981
Fence or guard, wicket, A. L. J. Miller	899,605
Fertilizer, L. Coates	900,058
Fertilizer distributor, W. E. Wadsworth	899,580
Fertilizer distributor, G. E. Alphin	899,646
Fibers machine for preparing vegetable	899,846
Scherr & Darkin	899,660
Fifth wheel, W. H. Divers	899,545
Film developing apparatus, daylight, J. Le Compte	899,645
Filter, C. W. Wright	899,645
Fire alarm, B. B. Mears	899,749
Fire escape, Huffman & Fry	899,984
Fire escape ladder, H. L. McArthur	899,552
Fire extinguisher, H. L. Carter	900,011
Fire pot or lining, E. G. Germer	900,011
Firearms to supports, clasp for fastening, Renfors & Lindgren	899,617
Fishing rod tip, F. A. Smith	899,914
Flexible pipe, G. F. Royer	899,623
Floor cleaning machine, G. W. Goodier	899,725
Floor construction, J. J. Whitacre	899,775
Flower, artificial, W. A. Warner	899,852
Flower support, G. E. Browne	899,946
Fluid meter testing apparatus, T. B. Doran	899,960
Fluid pressure motor, J. E. Osmer	899,959
Flushing apparatus, street, J. Hill	900,015
Folding box, C. T. Bloomer	899,654
Folding mechanism, rotary, M. Lang	899,743
Food chopper, J. H. Shaw	899,702
Fore masher, I. Rathgeber	899,841
Frame, See Necktie supporting frame	899,596
Frame mounting, O. Heltseater	899,596
Freight conveyor, G. W. Younkman	899,854
Furnace grate, steam boiler, H. Schofield	899,910
Furnace tiling, D. R. Steele	900,044
Furnaces, dust trap for hot air, J. M. Sager	899,810
Game apparatus, J. G. Patrick	899,895
Garment hanger, F. W. Van Nortwick	899,929
Garment, neck protecting, Rosenbaum & Hall	899,907
Gas analyzing apparatus, H. J. Westover	899,774
Gas burner, F. Krabal	899,600
Gas generator, acetylene, E. M. Rosenbluth	899,809
Gas generator, acetylene, Fiedler & Bischof	899,944
Gas light fixture, J. Maas	900,031
Gas, manufacturing, H. W. Benner	899,690
Gas produced, W. B. Hughes	899,867
Gas producers, charger and stirrer for, Smythe & Shinn	899,572
Gas, producing, Frost & Nix	900,065
Gas producing apparatus, Nix & Frost	900,010

## Classified Advertisements

Advertising in this column is 75 cents a line. No less than four nor more than ten lines accepted. Count seven words to the line. All orders must be accompanied by a remittance. Further information sent on request.

READ THIS COLUMN CAREFULLY.—You will find inquiries for certain classes of articles numbered in consecutive order. If you manufacture these goods write us at once and we will send you the name and address of the party desiring the information. There is no charge for this service. In every case it is necessary to give the number of the inquiry. Where manufacturers do not respond promptly the inquiry may be repeated.

MUNN &amp; CO.

### BUSINESS OPPORTUNITIES.

A CORPORATION of highest standing having large well equipped factory and selling organization, and ample capital, desires to manufacture and market mechanical inventions of unquestioned merit. Correspondence solicited. Address K. A., Box 773, N. Y. City.

**Inquiry No. 8611.**—Wanted to buy springs for light power purposes.

**\$100 FIRST MORTGAGE 6 Per Cent. Gold Bonds.** \$90 cash or \$91.50 in ten monthly payments. Lewis N. Rosenbaum Co., Inc., Investment Bonds, Capital and Surplus \$1,334,468.08. Washington Bldg., Seattle, Wash.

**Inquiry No. 8650.**—Wanted to buy file cutting machinery.

**BUSINESS BOOK FREE.** Tell how you can secure the actual working plans, the money-making systems, schemes and short cuts of 112 great big business men to increase your salary—to boost your profits. Book is free. System, Dept. 177, 151-153 Wabash Ave., Chicago.

### PATENTS FOR SALE.

**FOR SALE.**—A carousal, patent No. 884,386, issued July 28, 1908. Owner was killed in accident few days after it was allowed. Will sell reasonable. Address James Petracek, Oberlin, Kans.

**Inquiry No. 8667.**—Wanted to buy needle, pin and pen machinery.

**A MONEY MAKING PATENT FOR SALE.**—Portable coal bin for kitchen and parlor. For full information address A. H. Koch, 238 W. 1st St., New York.

**Inquiry No. 8685.**—Wanted to buy 1½ to 2-inch No. 13 to 18 tempered spring steel.

**FOR SALE OR MANUFACTURE.**—Patent No. 896,515, issued August 18, 1908, for artificial bearing for cars, automobiles, heavy wagons, machinery. Address A. B. Chapman, 607 Marion St., Tampa, Florida.

**Inquiry No. 8687.**—Wanted to buy motor plows.

**FOREIGN PATENTS** for meritorious and valuable inventions (especially British) negotiated upon a confidential basis. Absolutely no fees accepted. References given and required. L. Henry, 141 Broadway, New York.

**Inquiry No. 8699.**—Wanted to buy two-stranded soldered wire for heddles.

**FOR SALE.**—Safest, best and easiest draft manure spreader. Works without an apron. Address A. A. Fokken, Raymond, South Dakota.

**Inquiry No. 8701.**—Wanted to buy sol engines.

**FOR SALE.**—Patent 887,125 for apparatus for instantaneous killing, with safety, all the rats in a burrow, including sucklings, at nominal cost. Demand must be unlimited. Address Henry Reese, 1522 Madison Ave., Baltimore, Md.

**Inquiry No. 8721.**—Wanted unwelded tubing that is used for structural work.

**PATENT No. 884,167.**—A new one. Nothing like it patented. Worth investigating. Address R. L. Kennon, Jr., Box 887, Birmingham, Ala.

**Inquiry No. 8735.**—For parties making a still for the purpose of extracting alcohol from saw-dust.

**FOR SALE.**—Patent No. 885,551 "Vehicle Cleaning Device." All tools for manufacture trade quite well established. Address E. P. Gaylord, Rochester, N. Y.

**Inquiry No. 8736.**—For manufacturers of machinery for making matches, also machinery for making purses and hand bags.

### HELP WANTED.

**WANTED.**—Competent foreman for modern shot-making plant having capacity of 15,000 to 20,000 tons a year. In writing, state experience and give references. Winchester Repeating Arms Co., New Haven, Conn.

**Inquiry No. 8737.**—For manufacturers of machinery for making tooth-brushes, shaving brushes, galvanized water buckets, locks, nubs and holders.

### AGENTS WANTED.

**REINHOLD ALUMINUM SOLDER** sells at sight. Absolutely new article. Splendid seller. Send 50 cents for sample and instructions. Easy to get busy with this. E. M. & R. Co., Sunday Call, Newark, N. J.

**Inquiry No. 8742.**—For manufacturers of water still, also of thermometer tubing.

### SITUATIONS WANTED.

**WANTED.**—Situation with some honorabl structural engineers, by honest young man with ingenious ability. Address James Ashmead, Ticonderoga, N. Y.

**Inquiry No. 8746.**—For dealers in paper and cardboard making machines.

### AUTOMOBILES.

**HOW ABOUT YOUR GASOLINE MOTOR?** Does it run smoothly? Send 10c. for 36-page text-book "Carburetors and Engine Troubles." Breeze Carburetors, 242 Halsey Street, Newark, N. J.

**Inquiry No. 8748.**—Wanted to buy polished or lacquered brass in sheets 29 gauge, quarter hard in temper.

### TYPEWRITERS.

**YOUR CHOICE** of a machine from \$10 up and, Franklin, Hammond, Remington, Over, Monarch, L. C. Smith, Underwood, Smith Premier, Blickenslager, Fox, Agfa, number is filled with numerous illustrations of recent pictorial photographs. Valuable to the professional and beginner. 15 cents monthly, \$1.50 per year. Three specimen copies for 25 cents. Am. Photographic Publishing Co., No. 6 Beacon Street, Boston, Mass.

### REAL ESTATE.

**EXCELLENT LAND** for factory sites for sale freehold or on lease at Stamford, Lincolnshire, England. Good railway facilities on Great Northern Railway sidings, water drainage and electric power available. Apply Burkhley Estate Office, Stamford, England.

**Inquiry No. 8769.**—For manufacturers of an appliance to attach to the old style razor blade to make same a safety razor.

### PHOTOGRAPHY.

**AMERICAN PHOTOGRAPHY.**—A monthly magazine containing up-to-date information about photographic processes, formulas and new apparatus. Each number is filled with numerous illustrations of recent pictorial photographs. Valuable to the professional and beginner. 15 cents monthly, \$1.50 per year. Three specimen copies for 25 cents. Am. Photographic Publishing Co., No. 6 Beacon Street, Boston, Mass.

### LISTS OF MANUFACTURERS.

**COMPLETE LISTS** of manufacturers in all lines supplied at short notice at moderate rates. Small and special lists compiled to order at various prices. Estimates should be obtained in advance. Address Munn & Co., List Department, Box 773, New York.

A LIST OF 1,500 mining and consulting engineers on cards. A very valuable list for circularizing, etc. Price \$15.00. Address Munn & Co., List Department, Box 773, New York.

**Inquiry No. 8770.**—For parties who make short link twist chains, links from ¼ inch up.

**Inquiry No. 8771.**—Wanted to buy tune sheets for Criterion music boxes.

**Inquiry No. 8774.**—For machinery for making bags from sisal hemp.

**Inquiry No. 8775.**—Wanted to buy stock novelty or jewelry catalogues.

**Inquiry No. 8778.**—For manufacturers of reapers, binders and mowers.

**Inquiry No. 8779.**—For parties manufacturing gas, gasoline, steam engines and boilers; also packing and mineral wool, steam supplies, iron and lead pipe, power transmission machinery and steam fitters' tools.

**Inquiry No. 8780.**—For parties who make gasoline stoves.

**Inquiry No. 8783.**—For manufacturers of small drummer's traps as whistles, rattles, rooster crows, etc.

**Inquiry No. 8784.**—For manufacturers of alcohol burners for lights and stoves.

**Inquiry No. 8786.**—For parties to manufacture glass balls blown about 1½ inch in diameter with a ¼ inch hole through the center, should hold about 200 pounds to the square inch of steam pressure.

**Inquiry No. 8787.**—For parties who manufacture cat-gut.

**Inquiry No. 8790.**—For the manufacturer of "Brooks improved hand pump."

**Inquiry No. 8792.**—For a firm that manufactures glass holders made of glass.

**Inquiry No. 8794.**—For manufacturers of the "Ideal Dust Pan."

**Inquiry No. 8795.**—For a mechanical device for catching or destroying flies, mosquitos, etc.; also traps for catching snakes.

**Inquiry No. 8796.**—For concerns manufacturing stills adapted to the manufacture of denatured alcohol.

**Inquiry No. 8797.**—For manufacturers of fiber.

**Inquiry No. 8798.**—For manufacturers of micro lenses used in small articles such as pencils, charms, etc.

**Inquiry No. 8799.**—Wanted to buy new or second-hand box nailing machine for small packing cases.

**Inquiry No. 8800.**—Wanted complete data in regard to pegamoid.

**Inquiry No. 8802.**—Wanted to buy machinery for cutting and polishing oilstones, whetstones or grindstones.

**Inquiry No. 8803.**—For manufacturers of flies, screws, druggists' supplies, hardware in general, and agricultural machinery.

**Inquiry No. 8804.**—For parties dealing in windmills, wood split pulleys, wheelbarrows, cutlery and picks.

**Inquiry No. 8805.**—Wanted to buy outfits and supplies for brazing.

**Inquiry No. 8806.**—For manufacturers of drawing materials.

**Inquiry No. 8807.**—For dealers in second-hand cotton machinery.

**Inquiry No. 8810.**—For makers or importers of porous water bottles or jars to cool drinking water by evaporation.

**Inquiry No. 8811.**—Wanted to buy electric tattooing needles, inks and stencils.

**Inquiry No. 8812.**—Wanted to buy outfits for manufacturing fuel briquettes from sawdust.

**Inquiry No. 8813.**—For manufacturer of the "Steele" mixer for mixing food products, etc.

**Inquiry No. 8814.**—Wanted to buy hand lever air pumps, 100 lbs. pressure.

**Inquiry No. 8815.**—Wanted to buy carriage and wagon hardware, coal, iron and steel.

**Inquiry No. 8817.**—For a firm that forms small articles of wire, also a firm to make wooden rings about 3 or 4 inches in diameter.

**Inquiry No. 8818.**—Wanted to buy specialties in large quantities.

**Inquiry No. 8819.**—For manufacturers of Excelsior Welding Compound.

**Inquiry No. 8820.**—Wanted to buy pressed fiber boards 1 foot wide and from 1-16 to ¼ inch thick.

**Inquiry No. 8821.**—Wanted to buy machinery for making a rough composition board, something like a straw board.

**Inquiry No. 8822.**—For manufacturers of dredging machinery to be operated by gas engine.

**Inquiry No. 8823.**—For manufacturers of crepe paper and paper novelties.

**Inquiry No. 8824.**—For a firm to design and build an automatic machine for making finger shields.

**Inquiry No. 8825.**—For manufacturers of a new device to split wood.

**Inquiry No. 8826.**—Wanted to buy small fuel compression machines both manual and engine power.

**Inquiry No. 8827.**—For manufacturers of annealed glass.

**Inquiry No. 8828.**—Wanted to buy thin, highly tempered steel for safety razors.

**Inquiry No. 8829.**—Wanted to buy machinery for making pins, hair pins, hooks and eyes.

**Inquiry No. 8830.**—Wanted to buy machinery for making brushes and baskets.

**Inquiry No. 8831.**—Wanted to buy knitting machines.

**Inquiry No. 8832.**—Wanted addresses of high-grade label weavers, preferably in New York.

**Inquiry No. 8833.**—Wanted to buy a peanut shell machine.

**Inquiry No. 8834.**—Wanted to buy a 2-horsepower gasoline engine for spray wazon working on hilly ground.

**Inquiry No. 8835.**—Wanted to buy toothpick machinery.

**Inquiry No. 8836.**—Wanted to buy decorticating machines for sisal.

**Inquiry No. 8837.**—Wanted to buy folding umbrellas.

**Inquiry No. 8838.**—Wanted to buy metallic targets similar to clay birds used in shot-gun shooting.

**Inquiry No. 8839.**—Wanted to buy cheap automobiles.

**Inquiry No. 8840.**—Wanted to buy portable hydrocarbon pressure lamps.

**Inquiry No. 8841.**—Wanted to buy lunch counter and restaurant fixtures.

**Inquiry No. 8842.**—Wanted to buy annealed glass.

## The Highest Efficiency

combined with durability and simplicity of operation, characterize all our **Woodworking Machinery** for the use of carpenters, builders, cabinet-makers and woodworkers generally. For ripping, cross-cutting, mitring, boring, edge-moulding, beading, grooving, rabbeting, etc. These machines are unequaled. Ask for catalogue A.

## Engine and Foot Lathes

**MACHINE SHOP OUTFITS, TOOLS AND SUPPLIES. BEST MATERIALS. BEST WORKMANSHIP. CATALOGUE FREE**  
SEBASTIAN LATHE CO., 120 Culvert St., Cincinnati, O.

## SPECIAL TO AUTOMOBILISTS:—

Bosh Magneto Plugs only \$1.25 each. Guaranteed in every respect. We sell automobile supplies cheaper than any supply house in the United States. We buy in quantities and sell by mail only; we have over 10,000 customers. We sell anything from an automobile to an oil can. Send for our weekly bargain sheet; it will interest you and save you money.

**CONSUMERS AUTO SUPPLY CO.**  
1252-1254 Wabash Avenue, Chicago, Ills.

## The Perfection Wrench

Newest wrench on the market. Best "all-round" tool ever made. All steel—great strength. Instantly adjusted. Easily and quickly operated. Immense time, temper and trouble saver. Indispensable to automobilists. After using the "Perfection" once, you will never buy any other make wrench. Write for circular to

**THE PERFECTION WRENCH CO.**  
Box 426, Port Chester, N. Y.

## THIS GRINDER

Has no pumps, no valves. No piping required to supply it with water. Always ready for use. Simplest in construction, most efficient in operation. Price will interest you.  
**W. F. & J. N. BARNES CO.,**  
Established 1872.  
1999 Ruby St., Rockford, Ill.

**AUTOMOBILES (new), high grade,** can be bought from us positively cheaper than manufacturers' prices. We buy for spot cash; wonderful what ready money will do. We apply and carry out the same argument relative to second-hand cars. You cannot afford to overlook our offers. Send for list. Also ask for our new 100-page catalog number 129 on supplies. You will be agreeably surprised with the figures and certainly satisfied with the goods. For reductions in the price of tires, the best quality of fresh goods, we have no equal. Times Square Automobile Company, largest dealers in new and second hand automobiles in the world, 1539 Broadway, New York; 1332 Michigan Ave., Chicago, Ill.

## WELL DRILLING Machines

Over 70 sizes and styles, for drilling either deep or shallow wells in any kind of soil or rock. Mounted on wheels or on skids. With engine or horse powers. Strong, simple and durable. Any mechanic can operate them easily. Send for catalog.

**WILLIAMS BROS., Ithaca, N. Y.**

## Concrete, Reinforced Concrete AND Concrete Building Blocks

Scientific American Supplement 1543 contains an article on Concrete, by Brysson Cunningham. The article clearly describes the proper composition and mixture of concrete and gives results of elaborate tests.

Scientific American Supplement 1538 gives the proportion of gravel and sand to be used in concrete.

Scientific American Supplements 1567, 1568, 1569, 1570, and 1571 contain an elaborate discussion by Lieut. Henry J. Jones of the various systems of reinforcing concrete, concrete construction, and their applications. These articles constitute a splendid text book on the subject of reinforced concrete. Nothing better has been published.

Scientific American Supplement 997 contains an article by Spencer Newberry in which practical notes on the proper preparation of concrete are given.

Scientific American Supplements 1568 and 1569 present a helpful account of the making of concrete blocks by Spencer Newberry.

Scientific American Supplement 1534 gives a critical review of the engineering value of reinforced concrete.

Scientific American Supplements 1547 and 1548 give a resume in which the various systems of reinforced concrete construction are discussed and illustrated.

Scientific American Supplement 1564 contains an article by Lewis A. Hicks, in which the merits and defects of reinforced concrete are analyzed.

Scientific American Supplement 1551 contains the principles of reinforced concrete with some practical illustrations by Walter Loring Webb.

Scientific American Supplement 1573 contains an article by Louis H. Gibson on the principles of success in concrete block manufacture, illustrated.

Scientific American Supplement 1574 discusses steel for reinforced concrete.

Scientific American Supplements 1575, 1576, and 1577 contain a paper by Philip L. Wormley, Jr., on cement mortar and concrete, their preparation and use for farm purposes. The paper exhaustively discusses the making of mortar and concrete, depositing of concrete, facing concrete, wood forms, concrete sidewalks, details of construction of reinforced concrete posts.

Each number of the Supplement costs 10 cents.

A set of papers containing all the articles above mentioned will be mailed for \$1.80.

**J. STEVENS ARMS & TOOL CO., 810 Grove St., Chicopee Falls, Mass.**

## A Home Made Alternating Current Motor

READ SUPPLEMENT 1688 for a good, clear article by F. E. WARD, E. E., on the making of a  $\frac{1}{2}$  horse power alternating current motor. The motor can be constructed by anyone of ordinary skill in the use of tools, who has access to a screw-cutting lathe with a swing of 9 inches or more. The motor is designed to run on the 100 to 120 volt, 60-cycle, single-phase alternating current circuit, now in widespread use for the lighting of dwellings. The motor will drive a 16-inch brass fan, a

small lathe, or a 50-watt dynamo for generating direct current for charging storage batteries, and in fact will do almost any kind of work that can be done by one-man power. Order from your newsdealer or from

**MUNN & COMPANY, 361 Broadway, New York, N. Y.**

## John D. Rockefeller says:

"I know of nothing more despicable and pathetic than a man who devotes all the waking hours of the day to making money for money's sake."

At last the man about whom everyone is talking tells his own story and something about his early associates—how he and his partners worked together—how many more opportunities there are now for young men than there were twenty years ago—all this and more in the November number of

## I. H. C. Gasoline Engines

Simple, reliable powers adapted to all classes of mechanics.

### MAKE CERTAIN OF YOUR POWER

I. H. C. engines are dependable, easily controlled, economical of fuel, and require the minimum of attention.

Thorough factory tests and a guarantee from a company that cannot afford to send out engines that prove failures make you safe.

Vertical engines in 2 and 3 and 25-horse power. Horizontal (Portable and Stationary) in 4, 6, 8, 10, 12, 15 and 20-horse power.

Call on local I. H. C. agents or write for catalog.

A printed copy of the specification and drawing of any patent in the foregoing list, or any patent in print issued since 1883, will be furnished from this office for 10 cents, provided the name and number of the patent desired and the date be given. Address Munn & Co., 361 Broadway, New York.

Canadian patents may now be obtained by the inventors for any of the inventions named in the foregoing list. For terms and further particulars address Munn & Co., 361 Broadway, New York.

*You Have Your Organization At Your Finger Tips*  
with a  
**WESTERN ELECTRIC**  
Intercommunicating Telephone System.

No matter how finely a business house may be organized and systematized, it is necessary that intercourse be easy between heads of departments in order to settle the hundred and one unforeseen problems that arise daily in every business.

A Western Electric Intercommunicating Telephone System actually puts your organization at your finger tips.

Western Electric Intercommunicating Telephones are furnished in both wall and desk types. They are inexpensive to install, reliable in operation, and of low maintenance cost. They are of the high quality-standard adopted by the largest operating telephone companies.

Write for Booklet No. 5002 on Intercommunicating Telephone Systems for Business and Residence Use.

**WESTERN ELECTRIC COMPANY**  
261 S. Clinton St., Chicago 465 West St., Dept. 680, New York

## American Homes and Gardens

gives its readers the experience of experts in solving the most difficult HOME PROBLEMS. It is a thoroughly practical magazine having the word "Home" for its keynote.

### How to Build the Home

¶ Floor plans and details of construction of houses of moderate cost as well as more pretentious mansions are a feature of each issue.

### How to Decorate the Home

¶ The most experienced decorators in the country describe how the best and most artistic results are attained from the point of expenditure, and the more important one of satisfaction.

### How to Plan and Lay Out the Garden

¶ The frame of the House-picture is the garden, and success in its treatment means that each tree and shrub is correctly placed as well as properly grown, hence this department will be found most helpful.

**Outdoor Life and Amusements, Articles on House Industries,** every phase of country life is authoritatively discussed from month to month in its pages. ¶ "American Homes and Gardens" is conceded to be the handsomest magazine published in America. Its illustrations are largely reproductions of original photographs printed in duo-tone. Its beautiful cover printed in colors changes each month, and is always a work of art. ¶ **Subscription price, \$3 per year.**

¶ If you send us an order for a year's subscription now we will send you the November and December, 1908, numbers free, entering the subscription for the full year 1909.
