NEW YORK

Why It Pays to Buy Sea Lion Leather Belting

First cost and maintenance cost of belts are two very different things. That's why you save money getting Sea Lion Belting. It costs you a trifle more to begin with, but it lasts enough longer to more than make up for the initial cost.

If you require a belt that will stand live steam, water conditions such as leaking roofs, bursting pipes or flooded wheel pits and the trying humidity of a warm climate—in fact any of the conditions that so quickly knock out an ordinary belt—

SEA LION
Guaranteed Waterproof
Leather Belting

Is the only kind you can afford to buy. We cut it from the choicest oak tanned hides on the market—using only center stock. Every process in the making is done with utmost thoroughness and care. The laps are joined by our own process of cement under 3,000 lbs. hydraulic pressure to the square inch, so that you could tear the leather sooner than separate the joints by any tensile strain. We sell it under a guarantee equally as liberal to the user as we place on our **Black Tanned Reliance Leather Belting** and that means every foot is guaranteed and that we will repair or replace any belt defective in stock or workmanship; and in addition to the above we guarantee the laps against opening up on account of either water or steam.

We are also manufacturers of Reliance, Sterling, Imperial and Dynamo brands of belting—which are just as good value for different purposes. Write us about your belt needs. We will advise you and send you a book on belting.

COLD GALVANIZING

IMPORTANT PATENT DECISION

An important decision has just been rendered by Judge Cross of the Circuit Court of the United States, District of New Jersey, in favor of the Hanson & Van Winkle Co., of Newark, N. J., and Chicago, Ill., and against the United States Electro-Galvanizing Company, of Brooklyn, New York, for a new process of electro-galvanizing.

IN EQUITY ON FINAL HEARING

The Hanson & Van Winkle Co. took up this fight single handed some six years ago, and have conducted it at great expense, feeling confident of final success. This seems a particularly opportune time to call the attention of all those interested in galvanizing processes to the perfection to which the Hanson & Van Winkle Company has brought this art and to the fact that their salts and processes have now been authoritatively declared to be free and clear of infringement on this patent, which had heretofore been asserted to be all-controlling. **Whatever may be said of its validity as against others, as against the salts and processes of this company the patent is of no effect.**

While the process of the Hanson & Van Winkle Company, as installed by their experts, is simple and inexpensive, their intention is to install at once in the larger cities, outfits in connection with their improved mechanical devices in order to show prospective users the advantage of their methods.

Just Published

The New Agriculture

By T. BYARD COLLINS

12mo, 374 pages, 106 illustrations, cloth, price \$2.00

THIS new and authoritative work deals with the subject in a scientific way and from a new viewpoint. Dr. Collins has devoted his lifetime to the study of changing economic agricultural conditions. "Back to the soil" was never a more attractive proposition and never so worthy of being heeded as during these opening years of the twentieth century. Farm life to-day offers more inducements than at any previous period in the world's history, and it is calling millions from the desk. The reason for this is not at first obvious, and for this reason Dr. Collins has prepared the present work, which demonstrates conclusively the debt which agriculture owes to modern science and the painstaking government and State officials. Much of the drudgery of the old farm life has been done away with by the use of improved methods, improved stock and varieties. All this tends to create wealth by increased value of the product and decreased cost of production. Irrigation, the new fertilization, the new transportation, the new creations, the new machinery, all come in for a share of attention. The illustrations are of special value, and are unique. All who are in any way interested in agriculture should obtain a copy of this most timely addition to the literature of agriculture. A full table of contents, as well as sample illustrations, will be sent on application.
